Finance Directorate

1. Executive Summary/Bestuursopsomming

The purpose of this report is to table the draft Operating and Capital Budget for 2013/2014, indicative budget forecasts for 2014/2015 to 2015/2016 and draft budget related policies.

2. Service Delivery and Budget Implementation Plan - IGNITE

Directorate: Finance

Department: Accounting Services & Budget Office

3. Compliance with Strategic Priorities

Provision of democratic and accountable governance Provision and maintenance of municipal services Creation and maintenance of a safe and healthy environment Management and conservation of the natural environment Promotion of tourism, rural and economic development

4. Delegated Authority

None

5. Legal Requirements

Local Government: Municipal Financial Management Act, 2003 (Act 56 of

2003) (MFMA)

Local Government: Municipal Systems Act, 2000 (Act 32 of 2000)

6. Background/Introduction/Discussion/Motivation/Proposal/ Evaluation

Sections 21 to 23 of the MFMA provides for the budget preparation process, the publication of annual budgets for comment and consultations to take place on tabled budgets.

The budget has been compiled taking into account the draft IDP and all inputs from the Budget Steering Committee, Overstrand Municipal Advisory Forum (OMAF), Ward Committees and the administration.

The report referred to in the Executive Summary will be tabled in Council on 27 March 2013. After the report has been tabled at the Council meeting, same will lie open for inspection for the community and all other stakeholders to make representations during the period 2 April to 3 May 2013. All managers and other officials of the municipality are also encouraged to evaluate and study the content of the draft budget for purposes of submitting their inputs to the Director: Finance on or before 30 April 2013.

After taking into account the submissions made by the community and all other stakeholders, Council will consider the final 2013/2014 budget proposals at a meeting to be held on 29 May 2013.

7. Financial Implications

None

8. Staff Implications

None

9. Comments from other Departments, Divisions and Administrations

None at this stage. Comments by officials to be submitted to the Director: Finance on or before 30 April 2013.

10. Annexures

Draft Operating and Capital Budget Report for 2013/2014, indicative budget forecasts for 2014/2015 to 2015/2016 and draft budget related policies to **be tabled at the Council meeting.**

RECOMMENDATION TO THE COUNCIL/AANBEVELING AAN DIE RAAD:

that the draft Operating and Capital Budget for 2013/2014, indicative budget forecasts for 2014/2015 to 2015/2016 and the draft budget related policies **be noted**, and that the final budget proposals and budget related policies, taking into account the comments received by the community and all other stakeholders, be considered by Council, at the meeting scheduled to take place on 29 May 2013.

Part 1 – Annual Budget

1.1 Mayor's Report

The Executive Mayor will deliver her Budget speech with the tabling of the final budget for approval and hereby tables this draft budget for 2013/2014 for comment.

The draft IDP and other draft plan and strategies will also be tabled with this draft budget.

1.2 Council Resolutions

The following is a draft of the resolutions that will be considered for the approval and adoption of the annual budget for 2013/2014:

- 1. The Council of Overstrand Local Municipality, acting in terms of section 24 of the Municipal Finance Management Act, (Act 56 of 2003) approves and adopts:
 - 1.1. The annual budget of the municipality for the financial year 2013/14 and the multi-year and single-year capital appropriations as set out in the following tables:
 - 1.1.1. Budgeted Financial Performance (revenue and expenditure by municipal vote) as contained in Table 19 on page 24;
 - 1.1.2. Budgeted Financial Performance (revenue by source and expenditure by type) as contained in Table 21 on page 28; and
 - 1.1.3. Multi-year and single-year capital appropriations by municipal vote associated funding by source as contained in Table 22 on page 30.
 - 1.2. The financial position, cash flow budget, cash-backed reserve/accumulated surplus, asset management and basic service delivery targets are noted as set out in the following tables:
 - 1.2.1. Budgeted Financial Position as contained in Table 23 on page 32;
 - 1.2.2. Budgeted Cash Flows as contained in Table 24 on page 34;
 - 1.2.3. Cash backed reserves and accumulated surplus reconciliation as contained in Table 25 on page 34;
 - 1.2.4. Asset management as contained in Table 26 on page 36; and
 - 1.2.5. Basic service delivery measurement as contained in Table 27 on page 38.
- 2. The Council of Overstrand Local Municipality, acting in terms of section 75A of the Local Government: Municipal Systems Act (Act 32 of 2000) approves and adopts with effect from 1 July 2013:
 - 2.1. the tariffs for property rates as set out in Annexure A,
 - 2.2. the tariffs for electricity as set out in Annexure A
 - 2.3. the tariffs for the supply of water as set out in Annexure A
 - 2.4. the tariffs for sanitation services as set out in Annexure A
 - 2.5. the tariffs for solid waste services as set out in Annexure A
- 3. The Council of Overstrand Local Municipality, acting in terms of 75A of the Local Government: Municipal Systems Act (Act 32 of 2000) approves and adopts with effect from 1 July 2013 the tariffs for other services, as set out in Annexure A.
- 4. To give proper effect to the municipality's annual budget, the Council of Overstrand Local Municipality approves:
 - 4.1. That cash backing is implemented through the utilisation of a portion of the revenue generated from operations and cash backed surplus funds to ensure that any capital reserve, unspent long-term loans and unspent conditional grants are cash backed as

- required in terms of the municipality's funding and reserves policy as prescribed by section 8 of the Municipal Budget and Reporting Regulations.
- 4.2. That the municipality be permitted to enter into long-term loans for the funding of the capital programmes in respect of the 2013/14 financial year limited to an amount of R40 million per financial year for 2013/2014 7 2014/2015 of the MTREF in terms of Section 46 of the Municipal Finance Management Act.
- 4.3. That the Municipal Manager be authorised to sign all necessary agreements and documents to give effect to the above lending programme.

1.3 Executive Summary

The application of sound financial management principles for the compilation of the Municipality's financial plan is essential and critical to ensure that the Municipality remains financially viable and that municipal services are provided sustainably, economically and equitably to all communities.

The Municipality's business and service delivery priorities were reviewed as part of this year's planning and budget process. Where appropriate, funds were transferred from low- to high-priority programmes so as to maintain sound financial stewardship. A critical review was also undertaken of expenditures on non core and 'nice to have' items.

The Municipality has undertaken various customer care initiatives to ensure the municipality truly involves all citizens in the process of ensuring a people lead government. Encouragement of structured community participation in the matters of the municipality is now a strategic objective.

National Treasury's MFMA Circular No. 66 and 67 were used to guide the compilation of the 2013/14 MTREF.

The main challenges experienced during the compilation of the 2013/14 MTREF can be summarised as follows:

- The ongoing difficulties in the national and local economy:
- Ever aging water, roads, sewage and electricity infrastructure:
- The need to reprioritise projects and expenditure within the existing resource envelope given the cash flow realities of the municipality;
- The increased cost of bulk electricity (due to tariff increases from Eskom), which is placing upward pressure on service tariffs to residents. Continuous high tariff increases are not sustainable as there will be point where services will no-longer be affordable;
- Wage increases for municipal staff that continue to exceed consumer inflation, as well as the need to fill critical vacancies;
- Affordability of capital projects original allocations had to be reduced and the operational expenditure associated with prior year's capital investments needed to be factored into the budget as part of the 2013/14 MTREF process; and
- Maintaining a positive cash.

The following budget principles and guidelines directly informed the compilation of the 2013/14 MTREF:

- The 2012/13 Adjustments Budget priorities and targets, as well as the base line allocations contained in that Adjustments Budget were adopted as the upper limits for the new baselines for the 2013/14 annual budget;
- Intermediate service level standards were used to inform the measurable objectives, targets and backlog eradication goals;
- Tariff and property rate increases should be affordable and should generally not exceed inflation as measured by the CPI, except where there are price increases in the inputs of services that are beyond the control of the municipality, for instance the cost of bulk

- electricity. In addition, tariffs need to remain or move towards being cost reflective, and should take into account the need to address infrastructure backlogs;
- There will be no budget allocated to national and provincial funded projects unless the necessary grants to the municipality are reflected in the national and provincial budget and have been gazetted as required by the annual Division of Revenue Act;

In view of the aforementioned, the following table is a consolidated overview of the proposed 2013/14 Medium-term Revenue and Expenditure Framework:

Table 1 Consolidated Overview of the 2013/14 MTREF

	Budget	Budget	Budget	Budget
	Year	Year	Year +1	Year +2
	2012/13	2013/14	2014/15	2015/16
Revenue	657 582	748 031	783 552	848 644
Expenditure	758 982	829 258	866 440	926 417
Surplus / (Deficit)	(40 000)	(47 218)	(59 200)	(53 767)
Capital	167 500	104 681	69 756	75 208

13,75% 9,26%		8,31% 6,92%
-37,50%	-33,36%	7,82%

Total operating revenue has grown by 13.75 per cent for the 2013/14 financial year when compared to the 2012/13 Adjustments Budget. For the two outer years, operational revenue will increase by 4,75 and 8,81 per cent respectively.

Total operating expenditure for the 2013/14 financial year has been appropriated at R748,6m and translates into a budgeted deficit of R47,2m. When compared to the 2012/13 Adjustments Budget, operational expenditure has grown by 9,26 per cent in the 2013/14 budget and by 4,48 and 6,92 per cent for each of the respective outer years of the MTREF.

It should be noted that although the 2013/2014 operational budget and indicative years indicate budgeted deficits, this does not reflect the actual cash position. These circumstances arose as the result of the implementation of GRAP, with special reference to GRAP 17 (Property, Plant and Equipment-PPE). The asset value before depreciation is in excess of R5 billion, which relates to high depreciation charges. Although accurately reflecting asset value, the cost of a substantial portion of these assets has been fully redeemed. The replacement thereof can thus not be recouped via current tariffs as this would lead to taxation in advance of need and no reserves may be established for these purposes.

The capital budget of R104,6m for 2013/14 is 37,5 per cent less when compared to the 2012/13 Adjustment Budget. The reduction is due to the available resources to fund the capital budget. The capital programme decreases to R70m and R75m in the outer years. A substantial portion of the capital budget (50%) will be funded from borrowing over the MTREF with anticipated borrowings of R125m. The balance will be funded from internally generated funds and capital grants. Note that the Municipality has reached its prudential borrowing limits and so there is very little scope to substantially increase these borrowing levels over the medium-term. The repayment of capital and interest (debt services costs) has increased over the past five years as a result of the aggressive capital infrastructure programme implemented over the past three years. Consequently, the capital budget remains relatively flat over the medium-term.

1.4 Operating Revenue Framework

For Overstrand to continue improving the quality of services provided to its citizens it needs to generate the required revenue. In these tough economic times strong revenue management is fundamental to the financial sustainability of the municipality. The reality is that we are faced with development backlogs and poverty. The expenditure required to address these challenges will

inevitably always exceed available funding; hence difficult choices have to be made in relation to tariff increases and balancing expenditures against realistically anticipated revenues.

The municipality's revenue strategy is built around the following key components:

- National Treasury's guidelines and macroeconomic policy;
- Growth in the Municipality and continued economic development;
- Efficient revenue management, which aims to ensure levels above 95 per cent annual collection rates for property rates and other key service charges;
- Electricity tariff increases as approved by the National Electricity Regulator of South Africa (NERSA);
- Achievement of full cost recovery of specific user charges especially in relation to trading services;
- Determining the tariff escalation rate by establishing/calculating the revenue requirement of each service;
- The municipality's Property Rates Policy approved in terms of the Municipal Property Rates Act, 2004 (Act 6 of 2004) (MPRA);
- Increase ability to extend new services and recover costs;
- The municipality's Indigent Policy and rendering of free basic services; and
- Tariff policies of the Municipality.

The following table is a summary of the 2013/14 MTREF (classified by main revenue source):

Agency services	2 081	2 250	8,11%	2 332	3,64%	2 477	6,21%
Transfers recognised - operational	41 958	68 984	64,41%	55 324	-19,80%	72 061	30,25%
Other revenue	20 968	20 011	-4,56%	21 367	6,77%	22 235	4,06%
Total Revenue (excluding capital transfers and contributions)	657 582	748 031		783 552		848 644	

In line with the formats prescribed by the Municipal Budget and Reporting Regulations, capital transfers and contributions are excluded from the operating statement, as inclusion of these revenue sources would distort the calculation of the operating surplus/deficit.

Revenue generated from rates and services charges forms a significant percentage of the revenue basket for the Municipality. Rates and service charge revenues comprise more 80% of the total revenue mix. In the 2012/13 financial year, revenue from rates and services charges totalled R565m. This increases to R629m, R676m and R723m in the respective financial years of the MTREF. The above table includes revenue foregone arising from discounts and rebates associated with the tariff policies of the Municipality. Details in this regard are contained in Table 64 MBRR SA1 (see page 99).

After service charges, property rates are the second largest revenue source. The third largest sources is 'other revenue' which consists of various items such as income received from permits and licenses, building plan fees, connection fees, fines, and advertisement fees. Departments have been urged to review the tariffs of these items on an annual basis to ensure they are cost reflective and market related.

Operating grants and transfers totals R69 million in the 2013/14 financial year. The following table gives a breakdown of the various operating grants and subsidies allocated to the municipality over the medium term:

Table 4 Operating Transfers and Grant Receipts

Tariff-setting is a pivotal and strategic part of the compilation of any budget. When rates, tariffs and other charges were revised, local economic conditions, input costs and the affordability of services were taken into account to ensure the financial sustainability of the Municipality.

National Treasury continues to encourage municipalities to keep increases in rates, tariffs and other charges as low as possible. Municipalities must justify in their budget documentation all increases in excess of the 6 per cent upper boundary of the South African Reserve Bank's inflation target. Excessive increases are likely to be counterproductive, resulting in higher levels of non-payment.

The percentage increases of Eskom bulk tariffs are far beyond the mentioned inflation target. Given that these tariff increases are determined by external agencies, the impact they have on the municipality's electricity and in these tariffs are largely outside the control of the Municipality. Discounting the impact of these price increases in lower consumer tariffs will erode the Municipality's future financial position and viability.

It must also be appreciated that the consumer price index, as measured by CPI, is not a good measure of the cost increases of goods and services relevant to municipalities. The basket of goods and services utilised for the calculation of the CPI consist of items such as food, petrol and medical services, whereas the cost drivers of a municipality are informed by items such as the cost of remuneration, bulk purchases of electricity and water, petrol, diesel, chemicals, etc. The current challenge facing the Municipality is managing the gap between cost drivers and tariffs levied, as any shortfall must be made up by either operational efficiency gains or service level reductions. Within this framework the Municipality has undertaken the tariff setting process relating to service charges as follows.

1.4.1 Property Rates

Property rates cover the cost of the provision of general services. Determining the effective property rate tariff is therefore an integral part of the municipality's budgeting process.

National Treasury's MFMA Circular No. 51 deals, inter alia with the implementation of the Municipal Property Rates Act, with the regulations issued by the Department of Co-operative Governance. These regulations came into effect on 1 July 2009 and prescribe the rate ratio for the non-residential categories, public service infrastructure and agricultural properties relative to residential properties to be 0,25:1

The following stipulations in the Property Rates Policy are highlighted:

TARIFF CODE	CLASS TAX	TYPE OF PROPERTY	REBATE OR EXEMPTIONS
BUS	General Tax: Commercial	All business, industries, Bed and Breakfast and Guest Houses	No exemptions. Bed and Breakfast as well as Guesthouses can apply before 30 June for the following rebate on the difference between Bus and Res. rate: 1 X lettable room: 100% 2 X lettable rooms: 100% 3 X lettable rooms: 75% 4 X lettable rooms: 50% 5 X lettable rooms: 25%
BUSO	General Tax: Tourism and recreational resorts outside of the municipal service	Hotels, Guest Houses, Cottages, Caravan parks	50% rebate on the tax applicable on commercial property in urban areas.

	areas	and Holiday Resorts, Chalets	
RES	General Tax: Residential properties within the municipal service areas	Single residential properties, Group housing, Retirement Villages, Flats, Sectional Schemes, small holdings not used for bona fide farming purposes	The first R15 000.00 of the rateable value of all residential properties is exempted from property tax. A further R35 000.00 of the rateable value is exempted in respect of all residential properties where a residential completion certificate has been issued and an additional rebate of 20% of the levy calculated on such properties, is granted. Rebate to qualifying property owners as indicated under "Other Rebate"
RESO	General Tax: Residential properties outside of the municipal service area	Single residential properties, Group housing, Retirement Villages, Flats, Sectional Schemes	50% of the tax applicable on residential property in urban areas. Rebate to qualifying property owners as indicated under "Other Rebate"
FARMS	General Tax: Farming Properties	Farms and smallholdings used for bona fide farming purposes outside municipal service area	No exemptions. 75% of the tax applicable on residential property in urban areas if the owner provides the council with an affidavit from a registered accounting officer on a business letterhead that the income from farming activities exceeds 40 percent of the household income.
FARMS	Conservation land	Privately owned properties whether designated or used for conservation purposes.	No other rebates are granted. See tariff applicable on Farms.
REBU2 REBU3 REBU4	Other Rebates	Single residential properties, Group Housing, Retirement Villages, Flats, Sectional Schemes	 Property must be occupied permanently; The applicant must be the registered owner; Only one residential unit allowed on the property Applicant may not be the registered owner of more than one property A rebate of 100% to approved applicants, in terms of the Rating Policy, who's household income may not exceed the amount of two times (2X) of state funded social pensions per month; A rebate of 40% to approved applicants, in terms of the Rating Policy, who are older than 60 with a total household income less than four times (4X) of state funded social pensions per month; A rebate of 30% to approved applicants, in terms of the Rating Policy, who are older than 60 with a total household income of more than four times (4X) but less than eight times (8X) of state funded social pensions per month.

The categories of rate-able properties for purposes of levying rates and the proposed rates for the 2013/14 financial year based on a percentages below, to increase from 1 July 2013 is contained below:

Table 5 Comparison of proposed rates to levied for the 2013/14 financial year

1.4.2 Sale of Water and Impact of Tariff Increases

South Africa faces similar challenges with regard to water supply as it did with electricity, since demand growth outstrips supply. Consequently, National Treasury is encouraging all municipalities to carefully review the level and structure of their water tariffs to ensure:

- Water tariffs are fully cost-reflective including the cost of maintenance and renewal of purification plants, water networks and the cost associated with reticulation expansion;
- Water tariffs are structured to protect basic levels of service and ensure the provision of free water to the poorest of the poor (indigent); and
- Water tariffs are designed to encourage efficient and sustainable consumption.

In addition National Treasury has urged all municipalities to ensure that water tariff structures are cost reflective by 2014.

Better maintenance of infrastructure and cost-reflective tariffs will ensure that the supply challenges are managed in future to ensure sustainability.

A tariff increase are indicated in the list of tariffs in Annexure B from 1 July 2013. In addition 6 kl water per 30-day period will only be granted free of charge to registered indigents.

A summary of the proposed tariffs for households (residential) are as follows:

Table 6 Proposed Water Tariffs – Household consumption

		2013/	2014	2012	2013	
Tariff Code	Detail	Exclude	Include	Exclude	Include	
		VAT	VAT	VAT	VAT	
W1B	CONSUMPTION - HO	DUSEHOLDS				
	Normal Tariff					
W1B1	0 - 6 kl per kl	3,07	3,50	0,00	0,00	
W1B2	7 - 18 kl per kl	8,11	9,25	7,46	8,50	8,77%
W1B3	19 - 30 kl per kl	13,16	15,00	12,00	13,68	9,67%
W1B4	31 - 45 kl per kl	20,26	23,10	18,60	21,20	8,95%
W1B5	46 - 60 kl per kl	26,32	30,00	25,18	28,70	4,55%

The tariff structure of the 2013/14 financial year has been changed to include a cost for the first 6kl.. The tariff structure is designed to charge higher levels of consumption a higher rate, steadily increasing to a rate of R30,00 per kilolitre for consumption in excess of 60kl per 30 day period.

The following table shows the impact of the proposed increases in water tariffs on the water charges for other consumers.

W1C5	>60 kl per kl	35,09	40,00	extra step	extra step	

1.4.3 Sale of Electricity and Impact of Tariff Increases

NERSA has announced the revised bulk electricity pricing structure. A 9 per cent increase in the Eskom bulk electricity tariff to municipalities will be effective from 1 July 2013.

Considering the Eskom increases, the consumer tariff had to be increased between 3% to 9% to offset the additional bulk purchase cost from 1 July 2013. Furthermore, it should be noted that given the magnitude of the tariff increase, it is expected to depress growth in electricity consumption, which will have a negative impact on the municipality's revenue from electricity.

Registered indigents will again be granted 50 kWh per 30-day period free of charge.

The following table shows the impact of the proposed increases in electricity tariffs for domestic customers:

 Table 8 Comparison between current electricity charges and increases (Domestic)

			2013/2014		2012/2013

E1B1	Basic Monthly charge per meter	R	192,98	220,00	157,89	180,00	40,00	22,22%
	kWH Unit cost							
E1B2	IBT BLOCK 1 0 - 350 kWh	С	81,93	93,40	79,54	90,68	2,72	3,00%
E1B3	IBT BLOCK 2 351 - 600 kWh	С	113,23	129,08	106,82	121,77	7,31	6,00%
E1B4	IBT BLOCK 3 > 600 kWh	С	139,20	158,69	127,71	145,59	13,10	9,00%

The stepped tariff for electricity as previously proposed by NERSA has continued. The effect thereof is that the higher the consumption, the higher the cost per kWh. The aim is to subsidise

the lower consumption users (mostly the poor). The municipality will maintain the current stepped structure of its electricity tariffs.

The inadequate electricity bulk capacity and the impact on service delivery and development remains a challenge for the municipality. The commissioning of the 66 KVA substation during 2013/2014 will address some of the challenges.

The approved budget for the Electricity Division can only be utilised for certain committed upgrade projects and to strengthen critical infrastructure (e.g. substations without back-up supply) and limited upgrading of networks.

Owing to the high increases in Eskom's bulk tariffs, it is clearly not possible to fund necessary upgrades through increases in the municipal electricity tariff – as the resultant tariff increases would be unaffordable for the consumers. The taking up of loans as a strategy for funding of the infrastructure is considered to spread the burden over the life span of the assets. As part of the 2013/14 medium-term capital programme, funding has been allocated to electricity infrastructure.

The full proposed tariffs are included in Annexure B.

1.4.4 Sanitation and Impact of Tariff Increases

A tariff increase of 10 per cent for sanitation (consumption) and 6,45 per cent for basic charges is proposed from 1 July 2013 is proposed. This is based on the input cost assumptions related to water. It should be noted that electricity costs contributes towards waste water treatment input costs, therefore the higher than CPI increase for sanitation tariffs

The following table compares the current and proposed tariffs:

Table 9 Comparison between current sanitation charges and increases

		2013	/2014	2012	/2013

SE8	BASIC CHARGE						
I SE8AR	Basic Monthly Charge Developed sites per erf/unit per month	85,97	98,00	80,70	92,00	6,00	6,52%

1.4.5 Waste Removal and Impact of Tariff Increases

Currently solid waste removal is operating at below break even. It is widely accepted that the rendering of this service should at least break even, which is currently not the case. The Municipality will have to implement a solid waste strategy to ensure that this service can be rendered in a sustainable manner over the medium to long-term. The main contributors to this deficit are general expenditure from rapidly rising petrol and diesel costs and additional contractor costs linked to the closure of Karwyderskraal.

A 11% per cent increase in the waste removal tariff is proposed from 1 July 2013. Higher increases will not be viable in 2013/14 owing to the increases implemented in the previous financial year as well as the overall impact of higher than inflation increases of other services. Any further increase could be counter-productive and will result in affordability challenges for individual rates payers raising the risk associated with bad debt.

The following table compares current and proposed amounts payable from 1 July 2013:

Table 10 Comparison between current waste removal fees and increases

	ariff Code Detail		/2014	2012

All proposed refuse tafiffs are listed in Annexure B

1.4.6 Overall impact of tariff increases on households

The following table shows the overall expected impact of the tariff increases on a medium and small household, as well as an indigent household receiving free basic services.

Note that in all instances the overall impact of the tariff increases on household's bills has been kept below 10 per cent, with the increase for indigent households less than 5 per cent.

1.5 Operating Expenditure Framework

The Municipality's expenditure framework for the 2013/14 budget and MTREF is informed by the following:

- The asset renewal strategy and the repairs and maintenance plan;
- Balanced budget constraint (operating expenditure should not exceed operating revenue)
 unless there are existing uncommitted cash-backed reserves to fund any deficit;
- Funding of the budget over the medium-term as informed by Section 18 and 19 of the MFMA;
- The capital programme is aligned to the asset renewal strategy and backlog eradication plan;
- Operational gains and efficiencies will be directed to funding the capital budget and other core services; and
- Strict adherence to the principle of *no project plan no budget*. If there is no business plan no funding allocation can be made.

The following table is a high level summary of the 2013/14 budget and MTREF (classified per main type of operating expenditure):

Table 12 Summary of operating expenditure by standard classification item

The budgeted allocation for employee related costs for the 2013/14 financial year totals R251,2m which equals 30,3 per cent of the total operating expenditure. Based on the three year collective SALGBC agreement, salary increases have been factored into this budget at a percentage increase of 6,85 per cent for the 2013/14 financial year. An annual increase of 6,63 per cent has been included in the two outer years of the MTREF. As part of the Municipality's cost reprioritization and cash management strategy vacancies have been significantly rationalized downwards. A R7m contingency for vacancies not to be filled, has been provided. This could however have a negative impact on service delivery. In addition expenditure against overtime was investigated for reduction.

The cost associated with the remuneration of councillors is determined by the Minister of Cooperative Governance and Traditional Affairs in accordance with the Remuneration of Public Office Bearers Act, 1998 (Act 20 of 1998). The most recent proclamation in this regard has been taken into account in compiling the Municipality's budget.

The provision of debt impairment was determined based on an annual collection rate of close to 100 per cent and the Debt Write-off Policy of the Municipality. For the 2013/14 financial year this amount equates to a xero provision as the current provision is set to decrease slightly over the medium term.

Provision for depreciation and asset impairment has been informed by the Municipality's Asset Management Policy. Depreciation is widely considered a proxy for the measurement of the rate asset consumption. Budget appropriations in this regard total R103,8 million for the 2013/14 financial and equates to 12,5 per cent of the total operating expenditure. Note that the implementation of GRAP 17 accounting standard has meant bringing a range of assets previously not included in the assets register onto the register. This has resulted in a significant increase in depreciation relative to previous years. This aspect is further highlighted in in para. 1.3 of this report

Finance charges consist primarily of the repayment of interest on long-term borrowing (cost of capital). Finance charges make up 5,09 per cent (R38,7 million) of operating expenditure excluding annual redemption for 2013/14 and increases to R41m by 2014/15. As previously noted, the Municipality has reached its prudential limits for borrowing – hence the planned borrowing to finance the capital budget does not result in finance charges as a percentage of operational expenditure increasing – rather it is kept close to 5 per cent over the MTREF.

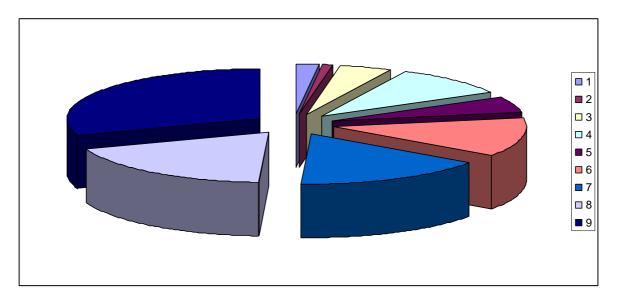

Bulk purchases are directly informed by the purchase of electricity from Eskom. The annual price increases have been factored into the budget appropriations and directly inform the revenue provisions. The expenditures include distribution losses.

Other materials comprises amongst others the purchase of materials for maintenance, cleaning materials etc.. In line with the Municipality's repairs and maintenance plan this group of expenditure has been prioritised to ensure sustainability of the Municipality's infrastructure

Contracted services has been identified as a cost saving area for the Municipality. As part of the compilation of the 2013/14 MTREF this group of expenditure was critically evaluated and operational efficiencies were enforced. In the 2013/14 financial year, this group of expenditure totals R80m and has escalated by11,5 per cent. Further details relating to contracted services can be seen in Table 64 MBRR SA1 (see page 100).

Other expenditure comprises of various line items relating to the daily operations of the municipality. This group of expenditure has also been identified as an area in which cost savings and efficiencies can be achieved. Further details relating to contracted services can be seen in Table 64 MBRR SA1 (see page 100).

The following table gives a breakdown of the main expenditure categories for the 2013/14 financial year.

- 1 Other materials
- 2 Remuneration of councillors
- 3 Grants and subsidies
- 4 Contracted services
- 5 Finance charges Depreciation & asset
- 6 impairment
- 7 Other expenditure
- 8 Bulk purchases
- 9 Employee related costs

Figure 1 Main operational expenditure categories for the 2013/14 financial year

1.5.1 Priority given to repairs and maintenance

Aligned to the priority being given to preserving and maintaining the Municipality's current infrastructure, the 2013/14 budget and MTREF provide for growth in the area of asset maintenance, as informed by the asset renewal strategy and repairs and maintenance plan of the Municipality. In terms of the Municipal Budget and Reporting Regulations, operational repairs and

maintenance is not considered a direct expenditure driver but an outcome of certain other expenditures, such as remuneration, purchases of materials and contracted services. Considering these cost drivers, the following table is a consolidation of all the expenditures associated with repairs and maintenance:

Table 13 Operational repairs and maintenance

Description	2009/10	2010/11	2011/12	Current Year 2012/13			2013/14 Medium Term Revenue & Expenditure Framework

During the compilation of the 2013/14 MTREF operational repairs and maintenance was identified as a strategic imperative owing to the aging of the Municipality's infrastructure. As part of the 2013/14 MTREF this strategic imperative remains a priority as can be seen by the budget appropriations over the MTREF. In relation to the total operating expenditure, repairs and maintenance comprises on average 14,5 per cent over the respective financial years of the MTREF.

The table below provides a breakdown of the repairs and maintenance in relation to asset class:

Table 14 Repairs and maintenance per asset class

R&M as % Operating Expenditure	8,3%	9,1%	8,5%	14,5%	15,1%	15,1%	14,3%	14,7%	14,6%

For the 2013/14 financial year, 76,7 per cent or R90,8 million of total repairs and maintenance will be spent on infrastructure assets. Roads infrastructure has received a significant proportion of the infrastructure allocation totalling 49 per cent (R44,5m), followed by water at 25,1 per cent (R22,7m) and electricity at 14,3 per cent (R14,2m).

1.5.2 Free Basic Services: Basic Social Services Package

The social package assists households that are poor or face other circumstances that limit their ability to pay for services. To receive these free services the households are required to register in terms of the Municipality's Indigent Policy. The current indigent households amount to 6300 and is reviewed monthly. Detail relating to free services, cost of free basis services, revenue lost owing to free basic services as well as basic service delivery measurement is contained in Table 26 MBRR A10 (Basic Service Delivery Measurement) on page 36.

The cost of the social package of the registered indigent households is largely financed by national government through the local government equitable share received in terms of the annual Division of Revenue Act.

1.6 Capital expenditure

The following table provides a breakdown of budgeted capital expenditure by vote:

Table 15 2013/14 Medium-term capital budget per vote

Vote 1 - Council	_	-	-	-	-	-	_	-	-
Vote 2 - Municipal Manager	-	-	-	-	-	-	_	-	-
Vote 3 - Management Services	1 244	1 748	928	845	1 644	1 644	1 439	669	702
Vote 4 - Finance	-	-	-	_	-	_	_	_	_
Vote 5 - Community Services	86 375	90 266	119 308	108 601	131 234	131 234	63 047	51 087	56 006
Vote 6 - Local Economic Development	-	6 973	-	2 418	3 388	3 388	_	_	_
Vote 7 - Infrastructure & Planning	27 752	55 111	42 414	56 883	30 906	30 906	40 194	18 000	18 500
Vote 8 - Protection Services	-	19	645	297	327	327	_	_	_
Total Capital Expenditure - Vote	115 371	154 117	163 295	169 043	167 500	167 500	104 681	69 756	75 208

For 2013/14 an amount of R87,4 has been appropriated for the development of infrastructure which represents 83,5 per cent of the total capital budget. In the outer years this amount totals R57m, 81,1 per cent and R69m, 91,8 per cent respectively for each of the financial years. Electricity infrastructure receives the highest allocation of R40,2m in 2013/14 which equates to 38,4 per cent followed by water infrastructure at 15,2 per cent, R15,9m million and then waste water at 15 per cent, R15,7 million.

Total new assets represent 74,3 per cent or R77,7m of the total capital budget while asset renewal equates to 27,7 per cent or R29,9m. Further detail relating to asset classes and proposed capital expenditure is contained in Table 26 MBRR A9 (Asset Management) on page 36. In addition to the MBRR Table A9, MBRR Tables SA34a, b, c provides a detailed breakdown of the capital programme relating to new asset construction, capital asset renewal as well as operational repairs and maintenance by asset class (refer to pages 88, 89 and 90). Some of the salient projects to be undertaken over the medium-term includes, amongst others:

Project Description	Amount
New 66kVA S/S	14 261 348
Replacement of Overstrand water pipes	8 400 000
Hermanus parallel road	6 557 914
Eluxolweni - Bulk sewarage for housing project	6 067 513
Baardskeerdersbos Bulk water supply upgrade	5 800 000
Hawston: Upgrade roads	5 159 627
Kleinmond and Gansbaai WWTW Sludge Handling	4 575 000
Kleinmond: Replace Main Substation Switchgear	4 300 000
Gansbaai project- 155 SITES (Housing)	4 200 000
Overhills:Kleinmond Soccer Field	4 102 946
Hawston S/S Upgrade	3 200 000
Sewer network extension -Stanford	3 075 000
Upgrade Kwaaiwater Feeder Cables	3 000 000
Zwelihle Electrification -Part 1 (INEG)	3 000 000
Eluxolweni Electrification (INEG)	3 000 000
Apie Le Roux -Franskraal upgrade	2 500 000
Hermanus parallel road(Cycling& pedestrian ways)	2 482 000
Opgradering van Pompstasies	2 000 000

Furthermore, pages 92 to 96 and Annexure C contains a detailed breakdown of the capital budget per project over the medium-term.

The following graph provides a breakdown of the capital budget to be spent per vote over the MTREF.

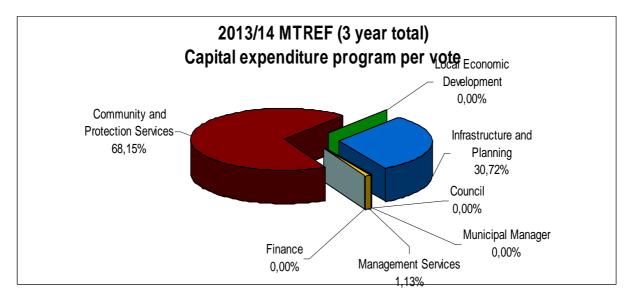

Figure 2 Capital Infrastructure Programme

With the 2011/2012 adjustment budget, projects to be funded from the sale of land (Habonim land), were postponed to future capital budgets dependant on the successful sale of the land. It is Council's policy not to include projects in the next budget approval until the funds from the sale has been deposited in the Council's bank account. A list of the projects is included in Annexure C. Should the money be received timeously, these projects will be included in the 2013/2014 capital budget.

1.6.1 Future operational cost of new infrastructure

At this point in time information is not readily available to include reliable information in Table 61 MBRR SA35 on page 91. A long term financial plan and implementation policy is set to be implemented to encompass costs over the long term. It needs to be noted that as part of the 2013/14 MTREF, this expenditure has been factored into the two outer years of the operational budget.

1.7 Annual Budget Tables - Parent Municipality

The following eighteen pages present the ten main budget tables as required in terms of section 8 of the Municipal Budget and Reporting Regulations. These tables set out the municipality's 2013/14 budget and MTREF as approved by the Council. Each table is accompanied by explanatory notes on the facing page.

Table 16 MBRR Table A1 - Budget Summary

Explanatory notes to MBRR Table A1 - Budget Summary

- 1. Table A1 is a budget summary and provides a concise overview of the Municipality's budget from all of the major financial perspectives (operating, capital expenditure, financial position, cash flow, and MFMA funding compliance).
- 2. The table provides an overview of the amounts approved by Council for operating performance, resources deployed to capital expenditure, financial position, cash and funding compliance, as well as the municipality's commitment to eliminating basic service delivery backlogs.
- 3. Financial management reforms emphasises the importance of the municipal budget being funded. This requires the simultaneous assessment of the Financial Performance, Financial Position and Cash Flow Budgets, along with the Capital Budget. The Budget Summary provides the key information in this regard:
 - a. The operating surplus/deficit (after Total Expenditure) is positive over the MTREF
 - b. Capital expenditure is balanced by capital funding sources, of which
 - i. Transfers recognised is reflected on the Financial Performance Budget;
 - ii. Borrowing is incorporated in the net cash from financing on the Cash Flow Budget
 - iii. Internally generated funds is financed from a combination of the current operating surplus and accumulated cash-backed surpluses from previous years. The amount is incorporated in the Net cash from investing on the Cash Flow Budget. The fact that the municipality's cash flow remains positive, and is improving indicates that the necessary cash resources are available to fund the Capital Budget.
- 4. The Cash backing/surplus reconciliation shows that in previous financial years the municipality was not paying much attention to managing this aspect of its finances, and consequently many of its obligations are not cash-backed. This places the municipality in a very vulnerable financial position, as the recent slow-down in revenue collections highlighted. Consequently Council has taken a deliberate decision to ensure adequate cash-backing for all material obligations in accordance with the recently adopted Funding and Reserves Policy. This cannot be achieved in one financial year. But over the MTREF there is progressive improvement in the level of cash-backing of obligations. It is anticipated that the goal of having all obligations cash-back will be achieved by 2013/14, when a small surplus is reflected.

Explanatory notes to MBRR Table A2 - Budgeted Financial Performance (revenue and expenditure by standard classification)

- 1. Table A2 is a view of the budgeted financial performance in relation to revenue and expenditure per standard classification. The modified GFS standard classification divides the municipal services into 15 functional areas. Municipal revenue, operating expenditure and capital expenditure are then classified in terms if each of these functional areas which enables the National Treasury to compile 'whole of government' reports.
- 2. Note the Total Revenue on this table includes capital revenues (Transfers recognised capital) and so does not balance to the operating revenue shown on Table A4.
- 3. Note that as a general principle the revenues for the Trading Services should exceed their expenditures. The table highlights that this is the case for Electricity, Water and Waste water functions, but not the Waste management function. As already noted above, the municipality will be undertaking a detailed study of this function to explore ways of improving efficiencies and provide a basis for re-evaluating the function's tariff structure.
- 4. Other functions that show a deficit between revenue and expenditure are being financed from rates revenues and other revenue sources reflected under the Corporate Services.

Explanatory notes to MBRR Table A3 - Budgeted Financial Performance (revenue and expenditure by municipal vote)

1. Table A3 is a view of the budgeted financial performance in relation to the revenue and expenditure per municipal vote. This table facilitates the view of the budgeted operating performance in relation to the organisational structure of the Municipality. This means it is possible to present the operating surplus or deficit of a vote. The following table is an analysis of the surplus or deficit for the electricity and water trading services.

Table 19 Surplus/(Deficit) calculations for the trading services

Explanatory notes to Table A4 - Budgeted Financial Performance (revenue and expenditure)

- 1. Total revenue is R657 582 million in 2012/13 and escalates to R748 031 million by 2013/14. This represents a year-on-year increase of 13.75 per cent for the 2013/14 financial year.
- 2. Revenue to be generated from property rates is R118 129 million in the 2012/13 financial year and increases to R131 644 million by 2013/14 which represents 17.6 per cent of the operating revenue base of the Municipality and therefore remains a significant funding source for the municipality. It remains relatively constant over the medium-term and tariff increases have been factored in at 7 per cent, 7 per cent and 6 per cent for each of the respective financial years of the MTREF.
- 3. Services charges relating to electricity, water, sanitation and refuse removal constitutes the biggest component of the revenue basket of the Municipality totalling R447 228 million for the 2012/13 financial year and increasing to R497 549 million by 2013/14. For the 2013/14 financial year services charges amount to 66.5 per cent of the total revenue base and grows by 2 per cent per annum over the medium-term. This growth can mainly be attributed to the increase in the bulk prices of electricity and water.
- 4. Transfers recognised operating includes the local government equitable share and other operating grants from national and provincial government. It needs to be noted that in real terms the grants receipts from national government are growing rapidly over the MTREF by 64.4 per cent.
- 5. The following graph illustrates the major expenditure items per type.

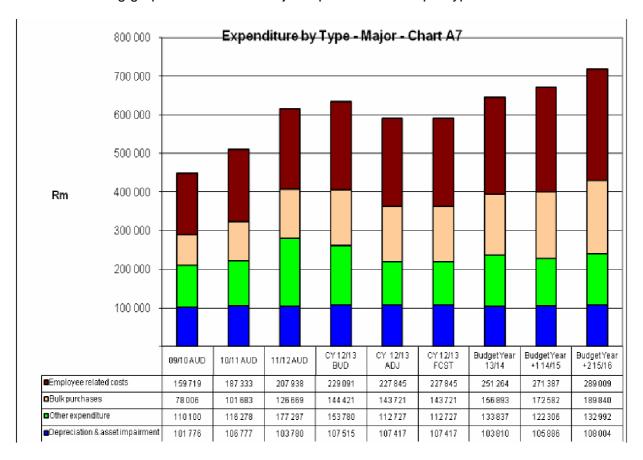

Figure 3 Expenditure by major type

- 6. Bulk purchases have significantly increased over the 2009/10 to 2013/14 period escalating from R78 million to R156 893 million. These increases can be attributed to the substantial increase in the cost of bulk electricity from Eskom.
- 7. Employee related costs and bulk purchases are the main cost drivers within the municipality and alternative operational gains and efficiencies will have to be identified to lessen the impact of wage and bulk tariff increases in future years.

Explanatory notes to Table A5 - Budgeted Capital Expenditure by vote, standard classification and funding source

- 1. Table A5 is a breakdown of the capital programme in relation to capital expenditure by municipal vote (multi-year and single-year appropriations); capital expenditure by standard classification; and the funding sources necessary to fund the capital budget, including information on capital transfers from national and provincial departments.
- 2. The MFMA provides that a municipality may approve multi-year or single-year capital budget appropriations. The capital expenditure amounts to R104,681 million in 2013/14.
- 3. Unlike multi-year capital appropriations, single-year appropriations relate to expenditure that will be incurred in the specific budget year such as the procurement of vehicles and specialized tools and equipment. The budget appropriations for the two outer years are indicative allocations based on the departmental business plans as informed by the IDP and will be reviewed on an annual basis to assess the relevance of the expenditure in relation to the strategic objectives and service delivery imperatives of the Municipality. For the purpose of funding assessment of the MTREF, these appropriations have been included but no commitments will be incurred against single-year appropriations for the two outer-years.
- 4. The capital programme is funded from capital and provincial grants and transfers, public contributions and donations, borrowing and internally generated funds from current year surpluses. For 2013/14, capital transfers totals R33 536 million. Borrowing has been provided at R59 861 million over the MTREF with internally generated funding totaling R10 200 million, R6 069 million and R6 202 million for each of the respective financial years of the MTREF. These funding sources are further discussed in detail in 2.6 (Overview of Budget Funding).

Explanatory notes to Table A6 - Budgeted Financial Position

- 1. Table A6 is consistent with international standards of good financial management practice, and improves understandability for councilors and management of the impact of the budget on the statement of financial position (balance sheet).
- 2. This format of presenting the statement of financial position is aligned to GRAP1, which is generally aligned to the international version which presents Assets less Liabilities as "accounting" Community Wealth. The order of items within each group illustrates items in order of liquidity; i.e. assets readily converted to cash, or liabilities immediately required to be met from cash, appear first.
- 3. Table 66 is supported by an extensive table of notes (SA3 which can be found on page 102) providing a detailed analysis of the major components of a number of items, including:
 - Call investments deposits;
 - Consumer debtors:
 - Property, plant and equipment;
 - · Trade and other payables;
 - Provisions non current;
 - Changes in net assets; and
 - Reserves
- 4. The municipal equivalent of equity is Community Wealth/Equity. The justification is that ownership and the net assets of the municipality belong to the community.
- 5. Any movement on the Budgeted Financial Performance or the Capital Budget will inevitably impact on the Budgeted Financial Position. As an example, the collection rate assumption will impact on the cash position of the municipality and subsequently inform the level of cash and cash equivalents at year end. Similarly, the collection rate assumption should inform the budget appropriation for debt impairment which in turn would impact on the provision for bad debt. These budget and planning assumptions form a critical link in determining the applicability and relevance of the budget as well as the determination of ratios and financial indicators. In addition the funding compliance assessment is informed directly by forecasting the statement of financial position.

Explanatory notes to Table A7 - Budgeted Cash Flow Statement

- 1. The budgeted cash flow statement is the first measurement in determining if the budget is funded.
- 2. It shows the expected level of cash in-flow versus cash out-flow that is likely to result from the implementation of the budget.
- 3. It can be seen that the cash levels of the Municipality fell significantly over the 2011/12 to 2013/14.
- 4. As part of the 2012/13 mid-year review and Adjustments Budget this unsustainable cash position had to be addressed as a matter of urgency and various interventions were implemented such as the reduction of expenditure allocations and rationalization of spending priorities.
- 5. The 2013/14 MTREF has been informed by the planning principle of ensuring adequate cash reserves over the medium-term.
- 6. Cash and cash equivalents totals R91 518 million as at the end of the 2012/13 financial year and escalates to R94 994 million by 2015/16.

Explanatory notes to Table A8 - Cash Backed Reserves/Accumulated Surplus Reconciliation

- 1. The cash backed reserves/accumulated surplus reconciliation is aligned to the requirements of MFMA Circular 42 Funding a Municipal Budget.
- 2. In essence the table evaluates the funding levels of the budget by firstly forecasting the cash and investments at year end and secondly reconciling the available funding to the liabilities/commitments that exist.
- 3. The outcome of this exercise would either be a surplus or deficit. A deficit would indicate that the applications exceed the cash and investments available and would be indicative of non-compliance with the MFMA requirements that the municipality's budget must be "funded".

Explanatory notes to Table A9 - Asset Management

- 1. Table A9 provides an overview of municipal capital allocations to building new assets and the renewal of existing assets, as well as spending on repairs and maintenance by asset class.
- 2. National Treasury has recommended that municipalities should allocate at least 40 per cent of their capital budget to the renewal of existing assets, and allocations to repairs and maintenance should be 8 per cent of PPE. The Municipality meets both these recommendations.

Explanatory notes to Table A10 - Basic Service Delivery Measurement

1. Table A10 provides an overview of service delivery levels, including backlogs (below minimum service level), for each of the main services.

Part 2 – Supporting Documentation

2.1 Overview of the annual budget process

Section 53 of the MFMA requires the Mayor of the municipality to provide general political guidance in the budget process and the setting of priorities that must guide the preparation of the budget. In addition Chapter 2 of the Municipal Budget and Reporting Regulations states that the Mayor of the municipality must establish a Budget Steering Committee to provide technical assistance to the Mayor in discharging the responsibilities set out in section 53 of the Act.

The Budget Steering Committee consists of the Municipal Manager and senior officials of the municipality meeting under the chairpersonship of the MMC for Finance.

The primary aims of the Budget Steering Committee is to ensure:

- that the process followed to compile the budget complies with legislation and good budget practices:
- that there is proper alignment between the policy and service delivery priorities set out in the Municipality's IDP and the budget, taking into account the need to protect the financial sustainability of municipality;
- that the municipality's revenue and tariff setting strategies ensure that the cash resources needed to deliver services are available; and
- that the various spending priorities of the different municipal departments are properly evaluated and prioritised in the allocation of resources.

2.1.1 Budget Process Overview

In terms of section 21 of the MFMA the Mayor is required to table in Council ten months before the start of the new financial year (i.e. in August 2012) a time schedule that sets out the process to revise the IDP and prepare the budget.

The Mayor tabled in Council the required the IDP and budget time schedule on 29 August 2012. Key dates applicable to the process were:

- August 2012 Joint strategic planning session of the Mayoral Committee and Executive Management. Aim: to review past performance trends of the capital and operating budgets, the economic realities and to set the prioritisation criteria for the compilation of the 2013/14 MTREF;
- October 2012 Review of the draft capital budget with reference to the 2012/2013 MTREF and ward committees submit draft ward specific projects
- **November 2012** Mayoral strategic session and detailed departmental budget proposals (capital) submitted to the Budget and Treasury Office.
- December 2012 Mid year review by the BSC of the 2012/2013 progress and review of 2013-2016 draft operational expenditure including financial forecasting and scenario considerations;
- January 2013 Tariff proposals and budget related policies reviewed
- **25 January 2013** Council considers the 2012/13 Mid-year Review and adjustment budget proposalst;
- **February 2013** Adjustment budget for 2012/2013 and review of draft capital and operational proposals;
- March 2013 BSC finalises capital, operational and tariffs
- **28 March 20**13 Tabling in Council of the draft 2013/14 IDP and 2013/14 MTREF for public consultation:
- April 2011 Public consultation;
- 30 April 2013 Closing date for written comments;

- 2 to 21 May 2013 finalisation of the 2013/14 IDP and 2013/14 MTREF, taking into
 consideration comments received from the public, comments from National Treasury, and
 updated information from the most recent Division of Revenue Bill and financial framework;
 and
- 29 May 2013 Tabling of the 2013/14 MTREF before Council for consideration and approval.

There were no deviations from the key dates set out in the Budget Time Schedule tabled in Council.

2.1.2 IDP and Service Delivery and Budget Implementation Plan

This is the fourth review of the IDP as adopted by Council in May 2006. It started in September 2010 after the tabling of the IDP Process Plan and the Budget Time Schedule for the 2013/14 MTREF in August.

The Municipality's IDP is its principal strategic planning instrument, which directly guides and informs its planning, budget, management and development actions. This framework is rolled out into objectives, key performance indicators and targets for implementation which directly inform the Service Delivery and Budget Implementation Plan. The Process Plan applicable to the fourth revision cycle included the following key IDP processes and deliverables:

- Registration of community needs;
- Compilation of departmental business plans including key performance indicators and targets;
- Financial planning and budgeting process;
- Public participation process;
- Compilation of the SDBIP, and
- The review of the performance management and monitoring processes.

The IDP has been taken into a business and financial planning process leading up to the 2013/14 MTREF, based on the approved 2012/13 MTREF, Mid-year Review and adjustments budget. The business planning process has subsequently been refined in the light of current economic circumstances and the resulting revenue projections.

With the compilation of the 2013/14 MTREF, each department/function had to review the business planning process, including the setting of priorities and targets after reviewing the mid-year and third quarter performance against the 2012/13 Departmental Service Delivery and Budget Implementation Plan. Business planning links back to priority needs and master planning, and essentially informed the detail operating budget appropriations and three-year capital programme.

2.1.3 Financial Modelling and Key Planning Drivers

As part of the compilation of the 2013/14 MTREF, extensive financial modelling was undertaken to ensure affordability and long-term financial sustainability. The following key factors and planning strategies have informed the compilation of the 2013/14 MTREF:

- Municipality growth
- Policy priorities and strategic objectives
- Asset maintenance
- Economic climate and trends (i.e inflation, Eskom increases, household debt, migration patterns)
- Performance trends
- The approved 2012/13 adjustments budget and performance against the SDBIP
- Cash Flow Management Strategy

- Debtor payment levels
- Loan and investment possibilities
- The need for tariff increases versus the ability of the community to pay for services;
- Improved and sustainable service delivery

In addition to the above, the strategic guidance given in National Treasury's MFMA Circulars 66 and 67 has been taken into consideration in the planning and prioritisation process.

2.1.4 Community Consultation on the Draft Budget

The draft 2013/14 MTREF to be tabled in Council on 28 March 2013 will officially be available to the community as follows:

Copies of this document can be viewed:

- At the offices of all Area Managers
- All public libraries within the municipality
- At the website: www.overstrand.gov.za

The tabling of the draft budget will be advertised in all local newspapers and a copy of the advertisement will be available on the notice boards at municipal offices and libraries. Furthermore, an OMAF meeting, where all ward committees are represented, will be held in the municipal auditorium on 3 April 2013. All documents in the appropriate format (electronic and printed) will be provided to National Treasury, and Provincial Treasury in accordance with section 23 of the MFMA, to provide an opportunity for them to make inputs. Ward Committees were utilised to facilitate the community consultation process from 18 to 12 April 2013. Submissions received during the community consultation process will be considered after the closing on 30 April 2013.

2.2 Overview of alignment of annual budget with IDP

The Constitution mandates local government with the responsibility to exercise local developmental and cooperative governance. The eradication of imbalances in South African society can only be realized through a credible integrated developmental planning process. Municipalities in South Africa need to utilise integrated development planning as a method to plan future development in their areas and so find the best solutions to achieve sound long-term development goals. A municipal IDP provides a five year strategic programme of action aimed at setting short, medium and long term strategic and budget priorities to create a development platform, which correlates with the term of office of the political incumbents. The plan aligns the resources and the capacity of a municipality to its overall development aims and guides the municipal budget. An IDP is therefore a key instrument which municipalities use to provide vision. leadership and direction to all those that have a role to play in the development of a municipal area. The IDP enables municipalities to make the best use of scarce resources and speed up service delivery. Integrated developmental planning in the South African context is amongst others, an approach to planning aimed at involving the municipality and the community to jointly find the best solutions towards sustainable development. Furthermore, integrated development planning provides a strategic environment for managing and guiding all planning, development and decision making in the municipality. It is important that the IDP developed by municipalities correlate with National and Provincial intent. It must aim to co-ordinate the work of local and other spheres of government in a coherent plan to improve the quality of life for all the people living in that area. Applied to the Municipality, issues of national and provincial importance should be reflected in the IDP of the municipality. A clear understanding of such intent is therefore imperative to ensure that the Municipality strategically complies with the key national and provincial priorities.

The aim of this revision cycle was to develop and coordinate a coherent plan to improve the quality of life for all the people living in the area, also reflecting issues of national and provincial importance. One of the key objectives is therefore to ensure that there exists alignment between

national and provincial priorities, policies and strategies and the Municipality's response to these requirements.

The national and provincial priorities, policies and strategies of importance include amongst others:

- Green Paper on National Strategic Planning of 2009;
- Government Programme of Action;
- Development Facilitation Act of 1995;
- Provincial Growth and Development Strategy (GGDS);
- National and Provincial spatial development perspectives;
- Relevant sector plans such as transportation, legislation and policy;
- National Key Performance Indicators (NKPIs);
- Accelerated and Shared Growth Initiative (ASGISA);
- National 2014 Vision;
- National Spatial Development Perspective (NSDP) and
- The National Priority Outcomes.

The Constitution requires local government to relate its management, budgeting and planning functions to its objectives. This gives a clear indication of the intended purposes of municipal integrated development planning. Legislation stipulates clearly that a municipality must not only give effect to its IDP, but must also conduct its affairs in a manner which is consistent with its IDP. The following table highlights the IDP's five strategic objectives for the 2013/14 MTREF and further planning refinements that have directly informed the compilation of the budget:

Table 27 IDP Strategic Objectives

	2012/13 Financial Year		2013/14 MTREF

	communities	3.2	Integrated Social Services for empowered and
			sustainable communities
4.	Fostering participatory democracy and	4.	Foster participatory democracy and Batho Pele
	adherence to Batho Pele principles		principles through a caring, accessible and
	through a caring, accessible and		accountable service
	accountable service		
5.	Good governance, Financial viability and	5.1	Promote sound governance
	institutional governance	5.2	Ensure financial sustainability
		5.3	Optimal institutional transformation to ensure
			capacity to achieve set objectives

In order to ensure integrated and focused service delivery between all spheres of government it was important for the Municipality to align its budget priorities with that of national and provincial government. All spheres of government place a high priority on infrastructure development, economic development and job creation, efficient service delivery, poverty alleviation and building sound institutional arrangements.

Local priorities were identified as part of the IDP review process which is directly aligned to that of the national and provincial priorities. The key performance areas can be summarised as follows against the five strategic objectives:

- 1. Provision of quality basic services and infrastructure which includes, amongst others:
 - Provide electricity;
 - o Provide water;
 - o Provide sanitation;
 - o Provide waste removal;

- o Provide housing;
- Provide roads and storm water:
- Provide public transport;
- o Provide municipality planning services; and
- Maintaining the infrastructure of the Municipality.
- 2. Economic growth and development that leads to sustainable job creation by:
 - Ensuring the is a clear structural plan for the Municipality;
 - o Ensuring planning processes function in accordance with set timeframes;
 - Facilitating the use of labour intensive approaches in the delivery of services and the building of infrastructure.
- 3.1 Fight poverty and build clean, healthy, safe and sustainable communities:
 - o Effective implementation of the Indigent Policy;
 - Working with the provincial department of health to provide primary health care services;
 - o Extending waste removal services and ensuring effective municipality cleansing;
 - Ensuring all waste water treatment works are operating optimally;
 - Working with strategic partners such as SAPS to address crime;
 - Ensuring save working environments by effective enforcement of building and health regulations;
 - o Promote viable, sustainable communities through proper zoning; and
 - o Promote environmental sustainability by protecting wetlands and key open spaces.
- 3.2 Integrated Social Services for empowered and sustainable communities
 - Work with provincial departments to ensure the development of community infrastructure such as schools and clinics is properly co-ordinated with the informal settlements upgrade programme
- 4. Foster participatory democracy and Batho Pele principles through a caring, accessible and accountable service by:
 - Optimising effective community participation in the ward committee system; and
 - o Implementing Batho Pele in the revenue management strategy.
- 5.1 Promote sound governance through:
 - o Publishing the outcomes of all tender processes on the municipal website
- 5.2 Ensure financial sustainability through:
 - Reviewing the use of contracted services
 - Continuing to implement the infrastructure renewal strategy and the repairs and maintenance plan
- 5.3 Optimal institutional transformation to ensure capacity to achieve set objectives
 - o Review of the organizational structure to optimize the use of personnel;

In line with the MSA, the IDP constitutes a single, inclusive strategic plan for the Municipality. The five-year programme responds to the development challenges and opportunities faced by the Municipality by identifying the key performance areas to achieve the five the strategic objectives mentioned above.

In addition to the five-year IDP, the Municipality undertakes an extensive planning and developmental strategy which primarily focuses on a longer-term horizon; 15 to 20 years. This process is aimed at influencing the development path by proposing a substantial programme of public-led investment to restructure current patterns of settlement, activity and access to resources in the Municipality so as to promote greater equity and enhanced opportunity. The strategy specifically targets future developmental opportunities in traditional dormitory settlements. It

provides direction to the Municipality's IDP, associated sectoral plans and strategies, and the allocation of resources of the Municipality and other service delivery partners.

This development strategy introduces important policy shifts which have further been translated into seven strategic focus areas/objectives as outlined below:

- Developing dormant areas;
- Enforcing hard development lines so as to direct private investment;
- Maintaining existing urban areas;
- Strengthening key economic clusters;
- Building social cohesion;
- Strong developmental initiatives in relation to the municipal institution as a whole; and
- Sound financial fundamentals.

Lessons learned with previous IDP revision and planning cycles as well as changing environments were taken into consideration in the compilation of the fourth revised IDP, including:

- Strengthening the analysis and strategic planning processes of the Municipality;
- Initiating zonal planning processes that involve the communities in the analysis and planning processes. More emphasis was placed on area based interventions, within the overall holistic framework;
- Ensuring better coordination through a programmatic approach and attempting to focus the budgeting process through planning interventions; and
- Strengthening performance management and monitoring systems in ensuring the objectives and deliverables are achieved.

The 2013/14 MTREF has therefore been directly informed by the IDP revision process and the following tables provide a reconciliation between the IDP strategic objectives and operating revenue, operating expenditure and capital expenditure.

2.3 Measurable performance objectives and indicators

Performance Management is a system intended to manage and monitor service delivery progress against the identified strategic objectives and priorities. In accordance with legislative requirements and good business practices as informed by the National Framework for Managing Programme Performance Information, the Municipality has developed and implemented a performance management system of which system is constantly refined as the integrated planning process unfolds. The Municipality targets, monitors, assesses and reviews organisational performance which in turn is directly linked to individual employee's performance.

At any given time within government, information from multiple years is being considered; plans and budgets for next year; implementation for the current year; and reporting on last year's performance. Although performance information is reported publicly during the last stage, the performance information process begins when policies are being developed, and continues through each of the planning, budgeting, implementation and reporting stages. The planning, budgeting and reporting cycle can be graphically illustrated as follows:

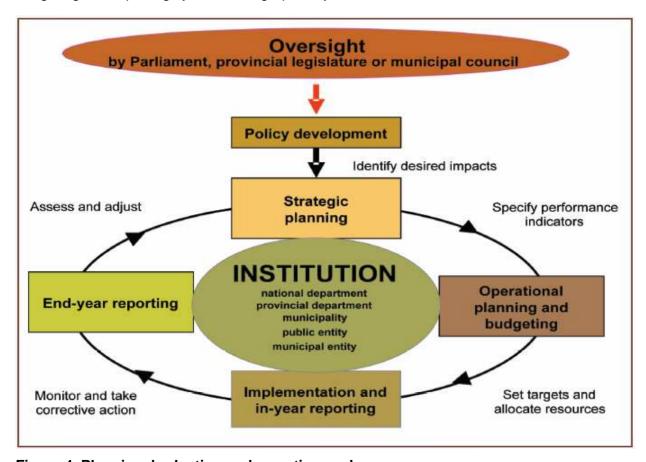

Figure 4 Planning, budgeting and reporting cycle

The performance of the Municipality relates directly to the extent to which it has achieved success in realising its goals and objectives, complied with legislative requirements and meeting stakeholder expectations. The Municipality therefore has adopted one integrated performance management system which encompasses:

- Planning (setting goals, objectives, targets and benchmarks);
- Monitoring (regular monitoring and checking on the progress against plan);
- Measurement (indicators of success);
- Review (identifying areas requiring change and improvement);
- Reporting (what information, to whom, from whom, how often and for what purpose); and
- Improvement (making changes where necessary).

The performance information concepts used by the Municipality in its integrated performance management system are aligned to the *Framework of Managing Programme Performance Information* issued by the National Treasury:

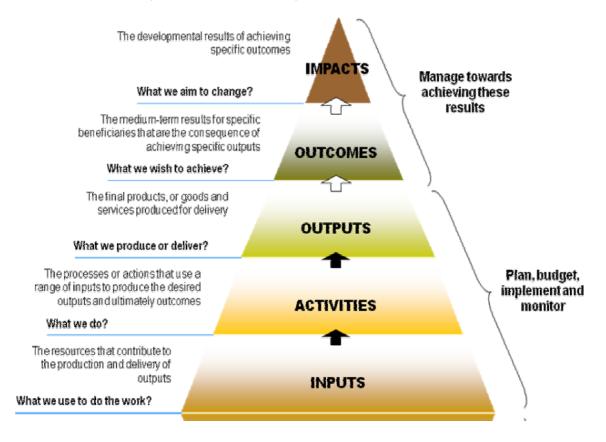

Figure 5 Definition of performance information concepts

The following table provides the main measurable performance objectives the municipality undertakes to achieve this financial year.

2.3.1 Performance indicators and benchmarks

2.3.1.1 Borrowing Management

Capital expenditure in local government can be funded by capital grants, own-source revenue and long term borrowing. The ability of a municipality to raise long term borrowing is largely dependent on its creditworthiness and financial position. As with all other municipalities, Overstrand's borrowing strategy is primarily informed by the affordability of debt repayments. The structure of the Municipality's debt portfolio is dominated by annuity loans. The following financial performance indicators have formed part of the compilation of the 2013/14 MTREF:

- Borrowing to asset ratio is a measure of the long-term borrowing as a percentage of the total asset base of the municipality. While this ratio is decreasing over the MTREF from 40.9 per cent to 18.5 per cent in 2013/14, it needs to be noted that the increased capital grants and transfers has contributed to the decrease and must not be considered a measure on borrowing capacity in isolation of other ratios and measures.
- Capital charges to operating expenditure is a measure of the cost of borrowing in relation to the operating expenditure. It can be seen that the cost of borrowing has steadily increased from 7.3 per cent in 2009/10 to 8.9 per cent in 2012/13. This increase can be attributed to the raising of loans to fund portions of the capital programme. It is estimated that the cost of borrowing as a percentage of the operating expenditure will remain at 8.9 per cent in 2013/14 and will then increase to 9.1 per cent at the end of the MTREF. While borrowing is considered a prudent financial instrument in financing capital infrastructure development, this indicator will have to be carefully monitored going forward as the Municipality has reached its prudential borrowing limits.
- Borrowing funding of own capital expenditure measures the degree to which own capital
 expenditure (excluding grants and contributions) has been funded by way of borrowing. The
 average over MTREF is 60 per cent which substantiates the above mentioned statement
 that the Municipality has reached its prudential borrowing limits.

The Municipality's debt profile provides some interesting insights on the Municipality's future borrowing capacity. Firstly, the use of amortising loans leads to high debt service costs at the beginning of the loan, which declines steadily towards the end of the loan's term.

In summary, various financial risks could have a negative impact on the future borrowing capacity of the municipality. In particular, the continued ability of the Municipality to meet its revenue targets and ensure its forecasted cash flow targets are achieved will be critical in meeting the repayments of the debt service costs. As part of the compilation of the 2012/13 MTREF the potential of smoothing out the debt profile over the longer term will be investigated.

2.3.1.2 Safety of Capital

- The debt-to-equity ratio is a financial ratio indicating the relative proportion of equity and debt used in financing the municipality's assets. The indicator is based on the total of loans, creditors, overdraft and tax provisions as a percentage of funds and reserves
- The gearing ratio is a measure of the total long term borrowings over funds and reserves. Between 2009/10 and 2012/13 the gearing ratio peaked at 113.8 per cent. This was primarily a result of the increased borrowing levels and decreasing funds and reserves. While the gearing ratio increases to 123.6 per cent in the 2013/14 financial year

2.3.1.3 Liquidity

• Current ratio is a measure of the current assets divided by the current liabilities and as a benchmark the Municipality has set a limit of 1.2, hence at no point in time should this ratio

be less than 1.2. For the 2013/14 MTREF the current ratio is 1.4 in the 2013/14 financial year and 1.3 for the two outer years of the MTREF. Going forward it will be necessary to maintain these levels.

• The liquidity ratio is a measure of the ability of the municipality to utilize cash and cash equivalents to extinguish or retire its current liabilities immediately. Ideally the municipality should have the equivalent cash and cash equivalents on hand to meet at least the current liabilities, which should translate into a liquidity ratio of 1. Overstrand Municipality's liquidity ratio is at 0.9 per cent which includes the certain non-cash items.

• Revenue Management

 As part of the financial sustainability strategy, an aggressive revenue management framework has been implemented to increase cash inflow, not only from current billings but also from debtors that are in arrears in excess of 90 days. The intention of the strategy is to streamline the revenue value chain by ensuring accurate billing, customer service, credit control and debt collection.

2.3.1.4 Creditors Management

• The Municipality has managed to ensure that creditors are settled within the legislated 30 days of invoice. While the liquidity ratio is of concern, by applying daily cash flow management the municipality has managed to ensure a 100 per cent compliance rate to this legislative obligation. This has had a favourable impact on suppliers' perceptions of risk of doing business with the Municipality, which is expected to benefit the Municipality in the form of more competitive pricing of tenders, as suppliers compete for the Municipality's business.

2.3.1.5 Other Indicators

- The electricity distribution losses have been managed downwards from 9.3 per cent in the 2012/13 financial year to 7.12 per cent over the MTREF. The initiatives to ensure these targets are achieved include managing illegal connections and theft of electricity by rolling out smart metering systems, including prepaid meters.
- The water distribution losses have been significantly reduced from 27.4 per cent in 2009/10 to 20 per cent in 2012/13. This has been achieved with the introduction of a water leakage report and action centre. The intention is to further rollout additional depots within the Municipality to further leverage from the efficiency that the centre offers. It is planned to further reduce distribution losses from 20 per cent in 2013/14 to 18 per cent by 2013/14.
- Employee costs as a percentage of operating revenue continues to decrease over the MTREF. This is primarily owing to the high increase in bulk purchases which directly increase revenue levels, as well as increased allocation relating to operating grants and transfers.
- In real terms, repairs and maintenance has increased as part of the Municipality's strategy to ensure the management of its asset base.

2.3.2 Free Basic Services: basic social services package for indigent households

The social package assists residents that have difficulty paying for services and are registered as indigent households in terms of the Indigent Policy of the Municipality. With the exception of water, only registered indigents qualify for the free basic services.

For the 2013/14 financial year 6300 registered indigents have been provided for in the budget with this figured increasing to 6320 by 2013/14. In terms of the Municipality's indigent policy registered households are entitled to 6kl free water, 50 kwh of electricity, 6 kl sanitation and free waste removal equivalent to 85l once a week, as well as a total rebate on their property rates.

Further detail relating to the number of households receiving free basic services, the cost of free basic services, highest level of free basic services as well as the revenue cost associated with the free basic services is contained in Table 27 MBRR A10 (Basic Service Delivery Measurement) on page 38.

Note that the number of households in informal areas that receive free services and the cost of these services (e.g. the provision of water through stand pipes, water tankers, etc) are not taken into account in the table noted above.

2.3.3 Providing clean water and managing waste water

The Department of Water Affairs conducts an annual performance rating of water treatment works, presenting a Blue Drop or Green Drop award respectively to potable water treatment works and waste water treatment works that meet certain criteria of excellence.

The Municipality was awarded Blue Drop status in 2012/13, indicating that the Municipality's drinking water is of exceptional quality.

Of the 5 waste water treatment works, one was awarded Green Drop status in 2011/12, indicating that this plant consistently meet waste water treatment standards of exceptional quality. The remaining 4 plants will require renewals/upgrading to meet the minimum Green Drop certification standards. This has been prioritised as part of the 2013/14 medium term capital budget.

The following is briefly the main challenges facing the Municipality in this regard:

- The infrastructure at most of the waste water treatment works is old and insufficient to treat the increased volumes of waste water to the necessary compliance standard;
- Shortage of skilled personnel makes proper operations and maintenance difficult;
- Electrical power supply to some of the plants is often interrupted which hampers the purification processes; and
- There is a lack of proper regional catchment management, resulting in storm water entering the sewerage system.

The following are some of the steps that have been taken to address these challenges:

- Infrastructure shortcomings are being addressed through the capital budget in terms of a 5year upgrade plan:
- The filling of vacancies has commenced and the Waste Water Division will embark on an in-house training programme, especially for operational personnel;
- The Electricity Division is to install dedicated power supply lines to the plants; and
- The Division is working in consultation with the Department of Water Affairs to address catchment management.

2.4 Overview of budget related-policies

The Municipality's budgeting process is guided and governed by relevant legislation, frameworks, strategies and related policies.

2.4.1 Review of credit control and debt collection procedures/policies

The 2013/14 MTREF has been prepared on the basis of achieving an average debtors' collection rate of 95 per cent on current billings. In addition the collection of debt in excess of 90 days has been prioritised as a pertinent strategy in increasing the Municipality's cash levels. In addition, the potential of a payment incentive scheme is being investigated and if found to be viable will be incorporated into the policy.

2.4.2 Asset Management, Infrastructure Investment and Funding Policy

The Asset Management, Infrastructure and Funding Policy is considered a strategic guide in ensuring a sustainable approach to asset renewal, repairs and maintenance and is utilised as a guide to the selection and prioritisation of individual capital projects. In addition the policy prescribes the accounting and administrative policies and procedures relating to property, plant and equipment (fixed assets).

2.4.3 Budget Policy

The budget process is governed by various provisions in the MFMA and is aimed at instilling and establishing an increased level of discipline, responsibility and accountability in the financial management practices of municipalities. To ensure that the Municipality continues to deliver on its core mandate and achieves its developmental goals, the mid-year review and adjustment budget process will be utilised to ensure that underperforming functions are identified and funds redirected to performing functions.

2.4.4 Supply Chain Management Policy

The Supply Chain Management Policy was adopted by Council in 2008. An amended policy will be considered by Council in May of which the amendments will be extensively consulted on.

2.4.5 Virement Policy

The Virement Policy aims to empower senior managers with an efficient financial and budgetary amendment and control system to ensure optimum service delivery within the legislative framework of the MFMA and the Municipality's system of delegations.

2.4.6 Cash Management and Investment Policy

The aim of the policy is to ensure that the Municipality's surplus cash and investments are adequately managed, especially the funds set aside for the cash backing of certain reserves. The policy details the minimum cash and cash equivalents required at any point in time and introduces time frames to achieve certain benchmarks.

2.4.7 Tariff Policies

The Municipality's tariff policies provide a broad framework within which the Council can determine fair, transparent and affordable charges that also promote sustainable service delivery. The policies have been approved on various dates and a consolidated tariff policy is envisaged to be compiled for ease of administration and implementation of the next two years.

2.4.8 Long term Financial Planning & Implementation Policy

The Long term Financial Planning & Implementation Policy has directly informed the compilation of the 2013/14 MTREF with the emphasis on affordability and long-term sustainability. The policy dictates the approach to longer term financial modelling. The outcomes are then filtered into the budget process. The model and scenario planning outcomes are taken to Council every November and then translate into recommendations for the budget guidelines that inform the compilation of the next MTREF. One of the salient features of the policy is the emphasis on financial sustainability.

All the above policies are available on the Municipality's website, as well as the following budget related policies:

- Property Rates Policy;
- Funding and Reserves Policy;
- Borrowing Policy;
- Budget Policy; and
- Indigent Policy.

2.5 Overview of budget assumptions

2.5.1 External factors

Owing to the economic slowdown, financial resources are limited due to reduced payment levels by consumers. This has resulted in declining cash inflows, which has necessitated restrained expenditure to ensure that cash outflows remain within the affordability parameters of the Municipality's finances.

2.5.2 General inflation outlook and its impact on the municipal activities

There are five key factors that have been taken into consideration in the compilation of the 2013/14 MTREF:

- National Government macro economic targets;
- The general inflationary outlook and the impact on Municipality's residents and businesses;
- The impact of municipal cost drivers;
- The increase in prices for bulk electricity and water; and
- The increase in the cost of remuneration. Employee related costs comprise 30.2 per cent of total operating expenditure in the 2013/14 MTREF and therefore this increase above inflation places a disproportionate upward pressure on the expenditure budget

2.5.3 Credit rating outlook

Refer to Overstrand Municipality's Borrowing & Investment Policy

2.5.4 Interest rates for borrowing and investment of funds

The MFMA specifies that borrowing can only be utilised to fund capital or refinancing of borrowing in certain conditions. The Municipality engages in a number of financing arrangements to minimise its interest rate costs and risk. However, for simplicity the 2013/14 MTREF is based on the assumption that all borrowings are undertaken using fixed interest rates for amortisation-style loans requiring both regular principal and interest payments. As part of the compilation of the 2012/13 MTREF the potential of smoothing out the debt profile over the long term will be investigated.

2.5.5 Collection rate for revenue services

The base assumption is that tariff and rating increases will increase at a rate slightly higher that CPI over the long term. It is also assumed that current economic conditions, and relatively controlled inflationary conditions, will continue for the forecasted term.

The rate of revenue collection is currently expressed as a percentage (97 per cent) of annual billings. Cash flow is assumed to be 95 per cent of billings, plus an increased collection of arrear debt from the revised collection and credit control policy. The performance of arrear collections will however only be considered a source of additional cash in-flow once the performance has been carefully monitored.

2.5.6 Growth or decline in tax base of the municipality

Debtors revenue is assumed to increase at a rate that is influenced by the consumer debtors collection rate, tariff/rate pricing, real growth rate of the Municipality, household formation growth rate and the poor household change rate.

Household formation is the key factor in measuring municipal revenue and expenditure growth, as servicing 'households' is a greater municipal service factor than servicing individuals. Household formation rates are assumed to convert to household dwellings. In addition the change in the number of poor households influences the net revenue benefit derived from household formation growth, as it assumes that the same costs incurred for servicing the household exist, but that no consumer revenue is derived as the 'poor household' limits consumption to the level of free basic services.

2.5.7 Salary increases

The collective agreement regarding salaries/wages came into operation on 01 July 2012 and shall remain in force until 30 June 2015.

2.5.8 Impact of national, provincial and local policies

Integration of service delivery between national, provincial and local government is critical to ensure focussed service delivery and in this regard various measures were implemented to align IDPs, provincial and national strategies around priority spatial interventions. In this regard, the following national priorities form the basis of all integration initiatives:

- Creating jobs;
- Enhancing education and skill development;
- Improving Health services;
- Rural development and agriculture; and
- Fighting crime and corruption.

To achieve these priorities integration mechanisms are in place to ensure integrated planning and execution of various development programs. The focus will be to strengthen the link between policy priorities and expenditure thereby ensuring the achievement of the national, provincial and local objectives.

2.5.9 Ability of the municipality to spend and deliver on the programmes

It is estimated that a spending rate of at least 98 per cent is achieved on operating expenditure and 94 per cent on the capital programme for the 2013/14 MTREF of which performance has been factored into the cash flow budget.

2.6 Overview of budget funding

2.6.1 Medium-term outlook: operating revenue

The following table is a breakdown of the operating revenue over the medium-term:

Table 33 Breakdown of the operating revenue over the medium-term

		Medium Term Reenditure Frame	
Description	Budget Year 2013/14	Budget Year +1 2014/15	Budget Year +2 2015/16
R thousands			
Financial Performance	132 644	140 918	149 132
Property rates	497 549	535 775	573 519
Service charges	7 714	7 714	7 714
Investment revenue	68 984	55 324	72 061
Transfers recognised - operational	41 141	43 822	46 218
Other own revenue	748 031	783 552	848 644

The following graph is a breakdown of the operational revenue per main category for the 2013/14 financial year.

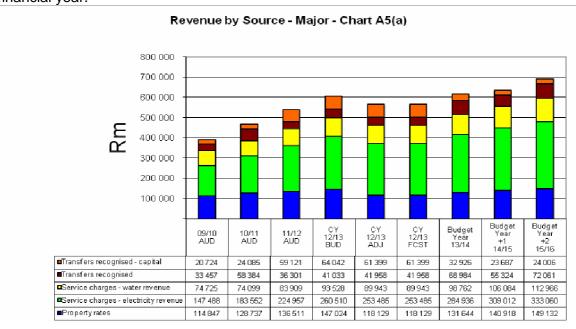

Figure 6 Breakdown of operating revenue over the 2013/14 MTREF

Tariff setting plays a major role in ensuring desired levels of revenue. Getting tariffs right assists in the compilation of a credible and funded budget. The Municipality derives most of its operational revenue from the provision of goods and services such as water, electricity, sanitation and solid waste removal. Property rates, operating and capital grants from organs of state and other minor charges (such as building plan fees, licenses and permits etc).

The revenue strategy is a function of key components such as:

- Growth in the municipality and economic development;
- Revenue management and enhancement;
- Achievement of a 95 per cent annual collection rate for consumer revenue;
- National Treasury guidelines;
- Electricity tariff increases within the National Electricity Regulator of South Africa (NERSA) approval;
- Achievement of full cost recovery of specific user charges;
- Determining tariff escalation rate by establishing/calculating revenue requirements;
- The Property Rates Policy in terms of the Municipal Property Rates Act, 2004 (Act 6 of 2004) (MPRA), and
- And the ability to extend new services and obtain cost recovery levels.

The above principles guide the annual increase in the tariffs charged to the consumers and the ratepayers aligned to the economic forecasts.

The proposed tariff increases for the 2013/14 MTREF on the different revenue categories are:

Table 34 Proposed tariff increases over the medium-term

Refer to Annexure B for Tariffs increases

Revenue to be generated from property rates is R118 129 million in the 2012/13 financial year and increases to R131.644 million by 2013/14 which represents 17.6 per cent of the operating revenue base of the Municipality. It remains relatively constant over the medium-term. With the implementation of the Municipal Property Rates Act the basis of rating significantly changed.

As the levying of property rates is considered a strategic revenue source a further supplementary valuation process will be undertaken in the 2nd quarter of the 2013/14 financial year. The outcome of this initiative will be closely monitored and reported on a regular basis as part of the quarterly performance reporting.

Services charges relating to electricity, water, sanitation and refuse removal constitutes the biggest component of the revenue basket of the Municipality totalling R447 228 million for the 2012/13 financial year and increasing to R497 549 million by 2013/14. For the 2013/14 financial year services charges amount to 66.5 per cent of the total revenue base.

Operational grants and subsidies amount to R68 984 million, R55 324 million and R72 061 million for each of the respective financial years of the MTREF.

The tables below provide detail investment information and investment particulars by maturity.

For the medium-term, the funding strategy has been informed directly by ensuring financial sustainability and continuity. The surplus is intended to partly fund capital expenditure from own sources as well as ensure adequate cash backing of reserves and funds.

2.6.2 Medium-term outlook: capital revenue

The following table is a breakdown of the funding composition of the 2013/14 medium-term capital programme:

Table 37 Sources of capital revenue over the MTREF

				Medium Term Re enditure Framew	
		Adjusted Budget	Budget Year 2013/14	Budget Year +1 2014/15	Budget Year +2 2015/16

Total Capital Funding	7	167 500	104 681	69 756	75 208

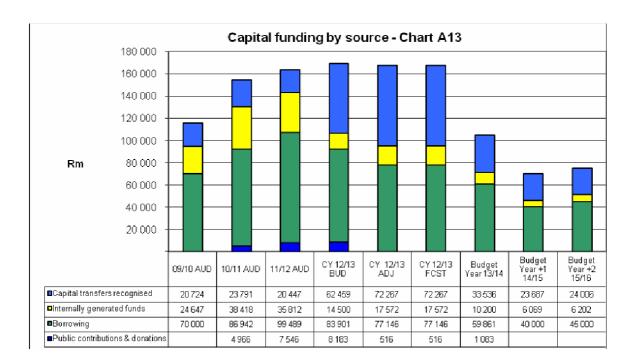

Figure 7 Sources of capital revenue for the 2013/14 financial year

Capital grants and receipts equates to 34 per cent of the total funding source which represents R33 536 million for the 2013/14

Borrowing still remains a significant funding source for the capital programme over the medium-term with an estimated R59 861 million. As explained earlier, the borrowing capacity of the Municipality has essentially reached its limits and going forward borrowing limits will remain constant.

The following table is a detailed analysis of the Municipality's borrowing liability.

Table 38 MBRR Table SA 17 - Detail of borrowings

Figure 8 Growth in outstanding borrowing (long-term liabilities)

Internally generated funds consist of a mixture between surpluses generated on the operating statement of financial performance and cash backed reserves. In determining the credibility of this funding source it becomes necessary to review the cash flow budget as well as the cash backed reserves and accumulated funds reconciliation, as discussed below. Internally generated funds consist of R17 572 million in 2012/13, R10 200m in 2013/14 and R6 069 million in 2014/15.

2.6.3 Cash Flow Management

Cash flow management and forecasting is a critical step in determining if the budget is funded over the medium-term. The table below is consistent with international standards of good financial management practice and also improves understandability for councillors and management. Some specific features include:

- Clear separation of receipts and payments within each cash flow category;
- Clear separation of capital and operating receipts from government, which also enables cash from 'Ratepayers and other' to be provide for as cash inflow based on actual performance. In other words the actual collection rate of billed revenue., and
- Separation of borrowing and loan repayments (no set-off), to assist with MFMA compliance assessment regarding the use of long term borrowing (debt).

NET INCREASE/ (DECREASE) IN CASH HELD	17 763	40 380	56 696	(14 500)	(25 181)	(35 181)	(7 317)	4 665	6 127
Cash/cash equivalents at the year begin:	11 860	29 623	70 004	102 146	126 699	126 699	91 518	84 202	88 867
Cash/cash equivalents at the year end:	29 623	70 004	126 699	87 646	101 518	91 518	84 202	88 867	94 994

The above table shows that cash and cash equivalents of the Municipality increased between the 2009/10 and 2012/13 financial year. With the 2012/13 adjustments budget various cost efficiencies and savings had to be realised to ensure the Municipality could meet its operational expenditure commitments. For the 2013/14 MTREF the budget has been prepared to ensure high levels of cash and cash equivalents over the medium-term with cash levels anticipated to exceed R80 million by 2013/14 and steadily increasing to R90 million by 2015/16.

2.6.4 Cash Backed Reserves/Accumulated Surplus Reconciliation

This following table meets the requirements of MFMA Circular 42 which deals with the funding of a municipal budget in accordance with sections 18 and 19 of the MFMA. The table seeks to answer three key questions regarding the use and availability of cash:

- What are the predicted cash and investments that are available at the end of the budget vear?
- How are those funds used?
- What is the net funds available or funding shortfall?

A surplus would indicate the cash-backed accumulated surplus that was/is available. A shortfall (applications > cash and investments) is indicative of non-compliance with section 18 of the MFMA requirement that the municipality's budget must be 'funded'. Non-compliance with section 18 is assumed because a shortfall would indirectly indicate that the annual budget is not appropriately funded (budgeted spending is greater than funds available or to be collected). It is also important to analyse trends to understand the consequences, e.g. the budget year might indicate a small surplus situation, which in itself is an appropriate outcome, but if in prior years there were much larger surpluses then this negative trend may be a concern that requires closer examination.

Table 41 MBRR Table A8 - Cash backed reserves/accumulated surplus reconciliation

Description	2009/10	2010/11	2011/12	Cur	rent Year 201	2/13		ledium Term Revenue & enditure Framework

Other provisions										
Long term investments committed	2 632	1 262	5 691	11 020	11 020	11 020	16 379	21 791	27 245	
Reserves to be backed by cash/investments										
Total Application of cash and investments:	(6 893)	3 437	22 834	1 230	(14 212)	4 349	(5 905)	(72)	2 680	
Surplus(shortfall)	39 148	67 829	109 556	97 436	126 751	98 189	106 486	110 729	119 559	

From the above table it can be seen that the cash and investments available total R102 5 million in the 2012/13 financial year and decrease to R100.5 million by 2013/14, including the projected cash and cash equivalents as determined in the cash flow forecast. The following is a breakdown of the application of this funding:

- Unspent conditional transfers (grants) are automatically assumed to be an obligation as the municipality has received government transfers in advance of meeting the conditions. Ordinarily, unless there are special circumstances, the municipality is obligated to return unspent conditional grant funds to the national revenue fund at the end of the financial year. In the past these have been allowed to 'roll-over' and be spent in the ordinary course of business, but this practice has been discontinued. During the 2012/13 financial year the municipality was required to supply National Treasury with a detailed analysis of the unspent grants as well as an action plan of spending the grants.
- There is unspent borrowing from the previous financial years. In terms of the municipality's Borrowing and Investments Policy, borrowings are only drawn down once the expenditure has been incurred against the particular project. Unspent borrowing is ring-fenced and reconciled on a monthly basis to ensure no unnecessary liabilities are incurred.
- Provisions for statutory requirements include VAT owing to timing differences resulting from year- end obligations.
- The main purpose of other working capital is to ensure that sufficient funds are available to meet obligations as they fall due. A key challenge is often the mismatch between the timing of receipts of funds from debtors and payments due to employees and creditors. High

levels of debtor non-payment and receipt delays will have a greater requirement for working capital, as was experienced by the Municipality in 2012/13 resulting in cash flow challenges. For the purpose of the cash backed reserves and accumulated surplus reconciliation a provision equivalent to one month's operational expenditure has been provided for. It needs to be noted that although this can be considered prudent, the desired cash levels should be 60 days to ensure continued liquidity of the municipality. Any underperformance in relation to collections could place upward pressure on the ability of the Municipality to meet its creditor obligations.

- Long term investments consist primarily of the sinking funds for the repayment of a future borrowings. The sinking fund value is held within long term investments and must be 'held to maturity' and is not available for spending.
- Most reserve fund cash-backing is discretionary in nature, but the reserve funds are not available to support a budget unless they are cash-backed. The reserve funds are not fully cash-backed. The level of cash-backing is directly informed by the municipality's cash backing policy. These include the rehabilitation of landfill sites and quarries.

It can be concluded that the Municipality has a surplus of R98,2m against the cash backed and accumulated surpluses reconciliation. When considering the funding requirements of section 18 and 19 of the MFMA, it needs to be noted that for all practical purposes the 2012/13 MTREF was funded as Council approved an amount of R6,6m generated from accumulated surplus during 2011/2012 to fund the cash shortfall from the 2012/2013 adjustments budget. From a pure cash flow perspective (cash out flow versus cash inflow) the budget is funded and is therefore credible. The challenge for the Municipality will be to ensure that the underlying planning and cash flow assumptions are meticulously managed, especially the performance against the collection rate.

2.6.5 Funding compliance measurement

National Treasury requires that the municipality assess its financial sustainability against fourteen different measures that look at various aspects of the financial health of the municipality. These measures are contained in the following table. All the information comes directly from the annual budgeted statements of financial performance, financial position and cash flows. The funding compliance measurement table essentially measures the degree to which the proposed budget complies with the funding requirements of the MFMA. Each of the measures is discussed below.

Table 42 MBRR SA10 – Funding compliance measurement

2.6.5.1 Cash/cash equivalent position

The Municipality's forecast cash position was discussed as part of the budgeted cash flow statement. A 'positive' cash position, for each year of the MTREF would generally be a minimum requirement, subject to the planned application of these funds such as cash-backing of reserves and working capital requirements.

If the municipality's forecast cash position is negative, for any year of the medium term budget, the budget is very unlikely to meet MFMA requirements or be sustainable and could indicate a risk of non-compliance with section 45 of the MFMA which deals with the repayment of short term debt at the end of the financial year. The forecasted cash and cash equivalents for the 2013/14 MTREF shows R84 202 million, R88 867 million and R94 994 million for each respective financial year.

2.6.5.2 Cash plus investments less application of funds

The purpose of this measure is to understand how the municipality has applied the available cash and investments as identified in the budgeted cash flow statement. The detail reconciliation of the cash backed reserves/surpluses is contained in Table 24, on page 32. The reconciliation is

intended to be a relatively simple methodology for understanding the budgeted amount of cash and investments available with any planned or required applications to be made. This has been extensively discussed above.

2.6.5.3 Monthly average payments covered by cash or cash equivalents

The purpose of this measure is to understand the level of financial risk should the municipality be under stress from a collection and cash in-flow perspective. Regardless of the annual cash position an evaluation should be made of the ability of the Municipality to meet monthly payments as and when they fall due. It is especially important to consider the position should the municipality be faced with an unexpected disaster that threatens revenue collection such as rate boycotts. Notably, the ratio has been climbing significantly for the period 2009/10 to 2013/14, moving from 1.1 to 1.5 with the adopted 2012/13 MTREF. As indicated above the Municipality aims to achieve at least one month's cash coverage in the medium term, and then gradually move towards two months coverage. This measure will have to be carefully monitored going forward.

2.6.5.4 Surplus/deficit excluding depreciation offsets

The main purpose of this measure is to understand if the revenue levels are sufficient to conclude that the community is making a sufficient contribution for the municipal resources consumed each year. An 'adjusted' surplus/deficit is achieved by offsetting the amount of depreciation related to externally funded assets. Municipalities need to assess the result of this calculation taking into consideration its own circumstances and levels of backlogs. If the outcome is a deficit, it may indicate that rates and service charges are insufficient to ensure that the community is making a sufficient contribution toward the economic benefits they are consuming over the medium term. For the 2013/14 MTREF the indicative outcome is a surplus of R7 million, R6 million and R7 million.

It needs to be noted that a surplus does not necessarily mean that the budget is funded from a cash flow perspective and the first two measures in the table are therefore critical.

2.6.5.5 Property Rates/service charge revenue as a percentage increase less macro inflation target. The purpose of this measure is to understand whether the municipality is contributing appropriately to the achievement of national inflation targets. This measure is based on the increase in 'revenue', which will include both the change in the tariff as well as any assumption about real growth such as new property development, services consumption growth etc.

The factor is calculated by deducting the maximum macro-economic inflation target increase (which is currently 3 - 6 per cent). Refer to Annexure B for Tariff List and Increases.

Cash receipts as a percentage of ratepayer and other revenue

This factor is a macro measure of the rate at which funds are 'collected'. This measure is intended to analyse the underlying assumed collection rate for the MTREF to determine the relevance and credibility of the budget assumptions contained in the budget. It can be seen that the outcome is at 98.5, 99.2 and 99.1 per cent for each of the respective financial years. Given that the assumed collection rate was based on a 95 per cent performance target, the cash flow statement has been conservatively determined. This measure and performance objective will have to be meticulously managed. Should performance with the mid-year review and adjustments be positive in relation to actual collections of billed revenue, the adjustments budget will be amended accordingly.

2.6.5.6 Debt impairment expense as a percentage of billable revenue

Overstrand Municipality does not provide for Debt impairment under the Financial performance as the methodology for determining the provision for debt impairment will result in a decrease in the provision.

2.6.5.7 Capital payments percentage of capital expenditure

The purpose of this measure is to determine whether the timing of payments has been taken into consideration when forecasting the cash position. The municipality aims to keep this as low as possible through strict compliance with the legislative requirement that creditors be paid within 30 days.

2.6.5.8 Borrowing as a percentage of capital expenditure (excluding transfers, grants and contributions)

The purpose of this measurement is to determine the proportion of a municipality's 'own-funded' capital expenditure budget that is being funded from borrowed funds to confirm MFMA compliance. Externally funded expenditure (by transfers/grants and contributions) has been be excluded. It can be seen that borrowing equates to 57.2, 57.3 and 59.8 per cent of own funded capital.

Transfers/grants revenue as a percentage of Government transfers/grants available

The purpose of this measurement is mainly to ensure that all available transfers from national and provincial government have been budgeted for. A percentage less than 100 per cent could indicate that not all grants as contained in the Division of Revenue Act (DoRA) have been budgeted for. The Municipality has budgeted for all transfers.

2.6.5.9 Consumer debtors change (Current and Non-current)

The purpose of these measures are to ascertain whether budgeted reductions in outstanding debtors are realistic. There are 2 measures shown for this factor; the change in current debtors and the change in long term receivables, both from the Budgeted Financial Position.

2.6.5.10 Repairs and maintenance expenditure level

This measure must be considered important within the context of the funding measures criteria because a trend that indicates insufficient funds are being committed to asset repair could also indicate that the overall budget is not credible and/or sustainable in the medium to long term because the revenue budget is not being protected. Details of the Municipality's strategy pertaining to asset management and repairs and maintenance is contained in Table 60 MBRR SA34C on page 87.

2.6.5.11 Asset renewal/rehabilitation expenditure level

This measure has a similar objective to aforementioned objective relating to repairs and maintenance. A requirement of the detailed capital budget (since MFMA Circular 28 which was issued in December 2005) is to categorise each capital project as a new asset or a renewal/rehabilitation project. The objective is to summarise and understand the proportion of budgets being provided for new assets and also asset sustainability. A declining or low level of renewal funding may indicate that a budget is not credible and/or sustainable and future revenue is not being protected, similar to the justification for 'repairs and maintenance' budgets. Further details in this regard are contained in Table 59 MBRR SA34b on page 86.

2.10 Annual budgets and SDBIPs – internal departments

The Draft SDBIP will be tabled at the Council meeting to be held on 27 March 2013.

2.11 Contracts having future budgetary implications

In terms of the Municipality's Supply Chain Management Policy, no contracts are awarded beyond the medium-term revenue and expenditure framework (three years). In ensuring adherence to this contractual time frame limitation, all reports submitted to either the Bid Evaluation and Adjudication Committees must obtain formal financial comments from the Financial Management Division of the Treasury Department.

2.12 Capital expenditure details

The following three tables present details of the Municipality's capital expenditure programme, firstly on new assets, then the renewal of assets and finally on the repair and maintenance of assets.

2.13 Legislation compliance status

Compliance with the MFMA implementation requirements have been substantially adhered to through the following activities:

1. In year reporting

Reporting to National Treasury in electronic format was fully complied with on a monthly basis. Section 71 reporting to the Executive Mayor (within 10 working days) has progressively improved and includes monthly published financial performance on the Municipality's website.

2. Internship programme

The Municipality is participating in the Municipal Financial Management Internship programme and has employed two interns undergoing training in ICT Department

3. Budget and Treasury Office

The Budget and Treasury Office has been established in accordance with the MFMA.

4. Audit Committee

An Audit Committee has been established and is fully functional.

5. Service Delivery and Implementation Plan

The detail SDBIP document is at a draft stage and will be finalised after approval of the 2013/14 MTREF in May 2013 directly aligned and informed by the 2013/14 MTREF.

6. Annual Report

Annual report is compiled in terms of the MFMA and National Treasury requirements.

7. MFMA Training

The MFMA training module in electronic format is presented at the Municipality's internal centre and training is ongoing.

8. Policies

All budget related policies have been reviewed and will be distributed together with the Draft budget for 2013/2014 for public participation during April 2013.

Exemptions 2013/14 Draft Budget

EXEMPTIONS FROM PROPERTY RATES (Rates Policy)

Religious Organizations	A property registered in the name of and used primarily as a place of public worship by a religious organization/community, including an official residence registered in the name of that organization/community which is occupied by an office bearer who officiates at services at that place of worship in terms of section 17(1)(i) of the MPRA.
Health and welfare institutions	Properties used exclusively as a hospital, clinic, mental hospital, orphanage, non-profit retirement village, old age home or benevolent institution, including workshops used by the inmates, laundry or cafeteria facilities, provided that any profits from the use of the property are used entirely for the benefit of the institution and/or to charitable purposes within the boundaries of Overstrand Municipality.
Private schools and Educational Institutions	Property used by registered private schools for educational purposes only
Charitable institutions	Properties belonging to not-for-gain institutions or organizations that perform charitable work.
Sporting bodies	Property used by an organization whose sole purpose is to use the property for sporting purposes, for gain or not. Assistance to professional sporting organizations may differ from that afforded to amateur bodies. The rebate will be award at the sole discretion of council on an annual basis.
Agricultural societies	Property belonging to agricultural societies affiliated to the SA Agricultural Union used for the purposes of the society.
Cultural institutions	Properties declared in terms of the Cultural Institutions Act, Act 29 of 1969 or the Cultural Institutions Act, Act 66 of 1989.
Museums, libraries, art galleries and botanical gardens	Registered in the name of private persons, open to the public and not operated for gain.
Youth development organizations	Property owned and/or used by organizations such as the Boy Scouts, Girls Guides, Voortrekkers or organizations the Council deems to be similar.
Animal protection	Property owned or used by institutions/organizations whose exclusive aim is to protect birds, reptiles and animals on a not-for-gain basis.

OVERSTRAND MUNICIPALITY DEVELOPMENT CONTRIBUTION POLICY 2013/14

(Attachment to the Tariff Schedule)

- 1. The developer will be responsible for the payment of development contributions in accordance with the relevant legislation and as determined by Council. The calculation methodology as listed below will generally be used as a guideline to determine the development contributions. The Council may deviate from this guideline in accordance with the relevant legislation particularly where large developments with significant impact on services are being processed. The developer may be required by the council to provide bulk services in lieu or in part of the payment of development contributions. The Council may revise the Development Contribution Policy at any stage.
- 2. Gap Housing: Municipal land made available by the Municipality for the purposes of housing specific with reference to the GAP market for households with an income between R 3501 R 18 000 per month.

Gap Housing

50% of Standard

- 3. Government Subsidised Housing: Low Cost Housing Projects funded by the Department of Human Settlements.
 - Government Subsidised Housing

0% Development Contribution

4. High Density Units: High and Medium density Residential Developments for example flats, town houses, retirement units, etc.

High Density Units up to 2 bed rooms (R/Unit) Standard 50% of

➤ High Density Units more than 2 bed rooms (R/Unit)

75% of

Standard

- 5. Second Dwellings
 - ➤ No development contribution will be applicable as long as the normal standard water, electricity and sewerage connections for single units are used. If upgraded connections are required, the normal development contributions listed in paragraph 6 below will be applicable.
- 6. Tariffs
- 6.1 Water: Standard Fee per equivalent unit

Key focus areas for the 2013/14 budget process

The Medium Term Budget Policy Statement 2012 notes that the South African economy is projected to grow by 2.5 per cent in 2012. By 2014 GDP growth is expected to reach 3.8 per cent, supported by expanding public sector investment in infrastructure, the activation of new electricity-generating capacity, improving public sector confidence, relatively low inflation and interest rates and strong growth in the Southern African region.

Specific interventions to achieve this include: investing in strategic infrastructure programmes, including electricity generation and transport capacity needed to open up new mining and industrial opportunities. Linked to this is strengthening municipal finances and investing in residential development and urban infrastructure.

The proposed spending framework approved by Cabinet takes account of the need to control spending growth over the medium term while increasing the efficiency of existing allocations to improve public services. As a result, the fiscus does not increase available funds beyond the 2012 budget baseline.

The labour market has deteriorated. The official unemployment rate rose to 25.5 per cent of the labour force in the third quarter of 2012 from 24.9 per cent in the second quarter according to the latest Quarterly Labour Force Survey. The total number of unemployed people stood at 4.67 million in the three months up to September, from 4.47 million in the second quarter. By the expanded definition of unemployment (including those who have stopped looking for work) unemployment increased to 36.3 per cent, from 36.2 per cent.

Consequently, municipal revenues and cash flows are expected to remain under pressure in 2013/14 and so municipalities must adopt a conservative approach when projecting their expected revenues and cash receipts. Municipalities will have to carefully consider affordability of tariff increases especially as it relates to domestic consumers while considering the level of services versus the associated cost. Municipalities should also pay particular attention to managing revenue effectively and carefully evaluate all spending decisions. In generating capacity for spending on key municipal infrastructure municipalities will have to identify inefficiencies and eliminate non-priority spending.

National priority – Expanding public sector investment in infrastructure

The key priorities in the local government and housing function are the provision of basic services such as water and sanitation, human settlements development and local government infrastructure.

In addition, creating decent employment opportunities remains a national priority. In drafting their 2013/14 budgets and MTREFs all municipalities are urged to continue to explore opportunities to mainstream labour intensive approaches to delivering services, and more particularly to participate fully in the Expanded Public Works Programme. In this regard the Expanded Public Works Programme Grant (EPWP) has been reconfigured in the 2012/13 financial year to be a schedule 6 grant. Municipalities are required to reflect the EPWP allocation in their budget because the gazetted amounts of the programme will flow directly into their primary bank accounts. Municipalities should budget for the grant in the same way as it budgets for all other schedule 6 conditional grants. Allocations are based on past performance on the EPWP, potential to create work using baseline allocations, need for employment creation in their area and an adjustment factor for rural municipalities.

Municipalities should not just employ more people without any reference to the level of staffing required to deliver effective services, remuneration increases associated with bargaining

council decisions and what is financially sustainable over the medium term. The municipality ought to focus on maximizing its contribution to job creation by:

- Ensuring that service delivery and capital projects use labour intensive methods wherever appropriate;
- Ensuring that service providers use labour intensive approaches;
- Supporting labour intensive LED projects;
- Participating fully in the Expanded Public Works Programme; and
- Implementing interns programmes to provide young people with on-the-job training.

Municipalities also play a critical role in creating an enabling environment for investments and other activities that lead to job creation. It is important for municipalities to pay particular attention to:

- Ensuring the timely delivery of their capital programmes (eliminate under-spending of capital budgets) and to review all by-laws and development approval processes with a view to removing any regulatory bottlenecks to investment and job creation; and
- Act as a catalyst for local economic development by appropriately structuring capital
 programmes to address backlog eradication, asset renewal and development of new
 infrastructure; this will require carefully formulating the funding mix of the capital
 programme to include grants, borrowing and own funding (internally generated
 funding).

Image of Local Government

The Local Government Budgets and Expenditure Review highlighted the burgeoning crisis in the declining credibility of local government. Public perception at this time, as measured through various monitors and surveys reflected high levels of disenchantment with service delivery and perceived corruption at municipalities. Recent gauges of public opinion, evident in the outcome of recent surveys on corruption and fraud in government and increases in service delivery protests countrywide, confirm that this negative perception of local government persists.

In the medium to long term, these perceptions will improve as service delivery improves. In the short term, municipalities must demonstrate sound leadership and put in place measures to address mismanagement by implementing effective systems to measure, monitor and evaluate performance.

Procurement reforms and fighting corruption

Municipalities are again advised that the Supply Chain Compliance Unit will also be focusing on municipal procurement processes. Consequently, municipalities can expect requests for information relating to their tender committees and processes, as well as specific tenders and contracts. Key performance areas of this unit will include:

- The modernisation of the state procurement system to be in line with the prescripts of the Constitution:
- Ensure transparent use of resources for improved service delivery; and
- Exercise sound stewardship of government assets and resources.

Measures to counter supply chain management related fraud and corruption include preventative and enforcement measures. Measures will focus on, among others:

- Enhancing regulatory measures and compliance monitoring;
- Strengthening oversight;
- Further procurement reforms:
- Enforcement of the procurement of goods and services that are available in terms of Transversal Term Contracts;
- Consider the introduction of measures to evaluate the integrity and correctness on all major contracts;
- Strengthening the monitoring function of the provincial treasuries;
- Enforce the code of conduct/ethics in supply chain management for practitioners and bid committee members;
- Publication of all tender awards;
- Price benchmarking;
- Encourage the enforcement of remedial actions (penalties, litigations, restrictions etc.) on all suppliers that act fraudulently; and
- Refinement to the register for tender defaulters and the database of restricted supplies which must be checked prior to awarding of contracts in order to ensure that no restricted companies are awarded contracts.

To this end the Supply Chain Management regulatory framework will be reviewed and updated. Municipalities are also encouraged to introduce greater transparency to municipal supply chain processes by publishing SCM process outcomes for each bid on their websites.

Taking the 2011 Local Government Budgets and Expenditure Review forward

One of the key outputs for National Treasury is the biennial production of the "Local Government Budgets and Expenditure Review". The purpose of such a review as suggested by the title is to highlight over a seven year period the trends in local government budgets and expenditure according to certain strategic and thematic areas. This enables National Treasury and other users of the publication, such as Parliament, to measure progress made by local government in the fulfilment of its mandate while at the same time highlighting those areas where challenges still exist.

In September 2011, National Treasury published the "Local Government Budgets and Expenditure Review". Municipalities are urged to work through the document as part of their preparations for drafting their 2013/14 budgets and MTREF's.

The Review highlights the following areas as requiring particular attention by municipalities:

i. **Revenue management** – To ensure the collection of revenues, municipalities need to ensure that billing systems are accurate, send out accounts to residents and follow up to collect revenues owed. Municipalities are urged to take note of MFMA Circular No. 64 - Revenue Management, in the preparation of the 2013/14 budgets and MTREF's. The Circular can be accessed at:

http://mfma.treasury.gov.za/Circulars/Pages/default.aspx

- ii. **Collecting outstanding debts** This requires political commitment, sufficient administrative capacity, and pricing policies that ensure that bills are accurate and affordable.
- iii. **Pricing services correctly** The full cost of services should be reflected in the price charged to residents who can afford to pay. Many municipalities offer overly generous subsidies and rebates that result in services being run at a loss, resulting in funds being diverted away from other priorities.

- iv. **Underspending on repairs and maintenance** Often seen as a way to reduce spending in the short term, underspending on maintenance can shorten the life of assets, increase long-term maintenance and refurbishment costs, and cause a deterioration in the reliability of services.
- v. **Spending on non-priorities** Many municipalities spend significant amounts on non-priority items including unnecessary travel, luxury furnishings, excessive catering and unwarranted public relations projects. Consultants are often used to perform routine tasks. Considering the pressurised economic climate continued spending on non-priority wants cannot be sustained.

The 2011 Local Government Budgets and Expenditure Review can be accessed at:

http://www.treasury.gov.za/publications/igfr/2011/lg/default.aspx

In line with the biennial nature of the publication, the next "Local Government Budgets and Expenditure Review" is scheduled for release towards the latter half of 2013. In the lead up to this publication, National Treasury needs to ensure that the database used to compile the review is updated and reflective of the latest available audited financial information for local government. National Treasury requires the assistance of municipalities to ensure that the information in respect of your municipality is correctly reflected in the LG database. Should any errors be detected, kindly update the information.

In addition, during the preparation of the publication, National Treasury will also be sending out several ad-hoc requests for information. National Treasury kindly requests your cooperation by ensuring that you provide the relevant information within the required timeframes. In the previous publication, the cooperation received from municipalities was generally positive and we hope that this can be sustained in the lead up to the 2013 publication.

Lastly, the database used in the compilation of the previous Local Government Budget and Expenditure Publications contained information at a very high level limiting the extent of the analysis that needs to be undertaken. In the 2013 publication, National Treasury will be aligning the database to the Municipal Budget and Reporting Regulation formats to improve the analysis with the relevant budgeting framework; improving the level of analysis.

All updating of information will need to be completed by the end of March 2013. The equivalent of the budget verification process will have to be completed by the end of March 2013 by focusing on the audited annual financial statements for 2006/07, 2007/08, 2008/09, 2009/10, 2010/11 and 2011/12. All previous year's figures should also be corrected and perfectly aligned to the audited financial statements of the municipality; this must include any restatement of figures. This process will assist municipalities in the compilation of their 2013/14 budgets and MTREF's as the audited actuals figures will provide a historical performance perspective; a valuable management planning and budgeting tool.

As a start it will assist if all outstanding input forms are lodged as matter of urgency with the LG database in support of the AFS (OSAA, CAAA, BSA and CFAA). This should ideally be done by the 14 December 2012. Once we have received all the inputs forms from all municipalities, the national and provincial treasuries will reconcile the information and provide municipalities with feedback by 10 January 2013. Municipalities will then have until 31 January 2013 to correct and resubmit the revised information to the LG database. MM's and CFO's will be requested to sign off on the revised numbers by 28 February 2013. The National treasury will then correct the dataset taking into account the demarcation process to reclassify the historical numbers and finally lock the financial database on 20 March 2013.

It is recommended that an official be permanently dedicated and assigned to this process to avoid a repetition of the challenges experienced with the previous budget verification process.

Local government equitable share formula review and 2011 Census

Local government's equitable share of nationally raised revenue is distributed between the country's 278 municipalities by means of a formula. This formula has been reviewed by the National Treasury, the Department of Cooperative Governance and the South African Local Government Association, with assistance from the Financial and Fiscal Commission and Statistics South Africa. The proposed structure of a new formula has been endorsed by the Budget Forum – the Budget Forum is the formal structure through which local government finance issues are consulted on as part of the national budget process. The Budget Forum is chaired by the Minister of Finance and includes SALGA and the MECs for Finance of the nine provinces.

The formula review process has included two rounds of consultations with municipalities, as well as the circulation of three discussion papers which can be accessed at:

http://mfma.treasury.gov.za/Media Releases/LGESDiscussions/Pages/default.aspx

The formula will provide a subsidy for the provision of free basic water, electricity, sanitation and refuse removal services for every poor household. The formula will also provide funds for the institutional costs of municipalities and, for the first time, will explicitly allocate funds for non-trading services, such as municipal roads and fire services. To ensure that the funds for institutional costs and non-trading services are targeted at poorer municipalities, the proposed formula will apply a revenue-adjustment factor reflecting municipalities' ability to generate their own revenue.

The formula will use data from the 2011 Census and will be updated annually to reflect estimates of population growth and projected increases in the cost of services such as water and electricity. The formula will also include explicit funding for the maintenance of basic services funded through the equitable share.

Details of the new formula are being finalised to take into account inputs received from municipalities. The final formula will be presented as part of the Division of Revenue Bill tabled with the national budget on 27 February 2013.

Impact of the new formula on municipal budgets

The new formula will use data from the 2011 Census that will reflect substantial changes since the 2001 Census which was the source of most of the data used in the current equitable share formula. The change to the formula as well as the updating of the data will both result in changes to the allocations to individual municipalities.

In order to provide predictability and stability in equitable share allocations, national government provides a guarantee that municipalities will receive at least 90 per cent of the allocation for 2013/14 published in the 2012 Division of Revenue Bill. In addition to this guaranteed minimum, the new equitable share allocations will also be phased in over a period of three to five years to provide municipalities time to absorb adjustments to allocations.

The detailed structure of the formula, as well as the phase-in process for the new allocations will be agreed to at a meeting of the Budget Forum in January 2013. Providing predictability and stability is one of the principles agreed to in the development of the new formula. The phase-in process for the new allocations will therefore be designed to minimize any instability and disruptions caused by the changes to the equitable share formula.

Municipalities are therefore advised to take a conservative approach in the compilation of their 'tabled' 2013/14 MTREF's pending finalisation of the allocations as part of the 2013 Division of Revenue Bill tabled with the national budget on 27 February 2013; this will provide municipalities a final opportunity to adjust their 2013/14 budgets and MTREF's to accurately reflect the gazette allocations prior to tabling for consideration and approval by the municipal council.

Local government conditional grants and additional allocations to local government

Local government conditional grants are being reformed to provide targeted support to different types of municipalities. The human settlements and public transport functions are being devolved to urban municipalities, and greater technical support will be provided to rural municipalities. In 2013/14, a new direct grant for water infrastructure administered by the Department of Water Affairs will enable the department to help municipalities deliver clean drinking water to households.

Over the medium term, funds will be made available to expand the integrated national electrification programme. Reprioritised funds will also be used to improve the sustainability of municipal services by subsidising critical refurbishment projects, and combating wastage of water and electricity.

National government has already made substantial investments in the construction of local government infrastructure, committing over R100 billion for this purpose through direct and indirect conditional grants from 2007/08 to 2011/12, allowing municipalities to expand infrastructure and deliver free basic services to the poor. These transfers have made a significant difference to the lives of South Africans who did not previously have access to municipal services. However, there are still areas where households do not have access to basic services.

The 2011 Census data will be used to identify areas where progress has been made and where it has not. During 2013, the effectiveness of conditional grants in facilitating the rollout of infrastructure will be reviewed by the National Treasury, other national departments, the South African Local Government Association and municipalities. This review could result in changes to the structure of conditional grants from 2014/15.

Census data will also be used to update the backlog figures in the formulas used to allocate funds for infrastructure grants. This will ensure that funds are targeted at areas that need them most. All changes will be phased in to avoid disruption to existing infrastructure plans.

The *Medium Term Budget Policy Statement 2012* indicates that over the 2013 MTEF, transfers to local government grow by R12.3 billion, including direct and indirect transfers.

This means the baseline allocations to local government for 2013/14 are set to remain largely unchanged from the amounts published in the 2012 Division of Revenue Act totalling R34.3 billion for conditional grants. The final allocations to municipalities will be announced in the 2013 Division of Revenue Bill, which will be tabled by the Minister of Finance on 27 February 2013. This information will be communicated to municipalities in a further Budget Circular for the 2013/14 financial year to be issued shortly after the tabling of the National Budget.

Municipalities MUST ensure that their tabled budgets reflect the conditional grant allocations set out in the 2013 Division of Revenue Bill.

Municipalities are advised to use the indicative numbers for 2013/14 in the 2012 Division of Revenue Act to compile their capital budgets. This document is available on National Treasury's website and can be assessed at:

http://www.treasury.gov.za/legislation/acts/2012/Default.aspx

Council oversight over the budget process

A municipal council is elected to direct and exercise oversight of how a municipality raises revenue, plans the use of funds through its budget and spends the funds in accordance with the council approved budget. In terms of section 4(2)(a) of the Municipal Systems Act the council has a duty "to use the resources of the municipality in the best interests of the local community". This duty is extended to individual councillors through the *Code of Conduct for Councillors*, which states:

2. **General conduct of councillors**. – A councillor must –

- (a) perform the functions of office in good faith, honestly and in a transparent manner; and
- (b) at all times act in the best interests of the municipality and in such a way that the credibility and integrity of the municipality are not compromised.

Over the last few years, an escalating trend in unauthorised, irregular and fruitless and wasteful expenditures has been observed by the Auditor-General in its annual reports on local government audit outcomes. Many municipalities have not dealt effectively with instances of unauthorised, irregular and fruitless and wasteful expenditure. Such matters must be dealt with decisively by council so to address any perceived fraud and corruption.

When municipal funds are used for inappropriate purposes it is not in the best interests of the municipality or the local community. Those funds should have been used to deliver services to communities. The consequence is that many households continue to live without access to water, electricity, decent sanitation and refuse removal services.

Therefore, each council has a duty to put in place policies and processes to:

- (a) **Prevent** unauthorised, irregular and fruitless and wasteful expenditure;
- (b) **Identify and investigate** unauthorised, irregular and fruitless and wasteful expenditure; and
- (c) **Respond** appropriately, and in accordance with the law, to confirmed instances of unauthorised, irregular and fruitless and wasteful expenditure.

As part of the 2013/14 budget process municipalities are strongly advised to ensure that the necessary policies and processes are institutionalised in proactively curbing prohibited expenditure; poor policies, procedures and planning significantly contribute to this recurring phenomenon and require a demanding response by all councillors and municipal officials.

Regulation of a 'Standard Chart of Accounts' (SCOA) for Local Government

Section 216(1) of the Constitution states that:

National legislation must establish a national treasury and prescribe measures to ensure both transparency and expenditure control in each sphere of government, by introducing -

- (a) Generally recognised accounting practice (GRAP Office of the Accountant General)
- (b) Uniform expenditure classifications (Standard Chart of Accounts / General Ledger); and

(c) Uniform treasury norms and standards (MFMA, Regulations, Circulars and Guidelines).

Furthermore Section 168 (1) of the MFMA states that:

The Minister (of Finance), acting with the concurrence of the Cabinet member responsible for local government, may make regulations for, among other things –

- (a) any matter that may be prescribed; and
- (p) any other matter that may facilitate the enforcement and administration of the Act

Considering the legislative mandate of National Treasury especially as it relates to a uniform expenditure classification, similarly to that of national and provincial government, National Treasury is in the process of finalising a 'standard chart of accounts' (SCOA) for local government. The SCOA is a detailed financial classification system incorporating government financial statistics (GFS), economic reporting framework (ERF), generally recognised accounting practice standards (GRAP standards) and the Municipal Budget and Reporting Regulations. Alignment of the Municipal Budget and Reporting Regulations and the format of the annual financial statements will require that consideration to be given to the current accounting standards (GRAP); this will require amendments to the current GRAP standards.

The project was commissioned by the Technical Committee on Finance (TCF) and has been in process since January 2010 of which progress to date has included three phases. Phase three of SCOA for local government involved, among others, extensive consultation with a wide audience including all municipalities between August and October 2012. The engagements were structured to provide a detailed understanding of the classification framework (SCOA) including the project summary document. All stakeholders were requested to provide comments and input based on Version III of SCOA for consideration and incorporation into the SCOA Version IV. The regulation of a SCOA for local government is currently in Phase IV, which includes:

- Finalisation of SCOA 2013 (Version IV) including consideration of comments and input;
- Drafting of the Regulation;
- 90 day legal consultation window Envisage for March 2013;
- Wider consultation with all municipal stakeholders District level engagements; and
- Concluding the Parliamentary processes.

It is anticipated that the regulatory processes will be finalised to the latter part of 2013 and municipalities will be given a two year preparation window prior to full implementation which is envisaged for 1 July 2016. In this regard, municipalities will be required to compile their 2016/17 budgets and MTREF's SCOA compliant during the 2015/16 financial year. In the lead up to full rollout of the SCOA for local government, municipalities need to be cognisant of concurrent processes and activities underway, including:

- Development of a SQL Database within the National Treasury by which typical municipal transactions will be tested (current and historical) as well as report extraction:
- Identification of potential municipalities for the piloting of SCOA; this will include a technical evaluation of municipal and financial application (system) capability to successfully pilot SCOA;
- Piloting at selected municipalities; and
- Wider consultation with municipalities in the lead up to full implementation.

Although not necessary for municipalities to compile their 2013/14 budgets and MTREF's in the SCOA format for local government, it will facilitate implementation if municipalities start familiarising themselves with the detail content of the SCOA for local government from a budgeting and planning perspective. This process will not only provide municipalities with a conceptual understanding of the SCOA but also provide municipalities with an understanding of alignment to their own chart (general ledger) and where anomalies might exist.

National Treasury will regularly communicate with all municipalities on progress during the process of finalising the SCOA for local government.

Financial applications (systems) and the impact of SCOA

As part of the SCOA project, National Treasury commissioned a parallel project to investigate financial applications (systems) in use by municipalities and compatibility of current financial applications (systems) in amongst others, accommodating the proposed segments of the SCOA for local government.

The implementation of SCOA is highly dependent on typical business processes to be accommodated in modules to standardise transactions in the application of the classification framework. Uniform business processes and typical transaction is a pre request for SCOA to achieve comparable results throughout local government.

To this end National Treasury issued MFMA Circular No.57 – Municipal Financial Systems and Processes which can be accessed at:

http://mfma.treasury.gov.za/Circulars/Pages/default.aspx

The objective of the circular was to inform municipalities of the investigation into local government financial systems and processes and to outline the procedure that municipalities need to comply with when considering a replacement of their core financial systems.

Municipalities are reminded that MFMA Circular No. 57 is still applicable and that the replacement of the core financial system prior to the regulation of the SCOA for local government could result in potential fruitless and wasteful expenditure for municipalities.

In the lead up to the regulation of a SCOA for local government and subsequent implementation by municipalities, National Treasury will continue with its research into local government financial applications (systems) and engage with relevant stakeholders in ensuring a conducive and enabling environment is created which will accommodate and facilitate the implementation of the SCOA for local government.

Municipalities are strongly advised not to proceed with any configuration or upgrades to their current core financial systems in anticipation of SCOA; any configuration or upgrades at this stage must be considered premature as the SCOA for local government has not been finalised. As the research and other concurrent projects are undertaken National Treasury will regularly update municipalities on progress and other requirements impacting on municipalities from a financial application (systems) perspective.

Management accounting and tariff setting

In addition to the special project on financial applications (systems) and processes (as discussed above) National Treasury commissioned a further project dealing specifically with management accounting (costing) and the subsequent impact on tariff setting.

Municipalities are increasingly under recovering the cost associated with trading services i.e. electricity, water, waste management and waste water management and this position is further exacerbated by the fact that no consideration is given to overhead costing and the influence on the total cost of providing the service. This in turn impacts on tariff setting and in many instances municipalities are cross subsidising a trading service from property rates revenue; a totally defective approach to pricing and tariff setting of municipal trading services.

The Technical Committee on Finance (TCF) endorsed a pilot project to be undertaken at a local municipality in reviewing and researching an appropriate cost management methodology for local government. The project involved unpacking the adopted municipal budget for the 2012/13 financial year, evaluating cost distribution tools and methodologies and testing appropriateness of applications. The first phase of the project is nearing completion and a guideline will be distributed early in 2013 providing municipalities with a generic management accounting methodology.

In addition to the guideline, the research work has informed the design principles for a segment within the SCOA for local government. This will provide municipalities with not only pure accounting functionality as part of SCOA but also the key dimension of management accounting. In finalisation of SCOA for local government and ensuring the alignment between the Municipal Budget and Reporting Regulations, in-year reporting and annual financial systems National Treasury envisages additions to the Municipal Budget and Reporting Regulations going forward.

Further guidance around tariff setting for main trading services is supplied in the section of this Circular dealing with revising of rates, tariff and other charges.

Municipal Budget and Benchmark Engagements and timeframes for tabling MTREF'S

National Treasury has institutionalised two formal annual engagements with the 17 non-delegated municipalities, namely the Mid-year Budget and Performance Assessment Review and the Municipal Budget and Benchmark Engagement.

The Municipal Budget and Benchmark Engagements are intended to provide a platform by which the tabled budgets are independently analysed and assessed by National Treasury and the respective provincial treasuries. These formal engagements conclude with findings and recommendations being supplied to the respective municipalities in a formal report which must be considered by the budget steering committee prior to the finalisation of the budget to be tabled in council for consideration and approval to the end of May.

Although the 17 non-delegated municipalities have welcomed these engagements and are of the opinion that it strengthens the overall municipal budgeting process, concern has been raised over the scheduling of the engagements; engagements historically scheduled starting middle of April and subsequently municipalities find it difficult to incorporate key findings and recommendations into their final budgets prior to consideration and approval by the municipal council.

Municipalities are advised to consider earlier tabling of the 2013/14 budgets and MTREF's; *last week of February, first week of March 2013*. The request for early tabling will have the following advantages by:

 Provide for a lead-time for municipalities to incorporate the findings and recommendations of the engagements by the National Treasury and respective provincial treasuries on the 2013/14 budgets and MTREF's into their final budgets and MTREF's prior to tabling for considered and approval by the municipal council;

- Provide for a wider engagement window for the National Energy Regulator of South Africa (NERSA) to consider the proposed electricity tariff structures within their regulatory processes prior to adoption by the municipality; early tabling will empower municipalities to incorporate any comments and recommendations received by NERSA prior to finalisation of the 2013/14 budgets and MTREF's for consideration and approval (further guidance around tariff setting and the NERSA process is supplied in the section of this Circular dealing with revising of rates, tariff and other charges); and
- Provide for a wider window for public participation as required by the MFMA; an area where municipalities are generally weak and needs specific attention and improvement.

Headline inflation forecasts

Municipalities must take the following inflation forecasts into consideration when preparing their 2013/14 budgets and MTREF. Again this information will be updated in a further Budget Circular to be issued after the tabling of the National Budget on 27 February 2013.

Fiscal year	2011	2012	2013	2014	2015
	Actual	Estimate		Forecast	t
CPI Inflation	5.0%	5.7%	5.5%	5.1%	4.9%

Source: Medium Term Budget Policy Statement 2012

Revising rates, tariffs and other charges

When municipalities and municipal entities revise their rates, tariffs and other charges for their 2013/14 budgets and MTREF's, they need to take into account the labour (i.e. the wage agreements with unions) and other input costs of services provided by the municipality or entity, the need to ensure financial sustainability, local economic conditions and the affordability of services, taking into consideration the municipality's indigent policy. Municipalities should also take into account relevant policy developments in the different sectors (such as the *inclining block tariff* (IBT) proposals from the National Energy Regulator of South Africa (NERSA)).

Municipalities should continue to explore appropriate ways of structuring the tariffs for utility services to encourage more efficient use of these services and to generate the resources required to fund the maintenance, renewal and expansion of the infrastructure required to provide the services.

National Treasury continues to encourage municipalities to keep increases in rates, tariffs and other charges at levels that reflect an appropriate balance between the interests of poor households, other customers and ensuring the financial sustainability of the municipality. For this reason municipalities must justify in their budget documentation all increases in excess of the 6 per cent upper boundary of the South African Reserve Bank's inflation target.

NERSA's process to approve electricity tariffs

It is important that municipalities and NERSA work together to ensure that the process of approving electricity tariffs does not disrupt the process of compiling municipal budgets or compromise community consultations on the budget. It is for this reason that section 43 of the MFMA reads:

- 43 (1) If a national or provincial organ of state in terms of a power contained in any national or provincial legislations determines the upper limits of a municipal tax or tariff, such determination takes effect for municipalities on a date specified in the determination.
 - (2) Unless the Minister on good grounds approves otherwise, the date specified in a determination referred to in subsection (1) may-
 - (a) if the determination was promulgated on or before 15 March in a year, not be a date before 1 July in that year; or
 - (b) if the determination was promulgated after 15 March in a year, not be a date before 1 July in the next year.

Owing to the delay in Eskom's tariff increase application, NERSA has indicated that they will only be in a position to finalise Eskom's application by 28 February 2013. NERSA has indicated that this would affect the decision on the determination of the municipal tariffs and limit the ability of NERSA to meet the 15 March 2013 deadline. NERSA has subsequently applied to the Minister for extension of the deadline as contained in Section 43 of the MFMA.

Considering the pending extension application by NERSA, municipalities are advised as follows as it relates to NERSA's regulatory process over municipal electricity tariff determination:

- Municipalities are to formulate their electricity tariff structures for the 2013/14 budgets and MTREF's based on the indicative 14.4 per cent increase as detailed below and NERSA guidelines. This must inform the tabled 2013/14 budgets and MTREF prior to community consultation;
- ii. submit a tariff application to NERSA containing all the required information by 28 February 2013; and
- iii. NERSA to finalise the municipal electricity determination process by the 26 April 2013, including formal feedback to municipalities for incorporation into the final 2013/14 budgets and MTREF.

Municipalities are reminded to submit all outstanding D-forms to NERSA. The deadline for submission was 30 October 2012. NERSA will not be in a position to evaluate municipal tariff applications in the absence of complete D-forms.

NERSA will have to consider the fact that the municipal electricity tariff structure was based on the indicative 14.4 per cent increase and adjust their comments to individual municipalities based on the actual tariff determination to be made available on 28 February 2013; municipalities will in turn, have to incorporate NERSA's comments in the finalisation of their 2013/14 budgets and MTREF's prior to the MFMA deadline of 31 May 2013 for tabling, consideration and approval by the municipal council.

Where a municipality can demonstrate that it has complied with (i), (ii) and (iii) above, and that NERSA did not issue a final determination by 26 April 2013, the municipality will be entitled to use the tariffs for 2013/14 set out in its original application to NERSA.

To facilitate NERSA's regulatory processes as it relates to reviewing the proposed municipal electricity tariff structures, municipalities are advised to consider earlier tabling of the 2013/14 budgets and MTREF's; *last week of February, first week of March*. Adherence to earlier tabling directly implies that municipalities will be in a position to submit their municipal electricity tariff structures to NERSA by the latest 28 February 2013; earlier tabling would mean that municipalities would be in the finalisation stages of their budget compilation process, and subsequently the proposed municipal electricity tariffs should be finalised.

It needs to be noted that the outlined process is an exception and will not be repeated in subsequent financial years; NERSA will be approving a five-year multi-year price determination (MYPD) from the 2013/14 financial year.

Eskom bulk tariff increases

Eskom submitted a 16 per cent bulk electricity price increase application to NERSA for the 2013/14 financial year. Should this bulk electricity price increase be approved the indicative increase for municipalities is 14.4 per cent for the 2013/14 financial year.

Municipalities are advised to structure their 2013/14 electricity tariffs based on the 14.4 per cent guideline and provide for a 16 per cent increase in the cost of bulk purchases for the tabled 2013/14 budgets and MTREF. Once the final bulk electricity price is available the information will be communicated to municipalities in a further Budget Circular for the 2013/14 financial year to be issued shortly after the tabling of the National Budget, including a multi-year Eskom bulk electricity price increase.

Municipalities are urged to examine the cost structure of their electricity undertakings and apply to NERSA for electricity tariff increases that are cost reflective and ensure continued financial sustainability.

National Treasury supports the use of the following formula, proposed by NERSA, for calculating municipal electricity tariff increases:

$$MG = (B \times BPI) + (S \times SI) + (R \times RI) + (C \times CCI) + (OC \times OCI)$$

Where:

MG = % Municipal Guideline Increase

B = % Bulk purchases

BPI = % Bulk purchase increase

S = % Salaries

SI = % Salaries increase

R = % Repairs

RI = % Repairs increase C = % Capital charges

CCI = % Capital charges increase

OC = % Other costs

OCI = % Other costs increase

All cost shares and increases must relate to the electricity function of the municipality

Where a municipality's evaluation of its cost structure results in a lower or higher tariff increase to that proposed by NERSA, the municipality must structure its tariffs accordingly and ensure it provides the necessary motivation and information in its tariff application to NERSA.

Inclining block tariffs (IBT) for electricity

Municipalities are urged to design an IBT structure that is appropriate to its specific circumstances, and ensures an appropriate balance between 'low income customers' and other domestic, commercial and business customers, and the financial interests of the municipality.

It is also important that any proposed IBT is fully aligned to the principles set out in the *South African Electricity Supply Industry: Electricity Pricing Policy* (EPP), including the principle that electricity tariffs must be cost reflective and that any cross-subsidies should be explicit.

A municipality must structure its IBT tariff according to its own specific circumstances and ensure that it provides the necessary motivation and information to NERSA in its tariff

application. In this regard, municipalities need to pay careful attention to determining an appropriate level of cross-subsidisation between the different IBT blocks given the profile of its customer base, and also have regard to the price elasticity of the demand for electricity.

Water and sanitation tariffs must be cost-reflective

Municipalities are reminded to review the level and structure of their water and sanitation tariffs carefully with a view to ensuring:

- Water and sanitation tariffs are on aggregate fully cost-reflective including the bulk cost of water, the cost of maintenance and renewal of purification/treatment plants and network infrastructure, and the cost of new infrastructure;
- Water and sanitation tariffs are structured to protect basic levels of service; and
- Water and sanitation tariffs are designed to encourage efficient and sustainable consumption (e.g. through inclining block tariffs).

If a municipality's water and sanitation tariffs are not fully cost reflective, the municipality should develop a pricing strategy to phase-in the necessary tariff increases in a manner that spreads the impact on consumers over a period of time. However, all municipalities should aim to have appropriately structured, cost-reflective water and sanitation tariffs in place by 2014.

To mitigate the need for water tariff increases, municipalities must put in place an appropriate strategy to limit water losses to acceptable levels. In this regard municipalities must ensure that water used by its own operations is charged to the relevant service, and not simply attributed to water 'losses'.

Municipalities' not already calculating and reporting non-revenue water in accordance with the International Water Association (IWA) standards as required by the Department of Water Affairs (DWA) should contact DWA for assistance in this regard. National Treasury is working with DWA to publish this information in the near future.

Solid waste tariffs

Municipalities are once again reminded that in many instances waste tariffs do not cover the cost of providing the different components of the service. Where this is the case, municipalities should aim to have appropriately structured, cost-reflective solid waste tariffs in place by 2015.

The tariffs for solid waste management must take into account that it is good practice to maintain a cash-backed reserve to cover the future costs of rehabilitating landfill sites.

Municipalities are encouraged to explore alternative methodologies to manage solid waste, including recycling and incineration in plants that use the heat energy to generate electricity.

Funding choices and management issues

Municipalities are once again reminded that given on-going economic pressures, the revenue side of municipal budgets will continue to be constrained, so they will again need to make some very tough decisions on the expenditure side this year. Priority still needs to be given:

- Ensuring that drinking water and waste water management meets the required quality standards at all times:
- Protecting the poor;

- Supporting meaningful local economic development (LED) initiatives that foster micro and small business opportunities and job creation;
- Securing the health of their asset base (especially the municipality's revenue generating assets) by increasing spending on repairs and maintenance;
- Expediting spending on capital projects that are funded by conditional grants; and
- Ensuring that borrowed funds are invested in revenue generating assets as part of the capital programme.

Municipalities must also ensure that their capital budgets reflect consistent efforts to address the backlogs in basic services and the renewal of the infrastructure of existing network services.

Employee related costs

Municipalities must take into account the multi-year Salary and Wage Collective Agreement for the period 1 July 2012 to 30 June 2015. The agreement provides for a wage increase based on the average CPI for the period 1 February 2012 until 31 January 2013, plus 1.25 per cent for the 2013/14 financial year.

Considering that municipalities will be preparing and finalising their respective 2013/14 MTREF for tabling as per the MFMA prior to the announcement of the final CPI for the relevant period, municipalities will have to provide for assumed budget growth as it relates to employee related costs.

In this regard municipalities are advised that average CPI for the period November 2011 to October 2012 is 5.74 per cent which compares well to the estimate of 5.7 per cent for 2012 as provided for in the 2012 Medium Term Budget Policy Statement. Municipalities are therefore advised to provide for increases related to salaries and wages for the 2013/14 budget and MTREF as follows:

```
2013/14 Financial Year – 6.95 per cent (5.7 per cent plus 1.25 per cent) 2014/15 Financial Year – 6.5 per cent (5.5 per cent plus 1 per cent)
```

Once the final average CPI for the period 1 February 2012 until 31 January 2013 is available municipalities will be a position to adjust their 2013/14 budget and MTREF prior to tabling for consideration and approval to the end of May 2013; it is not envisaged that the actual CPI will be a significant deviation from the guidelines and should therefore not have a detrimental impact on the tabled budget prior to community consultation.

In addition to considering the actual salary and wage increases municipalities are reminded to accurately budget for actual positions and vacancies as per the organisational structure of the municipality and notch increments where applicable. Municipalities are also reminded that supporting tables SA22 (Summary councillor and staff benefits), SA23 (Salaries, allowances and benefits of political office bearers/councillors/senior managers) and SA24 (summary of personnel numbers) as part of the Municipal Budget and Reporting Regulations need to be accurately completed. Municipalities are urged to provide a narrative to the budget document explaining the numbers and budget appropriations.

Excessive expenditure on overtime has been increasingly observed in National Treasury's analysis of municipal budgets. In certain instances overtime can account for as much as 8 per cent of the employee related costs. Although overtime is considered acceptable, as it relates to essential services; an excessively high allocation could be an indication of performance inefficiencies. Overtime is an expensive form of remuneration and can easily be abused. Should excessive overtime be found to be legitimate it could be an indication that the

organisational structure is insufficiently funded and hence would require funds being rather appropriated against vacancies. Based on the most recent Budget and Benchmark Engagements with the non-delegated municipalities, overtime as a percentage of total remuneration averaged 4.5 per cent. As a guideline, municipalities are advised that a percentage above 5 per cent would require further investigation; it needs to be noted that this percentage is based on total municipal remuneration and individual functions will differ owing to the nature of the service rendered.

Debt impairment, depreciation, and other non-cash expenditure items

Municipalities have recently raised concern over the classification of non-cash flow expenditure being classified as unauthorised owing to overspending; such expenditure relates to debt impairment, depreciation and asset impairment, and transfers and grants as appropriated in Table A4 (Budgeted Statement of Financial Performance: revenue and expenditure) of the MBRR.

Although these expenditures are considered non-cash items as there is no transaction with the 'outside world', an under provision during the budget compilation process is a material misstatement of the surplus/(deficit) position of the municipality. This could be associated with poor budgeting and financial management or events that gave rise to the asset and debt impairment were unknown at the time of budget finalisation and adoption. Nevertheless, the Auditor-General must express an opinion in relation to non-cash items as it relates to unauthorised expenditure resulting from overspending. In this regard Table A4 (Budgeted Statement of Financial Performance: revenue and expenditure) must be read in conjunction with supporting Table SA1 of the MBRR. Although National Treasury understands that budgeting for certain non-cash flow expenditure such as investment property impairment is extremely difficult owing to the nature of the transaction; other non-cash flow expenditure such as debt impairment and depreciation are more predictable and should be informed by actual municipal performance and intended capitalisation of property, plant and equipment during the budget year.

Municipalities are advised to carefully project and appropriate expenditure against non-cash items during the budget compilation process in proactively dealing with possible instances of unauthorised expenditure. Section 160(2) of the Constitution provides that a council may not delegate the approval of budgets or the imposition of rates, taxes, levies and duties. In other words, only the council may make decisions related to the raising of municipal revenues and approving (or authorising) the spending of those revenues through the budget or an adjustments budget.

The council can only make valid expenditure decisions through a budget or an adjustments budget. It follows that *only* the council may authorise instances of unauthorised expenditure, and *council must* do so through an adjustments budget. This is the rationale for the provisions in regulation 23(6) of the Municipal Budget and Reporting Regulations (MBRR) governing when council may authorise unauthorised expenditure in an adjustments budget.

Renewal and repairs and maintenance of existing assets

It is observed that budget appropriations for renewal and operational repairs and maintenance of existing asset infrastructure is still not receiving adequate priority regardless of guidance supplied in MFMA Circular No. 55 – Municipal Budget Circular of the 2011/12 MTREF.

Municipalities are therefore once again reminded of the guidelines as supplied in MFMA Circular No. 55. For the 2013/14 budgets and MTREF's municipalities must take into consideration:

- Where the municipality allocates less than 40 per cent of its 2013/14 Capital Budget (as reflected on Table A9) to the renewal of existing assets it must provide a detailed explanation and assurance that the budgeted amount is adequate to secure the ongoing health of the municipality's infrastructure supported by reference to its asset management plan;
- Where the budgeted amounts for repairs and maintenance reflected on Table A9 are
 less than 8 per cent of the asset value (write down value) of the municipality's Property
 Plant and Equipment (PPE) as reflected in the municipality's 2011/12 annual financial
 statements, the municipality must provide a detailed explanation and assurance that
 the budgeted amount is adequate to secure the ongoing health of the municipality's
 infrastructure supported by reference to its asset management plan; and
- In the case of a municipality that received an audit qualification related to its assets register, where the budgeted amounts for repairs and maintenance reflected on Table A9 are less than 10 per cent of the municipality's operating expenditure on Table A4, the municipality must provide a detailed explanation and assurance that the budgeted amount is adequate to secure the ongoing health of the municipality's infrastructure supported by reference to its asset management plan.

Municipalities are also reminded of the disclosure requirements of the Municipal Budget and Reporting Regulations as it relates to supporting table SA1; this table requires the disclosure of operational repairs and maintenance against employee related costs, other materials, contracted services and other expenditure. Municipalities are further reminded of the importance of supporting tables SA34 a, b, c and d which provide an analysis of capital asset renewal and operational repairs and maintenance; a strategically important expenditure for local government.

National Treasury, along with provincial treasuries, will assess what each municipality has budgeted for repairs and maintenance, and renewal projects as part of the overall assessment of municipal budgets.

Furthermore, municipalities are reminded that reporting on asset renewal and repairs and maintenance has been institutionalised as part of the in-year Section 71 reporting process and publication of municipal performance. It would be in the best interest of municipalities and the community to ensure they firstly prioritise expenditure against this strategic expenditure imperative and accurately and transparently appropriate expenditure in the budget compilation process.

Eliminating non-priority spending

The 2012 Medium-term Budget Policy Statement (MTBPS) highlighted the need for resource allocation to be prioritised in expanding public-sector investment. The MTBPS further emphasises the need for government to step up its efforts to combat waste, inefficiency and corruption. Municipalities must therefore pay special attention to controlling unnecessary spending on nice-to-have items and non-essential activities.

To illustrate the point, it has come to the attention of National Treasury that municipalities are incurring excessive expenditure on membership and other related costs associated with *The South African Municipal Sports and Recreation Association (SAMSRA)*. SAMSRA is an organisation catering for the physical, emotional and psychological well-being of local government practitioners, including councillors. Spending excessive amounts on travelling, accommodation and entertainment related to SAMSRA is totally unacceptable and could be classified as fruitless and wasteful expenditure. Municipalities have indicated that in certain instances they are forced to budget as much as R600 000.00 per annum for the municipal

games hosted by SAMSRA. Furthermore, it has also come to our attention that municipalities apply for sponsorship in the name of the municipality and not SAMSRA - a practice that has significant implications from a supply chain management perspective and is tantamount to irregular expenditure. Municipalities are advised to halt this bad practice immediately and are reminded of the need for resource allocation to be prioritised in expanding public-sector investment, considering the challenging economic landscape.

The following additional examples of non-priority expenditure have been observed, and municipalities are reminded that they need to be eliminated:

- i. excessive sponsorship of music festivals, beauty pageants and sporting events, including the purchase of tickets to events for councillors and/or officials;
- ii. public relations projects and activities that are not centred on actual service delivery or are not a municipal function (e.g. celebrations; gala dinners; commemorations, advertising and voter education);
- iii. LED projects that serve the narrow interests of only a small number of beneficiaries or fall within the mandates of other government departments such as the Department of Agriculture;
- iv. excessive catering for meetings and other events, including the use of public funds to buy alcoholic beverages;
- v. arranging workshops and events at expensive private venues, especially ones outside the municipality (as opposed to using the municipality's own venues);
- vi. excessive printing costs (instead of maximising the use of the municipality's website, including providing facilities for the public to access the website);
- vii. excessive luxurious office accommodation and office furnishings;
- viii. foreign travel by mayors, councillors and officials, particularly 'study tours';
- ix. excessive councillor and staff perks such as luxurious mayoral cars and houses, notebooks, IPADS and cell-phone allowances; travel and subsistence allowances. Municipalities are reminded that in terms of section 7 (1) of the Remuneration of Public Office-bearers Act, 1998 (Act No.20 of 1998) the Minister for Cooperative Governance and Traditional Affairs must determine the limit of salaries and allowances of the different members of municipal councils and any budget provision may not be outside this framework:
- x. excessive staff in the office of the mayor particularly the appointment of political 'advisors' and 'spokespersons';
- xi. all donations to individuals that are not made in terms of the municipality's indigent policy or a bursary scheme; for instance donations to cover funeral costs (other than pauper burials which is a district municipality function);
- xii. costs associated with long-standing staff suspensions and the legal costs associated with not following due process when suspending or dismissing staff, as well as payment of severance packages or 'golden handshakes'; and
- xiii. the use of consultants to perform routine management tasks, and the payment of excessive fees to consultants.

Budget management issues dealt with in previous MFMA Circulars

Municipalities are reminded to refer to MFMA Circulars 48, 51, 54 and 55 with regards to the following issues:

- Mayor's discretionary funds and similar discretionary budget allocations National Treasury regards allocations that are not designated for a specific purpose to be bad practice and discourages them (refer to MFMA Circular 51).
- 2. <u>Unallocated ward allocations</u> National Treasury does not regard this to be a good practice, because it means that the tabled budget does not reflect which ward projects are planned for purposes of public consultation and council approval (refer to MFMA Circular 51).
- 3. <u>New office buildings</u> Municipalities are required to send detailed information to National Treasury if they are contemplating building new main office buildings (refer to MFMA Circular 51).
- 4. <u>Virement policies of municipalities</u> Municipalities are reminded of the principles that must be incorporated into municipal virements policies (refer to MFMA Circular 51).
- 5. <u>Providing clean water and managing waste water</u> Municipalities are reminded to include a section on 'Drinking water quality and waste water management' in their 2013/14 budget document supporting information (refer to MFMA Circular 54).
- 6. <u>Renewal and repairs and maintenance of existing assets</u> Allocations to repairs and maintenance, and the renewal of existing infrastructure must be prioritised. Municipalities must provide detailed motivations in their budget documentation if allocations do not meet the benchmarks set out in MFMA Circular 55.
- 7. <u>Budgeting for an operating deficit</u> Over the medium term, a municipality should budget for a moderate surplus on its Budgeted Statement of Financial Performance so as to be able to contribute to the funding of the Capital Budget. If the municipality's operating budget shows a deficit it is indicative that there are financial imbalances that need to be addressed (refer to MFMA Circular 55).
- 8. <u>Credit cards and debit cards linked to municipal bank accounts are not permitted</u> On 02 August 2011 National Treasury issued a directive to all banks informing them that as from 01 September 2011 they are not allowed to issue credit cards or debit cards linked to municipal bank accounts (refer to MFMA Circular 55).

Conditional transfers to municipalities

As indicated above, National Treasury will issue a further Budget Circular for the 2013/14 financial year shortly after the tabling of the National Budget on 27 February 2013. This Circular will deal with any new conditional grant issues and processes related to the management of conditional grants.

Municipalities need to take note that National Treasury intends placing increased emphasis on the discrepancies between in-year reporting and the annual financial statements as part of the next conditional grant roll-over application process; in this regard municipalities are requested to improve on the quality of the quarterly sign-off process of Section 71 reports. National Treasury has also observed that municipalities continuously restate historical numbers as part of the compilation of the annual financial statements; especially as it relates to conditional grants. Although an accepted accounting practice, the misuse of this practice is problematic and municipalities are advised to act transparently when compiling annual financial statements. Should municipalities unjustifiably continue with the restatement of historic figures, National Treasury will have to institute additional measures in consultation with the Office of the Accountant General to limit continued reoccurrence.

At this stage in the budget process, municipalities are advised to use the indicative numbers for 2013/14 in the 2012 Division of Revenue Act to compile their budgets. This document is available on National Treasury's website at:

http://www.treasury.gov.za/legislation/acts/2012/Default.aspx

Conditional grant issues dealt with in previous MFMA Circulars

Municipalities are reminded to refer to MFMA Circulars 48, 51, 54 and 55 with regards to the following issues:

- 1. <u>Accounting treatment of conditional grants</u> Municipalities are reminded that in accordance with accrual accounting principles, conditional grants should only be treated as 'transfers recognized' revenue when the grant revenue has been 'earned' by incurring expenditure in accordance with the conditions of the grant.
- 2. <u>VAT on conditional grants:</u> SARS has issued a specific guide to assist municipalities meeting their VAT obligations **VAT 419 Guide for Municipalities**. To assist municipalities accessing this guide it has been placed on the National Treasury website at: http://mfma.treasury.gov.za/Guidelines/Pages/default.aspx
- 3. <u>Interest received and reclaimed VAT in respect of conditional grants:</u> Municipalities are reminded that in MFMA Circular 48, National Treasury determined that:
 - Interest received on conditional grant funds must be treated as 'own revenue' and its use by the municipality is not subject to any special conditions; and
 - 'Reclaimed VAT' in respect of conditional grant expenditures must be treated as 'own revenue' and its use by the municipality is not subject to any special conditions.
- 4. <u>Appropriation of conditional grants that are rolled over</u> As soon as a municipality receives written approval from National Treasury that its unspent conditional grants have been rolled-over it may proceed to spend such funds (refer to MFMA Circular 51 for other arrangements in this regard).
- 5. <u>Pledging of conditional grant transfers</u> the 2013 Division of Revenue Bill will contain a provision that allows municipalities to pledge their conditional grants. The end date for the pledges is extended to 2015/16. The process of application as set out in MFMA Circular 51 remains unchanged.
- 6. <u>Separate reporting for conditional grant roll-overs</u> National Treasury has put in place a separate template for municipalities to report on the spending of conditional grant roll-overs. Municipalities are reminded that conditional grant funds can only be rolledover once, so if they remain unspent in the year in which they were rolled-over they MUST revert to the National Revenue Fund.
- 7. <u>Payment schedule</u> National Treasury has instituted an automated payment system of transfers to municipalities in order to ensure appropriate safety checks are put in place. Only the National Treasury approved and verified primary banking details would be used for effecting transfers.

The Municipal Budget and Reporting Regulations

National Treasury has released Version 2.5 of Schedule A1 (the Excel Formats). This version incorporates minor changes (see Annexure A). Therefore ALL municipalities MUST use this version for the preparation of their 2013/14 Budget and MTREF.

Download Version 2.5 of Schedule A1 by clicking HERE

The Municipal Budget and Reporting Regulations are designed to achieve a range of objectives, including improving the local government sphere's ability to deliver services by facilitating improved financial sustainability and better medium term planning. The regulations, formats and associated guides etc. are available on National Treasury's website at:

http://mfma.treasury.gov.za/RegulationsandGazettes/Pages/default.aspx

All municipalities must prepare budgets in accordance with the regulations

Municipalities are reminded that the regulations apply to all municipalities and municipal entities as from 1 July 2009.

All municipalities and municipal entities must prepare annual budgets, adjustments budgets and in-year reports for the 2013/14 financial year in accordance with the Municipal Budget and Reporting Regulations. In this regard, municipalities must comply with both:

- The formats set out in Schedules A, B and C; and
- The relevant attachments to each of the Schedules (the Excel Formats).

If a municipality fails to prepare its budget, adjustments budget and in-year reports in accordance with the relevant formats, actions the National Treasury will take includes:

- The municipality will be required to resubmit their documentation in the regulated format by a date determined by the National Treasury;
- The municipality's non-compliance with the required formats will be reported to the Auditor-General; and
- A list of municipalities that fail to comply with the required formats will be tabled in Parliament and the provincial legislatures.

Assistance with the compilation of budgets

If you require advice with the compilation of your budgets, the budget documents or Schedule A1 please direct your enquiries as follows:

End to the phasing in of formats and tables

This will be the fourth year that all municipalities are required to prepare their annual budgets in accordance with the Municipal Budget and Reporting Regulations. National Treasury therefore expects all municipalities to provide a complete set of information in their annual budget tables, as well as the supporting tables (Schedule A1). All municipalities are once again reminded that the tabled budget including all supporting documents and completed A1 Schedule of the Municipal Budget and Reporting Regulations must be submitted to the National Treasury and respective provincial treasuries prior to the budget and benchmarking exercise.

National Treasury, working with the provincial treasuries, will carry out a compliance check and where municipalities have not provided complete information, the budgets will be referred back to the municipalities, and an appropriate letter will be addressed to the Mayor and municipal manager. Municipal managers are reminded that the annual budget must be accompanied by a 'quality certificate' in accordance with the format set out in item 27 of Schedule A in the Municipal Budget and Reporting Regulations.

Consolidated budgets and reports for municipalities with entities

A municipality that has one or more municipal entities is required to produce:

- An annual budget, adjustment budgets and monthly financial statements for the parent municipality in the relevant formats; and
- A consolidated annual budget, adjustments budgets and monthly financial statements for the parent municipality and all its municipal entities in the relevant formats.

Municipalities are reminded, that with effect from 1 July 2011, municipalities that have municipal entities must submit their **consolidated** annual budget, **consolidated** adjustment budgets and **consolidated** quarterly financial information to the National Treasury Local Government Database.

In addition, the A Schedule that the municipality submits to National Treasury must be the consolidated budget for the municipality (plus entities) and not the budget of the parent municipality.

This is to ensure that there is consistency of reporting both across municipalities, but also in respect of the individual municipality with municipal entities.

Completion of service delivery information on Table A10

Similar to the previous budget compilation process, municipalities are reminded that Table A10 is becoming an increasingly important source of information on actual service delivery and service delivery backlogs; during the assessment of the 2012/13 budgets and MTREF's it was observed that the information provided in this Table A10 lacks credibility and compromises transparency and accountability of the entire budget process.

National Treasury plans to prepare a special report on this service delivery information for Parliament in the second half of 2013. It is therefore important for each municipality to ensure its information is up-to-date and accurate. In addition, during the assessment of the 2013/14 budgets and MTREF's specific attention will be given to Table A10 by National Treasury and all respective provincial treasuries. Municipalities are advised to give particular attention with the completion of Table A10 in ensuring the information accurately depicts the actual position

of the municipality. In completing Table A10 care must be given the unit of measure i.e. kilolitres, kilowatt-hour etc.

MBRR issues dealt with in previous MFMA Circulars

Municipalities are reminded to refer to MFMA Circulars 48, 51, 54 and 55 with regards to the following issues:

- 1. <u>Budgeting for revenue and 'revenue foregone'</u> The 'realistically anticipated revenues to be collected' that must be reflected on the Budgeted Statement of Financial Performance (Tables A2, A3 and A4) must exclude 'revenue foregone'. The definition of 'revenue foregone' and how it is distinguished from 'transfers and grants' is discussed in MFMA Circular 51.
- 2. <u>Preparing and amending budget related policies</u> Information on all budget related policies and any amendments to such policies must be included in the municipality's annual budget document (refer to MFMA Circular 54).
- 3. <u>2013/14 MTREF Funding Compliance Assessment</u> All municipalities are required to perform the funding compliance assessment outlined in *MFMA Funding Compliance Guideline* and to include the relevant information outlined in MFMA Circular 55 in their 2012/13 budgets (refer to MFMA Circular 55).

Budget process and submissions for the 2013/14 MTREF

Over the past number of years there have been significant improvements in municipal budget processes. Municipalities are encouraged to continue their efforts to improve their budget processes based on the guidance provided in previous MFMA Circulars.

Once more, municipalities are reminded that the IDP review process and the budget process should be combined into a single process.

Submitting budget documentation and schedules for 2013/14 MTREF

To facilitate oversight of compliance with Municipal Budget and Reporting Regulations, accounting officers are reminded that:

- Section 22(b)(i) of the MFMA requires that *immediately* after an annual budget is tabled in a municipal council it must be submitted to the National Treasury and the relevant provincial treasury in both printed and electronic formats. The deadline for such submissions is Tuesday, 10 April 2013.
- Section 24(3) of the MFMA, read together with regulation 20(1), requires that the approved annual budget must be submitted *within ten working days* after the council has approved the annual budget. So if the council only approves the annual budget on 29 June 2013, the final date for such a submission is Thursday, 12 July 2013, otherwise an earlier date applies.

The municipal manager must submit:

 the budget documentation as set out in Schedule A of the Municipal Budget and Reporting Regulations, including the main Tables (A1 - A10) and all the supporting tables (SA1 - SA37) in both printed and electronic format;

- the draft service delivery and budget implementation plan in both printed and electronic format:
- in the case of approved budgets, the council resolution;
- Signed Quality Certificate as prescribed in the Municipal Budget and Reporting Regulations; and
- Signed Budget Locking Certificate as found on the website.

Municipalities are required to send electronic versions of documents and the A1 schedule to lgdocuments@treasury.gov.za.

If the budget documents are too large to be sent via email (exceeds 4MB) please submit to lgbigfiles@gmail.com; any problems experienced in this regard can be made with Elsabe Rossouw (email: Elsabe.Rossouw@treasury.gov.za).

Municipalities are required to send printed submissions of their budget documents and council resolution to:

For couriered documents For posted documents

Ms Linda Kruger
National Treasury
A0 Church Square
Pretoria, 0002

Ms Linda Kruger
National Treasury
Private Bag X115
Pretoria, 0001

After receiving tabled budgets, National Treasury will complete a compliance checklist. This checklist will indicate the level of compliance to the Municipal Budget and Reporting Regulations. A copy of the checklist will be sent to the municipality in order to facilitate improvements in the quality of tabled and approved budgets. Please review the municipality's performance last year, and ensure that the gaps are addressed.

Budget reform returns to the Local Government Database for publication

For publication purposes, municipalities are still required to use the Budget Reform Returns to upload budget and monthly expenditure to the National Treasury Local Government Database. *The old formats may not be used to submit 2013/14 budget information*. All municipalities must have already migrated to using the aligned version of the electronic returns. All returns are to be sent to lgdatabase@treasury.gov.za.

The new aligned electronic returns may be downloaded from National Treasury's website at the following link: http://mfma.treasury.gov.za/Return_Forms/Pages/default.aspx.

Dealing with reporting inconsistencies

In achieving reporting consistency across all municipalities' the following needs to be give specific attention:

Reporting on property rates and revenue foregone
When reporting Property Rates on the electronic returns submitted to
lgdatabase@treasury.gov.za, municipalities are required to do so in the GFS function
Budget and Treasury Office to promote consistent reporting by all municipalities.
Revenue forgone must be divided into the 4 GFS functions (Water, Electricity, Waste

Management and Waste Water Management as well as Property rates (in the BTO function) and accounted for on supporting Table A1 of the MBRR.

Tariffs

Municipalities are required to complete supporting Tables SA13a and SA13b and Table SA14. Table SA13a has been locked as part of the release of the updated Version 2.5 A1 Schedule. It is the intention of National Treasury to assess and analyse this information across all municipalities going forward. In addition, this information will be incorporated into the next Local Government Budget and Expenditure Review.

Publication of budgets on municipal websites

In terms of section 75 of the MFMA all municipalities are required to publish their tabled budgets, adopted budgets, annual reports (containing audited annual financial statements) and other relevant information on the municipality's website. This will aid in promoting public accountability and good governance.

All relevant documents mentioned in this circular are available on the National Treasury website, http://mfma.treasury.gov.za/Pages/Default.aspx. Municipalities are encouraged to visit it regularly as documents are regularly added / updated on the website.

JH Hattingh

Chief Director: Local Government Budget Analysis

11 December 2012

Annexure A – Changes to Schedule A1 – the 'Excel formats'

As noted above, National Treasury has released Version 2.5 of Schedule A1 (the Excel Formats). It incorporates the following changes:

No.	Sheet	Amendment	Reason
1	SA8	Insertion of quantum of water and electricity losses.	Simplification of data gathering for mid-year assessment purposes.
2	SA22, SA23, SA24	Insertion of new footnote.	To clearly state that the personnel figures captured in the budget are only valid at the adoption date of the budget.
3	SA24	Insertion of new footnote.	To clarify that headcount figures must include budgeted vacancies and current staff in order to improve alignment of figures with the municipal organogram.
4	SA13	SA 13 has been split into two separate sheets – SA13a – Service Tariffs by Category SA13b – Service Tariffs by Category (explanatory).	To facilitate the collection of consistent information on municipal tariff structures.

NATIONAL TREASURY

MFMA Circular No. 67

Municipal Finance Management Act No. 56 of 2003

Municipal Budget Circular for the 2013/14 MTREF

This circular provides further guidance to municipalities and municipal entities for the preparation of their 2013/14 Budgets and Medium Term Revenue and Expenditure Framework (MTREF). It must be read together with all previous MFMA Budget Circulars.

1 Key focus areas for the 2013/14 budget process

The 2013 Budget Review notes that spending plans outlined in the 2013 Budget continue to support government's commitment to broadening service delivery and expanding investment in infrastructure, while taking account of the constrained fiscal environment. South Africa's economy has continued to grow, but at a slower rate than projected at the time of the 2012 Budget. GDP growth reached 2.5 per cent in 2012 and is expected to grow at 2.7 per cent in 2013, rising to 3.8 per cent in 2015. Inflation has remained moderate, with consumer prices rising by 5.7 per cent in 2012 and projected to increase by an average of 5.5 per cent a year over the period ahead.

Municipalities are reminded that the economic outlook is, however constrained by a difficult global environment and domestic restructuring. Due to lower-than-projected economic growth and revenue underperformance, government has adjusted the spending plans presented in the 2012 Medium Term Budget Policy Statement. Savings have been made at every level of government to moderate the fiscal deficit while supporting economic recovery. Expenditure has been trimmed in areas that will not adversely affect service delivery, or where programmes are underperforming. Within this economic climate the budget framework still provides for average annual real growth in consolidated government spending of 2.3 per cent over the MTEF period.

The medium-term expenditure framework (MTEF) uses the National Development Plan (NDP) as a point of departure. The NDP sets out an integrated strategy for accelerating growth, eliminating poverty and reducing inequality by 2030. The NDP supported by the New Growth Path and other programmes provides a platform to look beyond the current constraints to the transformation imperatives over the next 20 to 30 years. The NDP emphasises the need to lower the cost of living for households and reduce the cost of doing business for small and emerging enterprise. These objectives need to take into account fiscal sustainability, which ensures that progress will not be interrupted or reversed. This will also entail shifting the composition of spending from consumption towards capital investment.

Government already funds many of the programmes highlighted in the NDP. Road and rail infrastructure, for example, receive significant support over the three-year spending period and there will be major investments in public transport and human settlements. The economic competitiveness and support package will receive R14.9 billion over the spending period to give effect to various growth policies, including the New Growth Path and the Industrial Policy Action Plan. The Minister of Finance stated in his 2013 Budget Speech:

"The NDP reminds us that South Africa needs to invest in a strong network of economic infrastructure designed to support the county's medium- and long-term economic and social objectives".

Expenditure-control systems across government will be revised over the period ahead. There will be tighter rules for intergovernmental transfers, especially for infrastructure projects. Measures will be taken in supply chain management to make it harder for tender processes to be manipulated and to avoid situations where government pays above-market prices for goods and services, including local government.

Given the economic realities and the fact that recovery is likely to be slow, municipalities are once again reminded to adopt a conservative approach when projecting their expected revenues and cash receipts. Municipalities should also pay particular attention to the affordability of tariff increases especially on main services, managing all revenue and expenditure and cash streams effectively, and carefully evaluating all spending decisions.

Considering the accountability cycle of local government, municipalities are urged to carefully consider the objectives of the NDP and National Growth Path. As a sphere of government, municipalities are required to incorporate the objectives of these initiatives after consideration of the Spatial Development Frameworks (SDF) into their Integrated Development Plan (IDP) which should directly inform prioritised budget allocations within the medium-term revenue and expenditure framework (MTREF) of each municipality. Other variables that also need to be considered while compiling the 2013/14 MTREF budgets include the impact of 2011 Census on the IDP and more specifically backlogs and the 'poorest of the poor' (indigent), as well as spatial targeting of infrastructure investment.

Municipalities will have to revise their spending plans and reprioritise funds to ensure key objectives are achieved and well-performing programmes are supported. Expenditure plans need to reflect both the medium-term investment plans and long-term goals identified in the National Development Plan. Over the next three years, government, as a whole, will have to learn to do more with less. The efficiencies that are achieved will protect public finances and enable the country to accelerate development when economic conditions improve. Local government must ensure that efficiency gains, eradication of non-priority spending and the reprioritisation of expenditure relating to core infrastructure inform the next planning framework of all municipalities.

2 Division of Revenue Bill 2013

2.1 Additional allocations to local government 2013

The 2013 Budget Review and the 2013 Division of Revenue Bill indicate that over the 2013 MTEF, R277.7 billion will be transferred directly to local government and a further R21.5 billion has been allocated to indirect grants. Direct transfers to local government in 2013/14 account for 8.9 per cent of national government's non-interest expenditure and when indirect transfers are included this amount rises to 9.5 per cent. An amount of R5.4 billion is added to the local government equitable share to meet the rising costs of providing municipal services and to help rural municipalities, and R9.2 billion is added to direct conditional grants, which include the new municipal water infrastructure, public transport network operations and integrated city development grants. A further R5 billion is added to indirect transfers, through which national departments and public entities provide infrastructure and services on behalf of municipalities.

Local government allocations receive additional funds to address among others:

- Compensate for the rising costs of providing free basic water and electricity to poor households;
- Accelerate provision of access to clean water through bulk and reticulation projects;
- Accelerate provision of access to electricity and improving the sustainability of access through the refurbishment of key infrastructure;
- Expand the collection and use of data on the condition of municipal roads;
- Increasing the number of interns with infrastructure-related skills working in municipalities;
- Host the 2014 African Nations Championship (once off grant); and
- Promote more spatially integrated and efficient cities.

This means the baseline allocations to local government for the 2013/14 are R40.6 billion to the local government equitable share and R34.5 billion for conditional grants, capacity building and other. By 2015/16 these allocations are envisaged to have increased to R50.2 billion and R40.6 billion respectively. Municipalities must ensure that their tabled budgets

reflect the equitable share and conditional grant allocations set out in the 2013 Division of Revenue Bill.

This document is available on National Treasury's website at:

http://www.treasury.gov.za/documents/national%20budget/2013/default.aspx

In addition, National Treasury will send out 'allocation letters' informing each municipality of its equitable share, national conditional grants and provincial transfers (as reflected in the relevant provincial budget and gazette).

2.2 Impact of Census 2011

The results of the latest national census were released by Statistics South Africa in October 2012. According to the 2011 Census, the population of some municipalities grew by over 50 per cent between 2001 and 2011, while others experienced a decline in population. Some provinces recorded significantly smaller populations in the 2011 Census than had been previously estimated, including KwaZulu-Natal, Eastern Cape, Limpopo and the Free State. Gauteng has the highest population increase of close to 1 million people. Transfers to municipalities will significantly be affected by this data as the data used in the local government equitable share and municipal infrastructure grant have been updated to reflect these changes.

In future the local government equitable share formula data for the number of households and those falling below the affordability threshold per municipality will be updated each year using average annual household growth in each municipality between the 2001 and 2011 Census. This data will be used to estimate future growth. The estimated total number of households reflected in the formula will be adjusted each year to balance with Statistics South Africa's mid-year population estimate (for the purposes of calculating these estimates, it will be assumed that average household size remains constant in future years). It is assumed that municipalities that experienced negative household growth between 2001 and 2011 will have zero growth in future. The credibility of estimates will be constantly reviewed and this methodology will be updated to reflect any municipal-level population estimates endorsed by Statistics South Africa or any municipal-level survey or census.

Census data used in the local government equitable share formula is available at:

http://www.statssa.gov.za/publications/Census%202011 data supplied to National Treasury.asp

Statistics South Africa has indicated that the detailed 2011 Census data per municipality will be made available at the end of March 2013. Municipalities must ensure they carefully analyse and evaluate the results; the 2011 Census results will have to be incorporated into the planning framework of all municipalities especially as it relates to backlogs in services, bulk master infrastructure plans and integrated infrastructure expansion.

2.3 Local Government Equitable Share Review

In terms of section 227 of the Constitution, local government is entitled to an equitable share of nationally raised revenue to enable it to provide basic services and perform its allocated functions. The local government equitable share is an unconditional transfer that supplements the income that municipalities can raise from the sources of own revenues available to them (including property rates and service charges). The equitable share provides funding for municipalities to deliver free basic services to poor households and subsidises the cost of administration and other core services for those municipalities that have the least potential to cover these costs from their own revenues.

The share of national revenue allocated to local government through the equitable share is determined in the national budget process and endorsed by Cabinet (the vertical division). Local government's equitable share is divided among the country's 278 municipalities using a formula (the horizontal division); this formula has been amended and updated and will be introduced in 2013/14, following a review conducted by the National Treasury, the Department of Cooperative Governance and the South African Local Government Association, with assistance from the Financial and Fiscal Commission and Statistics South Africa, as well as extensive consultation with municipalities.

The formula applies a revenue-adjustment factor that will direct funding for institutional and community services to municipalities that cannot meet these costs from their own revenues. The new formula and updated population data (2011 Census) will result in significant changes in allocations to local governments. More funding will be allocated to municipalities that have higher poverty rates and consequently less ability to raise their own revenue.

The local government equitable share formula uses demographics and other data to determine each municipality's share of the local government equitable share. It has three parts, made up of five components:

- The first part of the formula consists of the *basic services component*, which provides for the cost of free basic services for poor households.
- The second part enables municipalities with limited own resources to afford basic administrative and governance capacity and perform core municipal functions. It does this through three components:
 - The institutional component provides a subsidy for basic municipal administrative costs.
 - The community services component provides funds towards the provision of core municipal services not included under basic services.
 - The revenue adjustment factor ensures that funds from this part of the formula are only provided to municipalities with limited potential to raise own revenues.
 Municipalities least able to fund these costs from their own revenues should receive the most funding.
- The third part of the formula provides predictability and stability through a *correction* and stabilisation factor, which ensures that all of the formula's guarantees can be met.

The structure of the formula is summarised in the box below:

Structure of the local government equitable share formula

LGES = BS + $(I + CS)xRA \pm C$

where

LGES is the local government equitable share

BS is the basic services component

I is the institutional component

CS is the community services component

RA is the revenue adjustment factor

C is the correction and stabilisation factor

The new formula for the local government equitable share provides more households with a subsidy for free basic water, electricity, sanitation and refuse-removal services. For the 2013 MTEF, the indicative allocations for 2014/15 and 2015/16 have been calculated assuming electricity bulk price increases of 16 per cent, water bulk increases of 7.2 per cent, inflation of 5.1 per cent in 2014/15 and 4.9 per cent in 2015/16 and household growth in line with the period between 2001 and 2011. These variables will be updated in future budgets to reflect any changes in the growth in prices or estimates of population growth. Such updates will result in changes to the allocations to municipalities, and indicative allocations for future years will change to reflect adjustments in these variables.

The threshold for receiving free basic services rises from R800 per month (in 2001 prices) to R2 300 per month (in 2011 prices). The formula also provides funds for the institutional costs of municipalities and for community services; such as parks, recreation and fire fighting.

Importantly, although the affordability threshold that informs the equitable share formulae is set at R2 300 per month, municipalities are not specifically required to use this threshold in their individual indigent polices. Where municipalities have a different affordability threshold than the R2 300 per month as part of their indigent policy, they would need to clearly justify this position in the narrative to the budget document. As part of the Municipal Budget and Benchmark Engagements, National Treasury and the respective provincial treasuries will assess this component of the municipality's indigent policy.

With the introduction of the new equitable share formula and the updated 2011 Census data used in the formula, some municipalities will experience large changes in their equitable share allocations. To smooth the impact of these changes and give municipalities time to adjust (both for municipalities with increasing and decreasing allocations), the new allocations will be phased in over five years. For municipalities with smaller allocations under the new formula, the phase-in mechanism will measure the difference between the municipality's old and new allocations and will close this gap by 20 per cent each year. This means that in the first year, a municipality will only experience a change equivalent to 20 per cent of the gap between their allocations under the old and the new formulas, in the second year they will experience a 40 per cent change, and so on until in the fifth year their allocation is determined entirely through the new formula.

In compiling their 2013/14 MTREF Budgets municipalities must ensure they accurately budget for the actual gazetted equitable share allocations as per the 2013 DoRA.

A full description of the new formula is provided in Annexure W1 (Explanatory memorandum to the division of revenue). This document as well as a summary version of the formula are available on National Treasury's website at:

http://www.treasury.gov.za/documents/national%20budget/2013/review/default.aspx

In addition, more details on how the cost estimates were calculated can be found in the discussion paper on the proposed structure of the new local government equitable share formulae. This document is available on National Treasury's website at:

http://mfma.treasury.gov.za/Media Releases/LGESDiscussions/Pages/default.aspx

3 Macro-economic performance and projections

3.1 Inflation forecasts

Municipalities must take the following macro-economic forecasts into consideration when preparing their 2013/14 budgets and MTREF –

Fiscal year	2010/11	2010/11 2011/12		2013/14	2014/15	2015/16	
	Act	tual	Estimate		Forecast		
Real GDP growth	3.4	3.4 3.1		3.0	3.6	3.8	
CPI inflation	3.8	5.6	5.6	5.6	5.4	5.4	

Source: Budget Review 2013

Note that the fiscal year referred to is the national fiscal year (April to March) which is more closely aligned to the municipal fiscal year (July to June) than the calendar year inflation.

3.2 Employee related costs

Municipalities must take into account the multi-year Salary and Wage Collective Agreement for the period 1 July 2012 to 30 June 2015. The agreement provides for a wage increase based on the average CPI for the period 1 February 2012 until 31 January 2013, plus 1.25 per cent for the 2013/14 financial year.

In this regard municipalities are advised that average CPI for this period is 5.6 per cent. Municipalities are therefore advised to provide for increases related to salaries and wages for the 2013/14 budget year of 6.85 per cent (5.6 per cent plus 1.25 per cent). The agreement also provides for a 1 per cent increase for the 2014/15 financial year. In this regard, municipalities may provide for a 6.4 per cent (5.4 per cent plus 1 per cent) increase for the 2014/15 budget year.

Municipalities are once again reminded to accurately budget for actual positions and vacancies as per the organisational structure of the municipality and notch increments where applicable. Municipalities are also required to accurately complete supporting tables SA22 (Summary councillor and staff benefits), SA23 (Salaries, allowances and benefits of political office bearers/councillors/senior managers) and SA24 (summary of personnel numbers) as part of the Municipal Budget and Reporting Regulations. Municipalities are also required to provide a narrative to the budget document explaining the personnel numbers and budget appropriations.

4 Revising rates, tariffs and other charges

In addition to the issues dealt with in MFMA Budget Circular 66, municipalities are advised to note the following:

4.1 Eskom bulk tariff increases

The Eskom price increase of bulk electricity supplied to municipalities will increase by 8 per cent on 1 July 2013. NERSA approved an annual 8 per cent increase in the bulk price of electricity in terms of the third multi-year price determination application applicable for the period 2013/14 to 2017/18. The full media statement detailing NERSA's decision to approve an 8 per cent increase can be accessed at: www.nersa.org.za.

NERSA is in the process of determining a guideline increase for municipal electricity tariffs. They have indicated that they will only be in a position to finalise this guideline by the end of March 2013. Bulk electricity as a cost driver can contribute as much as 75 per cent of municipalities' electricity function, and considering that the average wage increase (a significant cost component of the municipal electricity function) for the 2013/14 Financial Year is 6.85 per cent (5.6 per cent plus 1.25 per cent) municipalities are advised to limit electricity increases to between 7.5 and 8.0 per cent. National Treasury will consult with NERSA on the methodology applied in determining the municipal tariff increase and communicate with all municipalities once the final guideline is available (envisaged for the end of March 2013).

Municipalities are urged to examine the cost structure of their electricity undertakings and apply to NERSA for electricity tariff increases that are cost reflective to ensure continued financial sustainability.

National Treasury supports the use of the following formula, proposed by NERSA, for calculating municipal electricity tariff increases:

 $MG = (B \times BPI) + (S \times SI) + (R \times RI) + (C \times CCI) + (OC \times OCI)$

Where:

MG = % Municipal Guideline Increase

B = % Bulk purchases

BPI = % Bulk purchase increase

S = % Salaries

SI = % Salaries increase

R = % Repairs

RI = % Repairs increaseC = % Capital charges

CCI = % Capital charges increase

OC = % Other costs

OCI = % Other costs increase

All cost shares and increases must relate to the electricity function of the municipality

Where a municipality's evaluation of its cost structure results in a lower or higher tariff increase to that proposed by NERSA, the municipality must structure its tariffs accordingly and ensure it provides the necessary motivation and information in its tariff application to NERSA.

4.2 Inclining block tariffs (IBT) for electricity

Municipalities are urged to design an IBT structure that is appropriate to its specific circumstances, and maintains an appropriate balance between 'low income customers' and other domestic, commercial and business customers, and the financial interests of the municipality.

It is also important that any proposed IBT is fully aligned to the principles set out in the *South African Electricity Supply Industry: Electricity Pricing Policy* (EPP), including the principle that electricity tariffs must be cost reflective and that any cross-subsidies should be explicit.

A municipality must ensure that it provides the necessary motivation and information to NERSA in its tariff application. In this regard, municipalities should pay careful attention to determining an appropriate level of cross-subsidisation between the different IBT blocks given the profile of its customer base, and also have regard for the price elasticity of the demand for electricity.

4.3 Process for NERSA approval of municipal electricity tariffs

It is important that municipalities and NERSA work together to ensure that the process of approving electricity tariffs does not disrupt the process of compiling municipal budgets or compromise community consultations on the budget. In terms of section 43 (2) of the MFMA, the Minister of Finance may, on good grounds, approve that tariffs determined by NERSA after 15 March 2013 be implemented by municipalities from 1 July 2013.

Owing to the delay in finalising Eskom's approved tariff increase (announced 28 February 2013) NERSA has indicated that this would affect the timelines in the determination of the municipal guideline tariff. As a result, NERSA does not anticipate meeting the 15 March 2013 deadline and has applied to the Minister for extension, as provided for in Section 43 of the MFMA.

Considering the pending extension application by NERSA, municipalities are advised as follows, as it relates to NERSA's regulatory process over municipal electricity tariff determination:

- Municipalities are to formulate their electricity tariff structures for the 2013/14 budgets and MTREF's based on the indicative 7.5 to 8.0 per cent increase as discussed in paragraph 4.1 above. This must inform the tabled 2013/14 budget and MTREF prior to community consultation. Please note that this is an indicative increase for budget preparation purposes and does not replace the formal NERSA processes. As soon as available, the indicative electricity tariff increase needs to be updated in terms of NERSA's approved tariff increase for 2013/14;
- Submit a tariff application to NERSA containing all the required information as soon the budget is tabled in council prior community consultation; the latest possible date being 31 March 2013. Municipalities are however urged to supply NERSA with their tariff applications earlier than this date to facilitate the entire process; and
- NERSA is to finalise the municipal electricity determination process by the 26 April 2013, including formal feedback to municipalities for incorporation into the final 2013/14 budgets and MTREF.

Municipalities are once again reminded to submit all outstanding D-forms to NERSA. The deadline for submission was 30 October 2012. NERSA will not be in a position to evaluate municipal tariff applications in the absence of complete D-forms.

It has come to the attention of National Treasury that several municipalities impose electricity tariff increases without undergoing the necessary NERSA tariff application process. Municipalities should take note that the NERSA electricity tariff application process is a legislative requirement and municipalities that fail to adhere to the application process are acting outside the ambit of the law.

5 Reporting

Currently all 278 municipalities report through the section 71 in-year reporting framework to both the National Treasury and respective provincial treasuries as informed by the MFMA and Municipal Budget and Reporting Regulations (MBRR). In terms of the local government reform roadmap, the next step will be to improve the quality and reliability of reported financial performance. To this end, with effect of 1 July 2013 various refinements and amendments will be made to the section 71 in-year reporting framework which municipalities need to be aware of and proactively gear themselves for full compliance and implementation.

5.1 Unbundling of debtors figures

The MBRR and section 71 in-year reporting framework provides for the disclosure of outstanding debtors and the age analysis of all outstanding debtors. Budget Table A6 (Statement of Budgeted Financial Position) of the MBRR provides for the disclosure of outstanding debtors at an aggregated level and is supported by Table SA3 (Supporting Detail to Budgeted Financial Position). In terms of the section 71 in-year reporting framework the return form AD: Age Analysis of Debtors is currently utilised in collecting detail relating to outstanding debtors.

Municipalities will be required to further unbundle debtors; in-year reporting refinements will include the unbundling of government debtors into national and provincial departments and the disclosure of the interest component of outstanding debtors separately. This information is critical in unpacking and understanding debt owed to municipalities and the impact of such debt on financial sustainability. This is also required to limit the use of 'other debtors' in the reporting returns; 'other debtors' as a percentage of outstanding debtors is unacceptably high and municipalities are urged to limit the use of 'other debtors'.

Further guidance will be supplied to all municipalities in due course as to the reporting refinements and additional requirements. Municipalities are therefore advised to diligently and attentively budget for all outstanding debtors on Table A6 (Statement of Budgeted Financial Position) of the MBRR and supporting Table SA3 (Supporting Detail to Budgeted Financial Position) as part of the 2013/14 MTREF budget compilation process.

Municipalities are further reminded that the in-year reporting for the balance sheet (which includes outstanding debtors and creditors) must reflect the financial position of the municipality at that point in time (snapshot). Reporting in terms of the Statement of Financial Position (Balance Sheet) must not be informed by monthly movements.

5.2 Investments

The MBRR also provides for the disclosure of all investment information. In terms of the budget, Table A6 (Statement of Budgeted Financial Position) of the MBRR provides for the disclosure of all investments at an aggregated level and is supported by Table SA15 (Investment Particulars by Type) and Table SA16 (Investment particulars by maturity); reporting on investments is undertaken through return form BSAC: Statement of Financial Position Actual.

Municipalities will be required to further unbundle investments aligned to the reporting requirements contained in the supporting tables to the MBRR (Table SA15 and Table SA16). Further guidance will be supplied to all municipalities in due course as to the reporting refinements and additional requirements. Municipalities are therefore advised to diligently and attentively budget for all investments on Table A6 (Statement of Budgeted Financial Position) of the MBRR and supporting Tables SA15 and SA16 (Investment particulars by type and maturity).

5.3 Variances between 4th quarter section 71 results and annual financial statements

In terms of the verification process for the fourth quarter of the 2011/12 financial year, differences have been observed by National Treasury between the section 71 in-year reported figures and the figures contained in the 2011/12 annual financial statements for both the debtors and creditors age analyses (electronic return forms AD and AC). Ideally these two sources of municipal performance and financial position information should reconcile, which is currently not the case.

Municipalities are reminded that the section 71 in-year reporting framework provides the basis for National Treasury's monitoring and oversight. The Local Government Database is utilised in the compilation of various publications such as the Quarterly Section 71 Publication, State of Local Government Finances Report, and the biennial Local Government Budget and Expenditure Review as well as acting as an early warning system for local government. In addition, the aggregated outcomes are utilised in the formulation of policy responses to local government such as funding and grant structures. It's therefore extremely important that the reported figures are a true reflection of the municipality's performance and financial position, regardless of source.

Although National Treasury understands that the time lapse between the fourth quarter and finalization of the annual financial statements could result in the restating of figures, we would expect these variances to be restricted to a minimum. Significant variances indicate that the municipality merely completes and report through Section 71 as a compliance requirement and limited care is applied in ensuring the accuracy of year-end results. Variances of up to 100 per cent have been observed between the 4th quarter reported balances for outstanding creditors and debtors and that of the AFS.

As part of the current verification process National Treasury has determined a variance threshold of 10 per cent between figures reported in the 4th quarter of the 2011/12 financial year for outstanding creditors and debtors when compared to the AFS. Where variances are in excess of the 10 per cent threshold, those municipalities will receive correspondence in due course affording them an opportunity to clarify and rectify these differences and also to indicate proposed remedial actions to be instituted to avoid similar occurrences in future.

5.4 Appropriation statement (Reconciliation: Budget and in-year performance)

In terms of the Standards of GRAP 24 on Presentation of Budget Information in Financial Statements municipalities are required to present their original and adjusted budgets against actual outcome in the annual financial statements; this is considered an appropriation statement and the comparison between the budget and actual performance should be a mirror image of each other as it relates to the classification and grouping of revenue and expenditure as has been the case in a national and provincial context. This statement is subject to auditing and accordingly supporting documentation would be required to substantiate the compilation of this statement.

Municipalities will be required to populate a comprehensive appropriation statement (reconciliation between budget, adjustments budget and yearend position) with the compilation of the 2012/13 annual financial statements.

As part of the SCOA classification process perfect alignment between the Municipal Budget and Reporting Regulations and specimen annual financial statements will facilitate the compilation of an appropriation statement and ensure compliance to the Standards of GRAP 24.

During the compilation of the 2013/14 MTREF budgets, municipalities need to carefully consider how revenue and expenditure appropriations are classified with the objective of facilitating the compilation of a comprehensive yearend appropriation statement for the 2013/14 AFS. The format of the appropriation statement is attached as Annexure B. The complete Excel document can be accessed on the National Treasury website at:

http://mfma.treasury.gov.za/Circulars/Pages/default.aspx

5.5 Additional in-year reporting requirements

In future municipalities will be required to provide additional information and supporting documentation to the National Treasury as part of the submission of the Section 71 input forms. This information will assist in improving the quality of the quarterly published local government performance information. Additional information and supporting documentation includes:

- An extract of the trial balances from the general ledger;
- Copies of the actual monthly bank statements (reflecting the opening and closing bank balances) for the primary bank account;
- Bank reconciliation for the reporting period in the primary bank account; and
- Copies of the quarterly tabled section 71 documents in the prescribed Schedule C format including the applicable council resolution.

5.6 Municipal water infrastructure grant and non-revenue water

The 2013 DoRA introduces a new grant namely; the Municipal Water Infrastructure Grant to be administered by the Department of Water Affairs. The grant is aimed at accelerating the delivery of clean water to communities that do not have access to basic water services. The grant provides funding for municipalities to plan and implement various projects; including the construction of new infrastructure and the refurbishment and extension of existing water schemes. The grant has an allocation of R4.3 billion over the 2013 MTEF. Access to clean water must be considered a strategic priority for local government, especially when considering objectives of the new Municipal Water Infrastructure Grant.

According to the latest National Non-Revenue Water Assessment Report (<u>The state of non-revenue water in South Africa, Report TT522-12</u>: www.wrc.og.za); recently released by the Water Research Commission and the Department of Water Affairs, more than 50 per cent of municipalities cannot provide a water balance. These municipalities cannot determine whether demand for water exceeds supply or quantify the extent to which non-revenue water influences water security and financial sustainability.

Considering this strategic imperative, managing non-revenue water becomes a critical aspect of accelerating the delivery of clean water to communities. Municipalities are required to ensure appropriate measurement and reporting of all water losses as per the national targets, and to ensure a common understanding and alignment between technical and financial departments on water loss issues. Inconsistencies have been observed in the methodology applied by municipalities in reporting water losses.

Municipalities are reminded that they are required to report on both apparent (commercial) and real (physical) losses as per the Modified International Water Association (IWA) Water Balance for South Africa. Municipalities are referred to the 2011 Local Government Budget and Expenditure Review (pages 131 to 140) for further information. The document can be accessed at:

http://www.treasury.gov.za/publications/igfr/2011/lg/default.aspx

In addition municipalities can email Paul Herbst (<u>HerbstP@dwa.gov.za</u>) at the Department of Water Affairs should further assistance be required in applying the measures.

The water balance and non-revenue water statistics needs to be updated on at least a quarterly basis and reported to the SALGA's benchmarking system at http://www.munibench.co.za/. This data will subsequently be shared with other stakeholders including municipalities for the purpose of benchmarking municipal progress and performance. It is also the intention of National Treasury to include this information in the quarterly section 71 publications and all municipalities are urged to ensure they accurately report this information going forward.

5.7 Integrated City Development Grant

The Integrated City Development Grant is a new grant introduced in the 2013 DoRA that can potentially be accessed by metropolitan municipalities. The grant will support metropolitan municipalities to identify and establish integration zones within cities, including the establishment of measureable performance objectives, indicators and targets. Metropolitan municipalities will also be assisted to plan and programme a series of catalytic investments within these integration zones. The establishment of the zones will firstly, allow all public interventions to be focussed in an identified spatial context in order to leverage a private investment response. Secondly, it will enable all spheres of government to measure and manage the change of the spatial form and pace in our cities.

Metropolitan municipalities are currently participating in the development of indicators that will be used to measure and reward performance in subsequent years of the grant. The indicators will eventually need to be mainstreamed into city planning (such as the IDP and SDBIP) and budgeting.

Guidelines for the implementation of the Integrated City Development Grant will be made available in due course to all the metropolitan municipalities.

6 Funding choices and management issues

6.1 Benefits to councillors and mayors

In terms of section 167(2) of the MFMA, any remuneration paid in cash or kind to a person as a political office-bearer or as a member of a political structure of a municipality, other than is provided for in the framework of the Remuneration of Public Office Bearers Act, 1998 (Act No. 20 of 1998), is regarded as irregular expenditure. This remuneration includes any bursary, loan, advance or other benefit.

The Determination of Upper Limits of Salaries, Allowances and Benefits of Different Members of Municipal Councils (Government Gazette No. 35962) creates allowance for 'tools of trade'. As defined in the Gazette, tools of trade are the resources or enabling facilities provided by a municipal council to a councillor to enable effective and efficient fulfilment of his/her duties in the most cost effective manner, and at all times remain the assets of the municipality. Section 14 of the Gazette details the tools of trade that may be extended to councillors. Government Gazette No. 35962 can be accessed at:

http://www.info.gov.za/view/DownloadFileAction?id=180122

Municipalities are reminded to adhere strictly to the gazetted limits and provisions.

In the event that expenditure outside the set limits has already been incurred, the municipality must recover that remuneration from the political office-bearer or member and may not write-off any expenditure incurred in paying or giving that remuneration. This expenditure will be

classified as irregular expenditure and the Auditor General will be instructed to audit accordingly.

6.2 Cellular telephone (mobile) and data contract policy

It has to come to the attention of National Treasury that there are efficiency leakages in the way that municipalities manage costs associated with cellular telephones and mobile data (3G). National Treasury has come across instances were municipalities are spending tens of thousands on individual contracts per month. This situation must be urgently addressed by all municipalities in ensuring cost efficiency and value for money for the tax payer.

Where such a policy is not already in place, municipalities are required to compile and approve a cellular telephone (mobile) and data (3G) policy with effect of 1 July 2013. The policy must set upper monthly limits for costs associated with these expenses and the 2013/14 MTREF budget must be compiled in line with these limits.

National Treasury will request the Auditor General to audit against the policy for the 2013/14 financial year and where it is found that expenditure was incurred outside the limits contained in the policy framework, such expenditure will be classified as fruitless and wasteful expenditure as part of the 2013/14 audit finding.

7 Conditional transfers to municipalities

Section 214 of the Constitution provides for national government to transfer resources to municipalities in terms of the annual Division of Revenue Act (DoRA) to assist them in exercising their powers and performing their functions. These allocations are annually in the national budget. Transfers to municipalities from national government are supplemented with transfers from provincial government. Further, transfers are also made between district municipalities and local municipalities.

The DoRA provides for funds to be allocated in different 'schedules'. Each of the schedules provide for grants of a particular type as follows:

Schedule 1		Equitable division of revenue raised nationally among the three spheres of government		
Schedule 2		Determination of each province's equitable share of the provincial sphere's share of revenue raised nationally (as a direct charge against the National Revenue Fund)		
Schedule 3 Determination of each municipality's equitable share of the local go sphere's share of revenue raised nationally				
Schedule 4	Part A	Allocations to provinces to supplement the funding of programmes or functions funded from provincial budgets		
Scriedule 4	Part B	Allocations to municipalities to supplement the funding of programmes or functions funded from municipal budgets		
Schedule 5	Part A	Specific purpose allocations to provinces		
Scriedule 3	Part B	Specific purpose allocations to municipalities		
Schedule 6	Part A	Allocations-in-kind to provinces for designated special programmes		
	Part B	Allocations-in-kind to municipalities for designated special programmes		

Sobodulo 7	Part A	Provision to specifically cater for immediate release of funds to provinces for disaster response					
Schedule 7	Part B	Provision to specifically cater for immediate release of funds to municipalities for disaster response					

It is important that the transfers applicable to municipalities are made transparently, and properly captured in municipalities' budgets. In this regard, regulation 10 of the *Municipal Budget and Reporting Regulations* provides guidance on when municipalities should reflect a transfer or donation in their budgets. Note that promises of funds that do not meet the requirements set out in regulation 10 must not be included in the municipality's budget.

Municipalities are advised not to accept transfers from national or provincial departments that are not gazetted in terms of the 2013 Division of Revenue Act (once enacted) or the relevant provincial budget, or that are not related to a properly approved agency agreement. Such ad hoc transfers are very often unauthorised expenditure at the national and provincial level, and are invariably related to fiscal dumping.

Also note that grants-in-kind (e.g. capital assets transferred by a district to a local municipality) need to be budgeted for as a 'transfer or grant' on Table A4 by the district municipality (and not on their Table A5 Capital Budget – since the expenditure does not get capitalised), and as a 'contributed asset' on Table A4 by the local municipality, and from there directly on Table A6 Budget Financial Position.

In support of regulation 10 of the *Municipal Budget and Reporting Regulations*, the 2013 Division of Revenue Bill provides that –

- 1. In terms of section 15, National Treasury is required to publish in the *Government Gazette* the allocations and indicative allocations for all national grants to municipalities;
- 2. In terms of section 29, each provincial treasury is required to publish in the *Government Gazette* the allocations and indicative allocations per municipality for every allocation to be made by the province to municipalities from the province's own funds; and
- 3. In terms of section 28, each category C municipality must indicate in its budget all allocations from its equitable share and conditional allocations to be transferred to each category B municipality within the category C municipality's area of jurisdiction.

The Government Gazette reflecting the allocations and indicative allocations for all national grants to municipalities will be available within 14 days of the 2013 Division of Revenue Act being signed into law at the following address:

http://www.treasury.gov.za/legislation/bills/2013/Default.aspx

In addition, National Treasury publishes a payment schedule that sets out exactly when the equitable share and national conditional grant funds are to be transferred to municipalities. This will be available at:

http://mfma.treasury.gov.za/Media Releases/Municipal%20Payment%20Schedule/Pages/default.aspx

7.1 Timing of municipal conditional grant transfers

In order to facilitate synchronisation of the national / provincial financial year (1 April to 31 March) with the municipal financial year (1 July to 30 June), the 2013 Division of Revenue Bill requires that all equitable share and Schedule 4 and 5 conditional allocations to municipalities must be transferred to municipalities within the period 1 July 2013 to 31 March 2014. Municipalities must not accept any equitable share, Schedule 4 and Schedule 5 transfers from national or provincial departments outside of these timeframes.

National and provincial departments are also advised to only transfer other grant funds and to only make agency payments to municipalities within the period 1 July 2013 to 31 March 2014. This is to ensure the municipality is able to include such funds on its budget for 2013/14 and to ensure that reporting on the use of the funds is properly aligned across the national, provincial and municipal financial years.

7.2 Payment schedule for transfers

National Treasury has instituted an automated payment system for transfers to municipalities in order to ensure appropriate safety checks are put in place.

Section 22 of the 2013 Division of Revenue Bill requires transfers to municipalities to be made as per the approved payment schedule published by National Treasury. Through this system, any transfers not in line with the payment schedule will be rejected. In addition, if the payment details of the municipality are not up-to-date the transfers will also be rejected.

7.3 Provincial payment schedules

The payment schedules that provincial treasuries are required to submit to National Treasury in terms of section 29(5) of the 2013 Division of Revenue Bill will be published on National Treasury's website, along with the national payment schedule.

7.4 Responsibilities of transferring and receiving authorities

The legal obligations placed on transferring and receiving officers in terms of the 2013 Division of Revenue Bill are very similar to previous requirements. National Treasury intends ensuring strict compliance in order to improve spending levels, and the quality of information relating to the management of conditional grants.

Municipalities are again reminded that compliance with the annual Division of Revenue Act is the responsibility of the municipal manager as the "receiving officer". The municipal manager is responsible for, among other things, the tabling of monthly reports in council on whether or not the municipality is complying with the Division of Revenue Act. He/she is also responsible for reporting on any delays in the transfer or the withholding of funds. Failure on the part of a municipal manager to comply with the Act will have financial implications for the municipality as it will lead to the municipality losing revenue when funds are stopped and/or reallocated.

Where the municipality is unable to comply, or requires an extension, the municipal manager must apply to the National Treasury and provide comprehensive motivation for the non-compliance.

7.5 Unspent conditional grant funds for 2012/13

To bring legal certainty to the process of managing unspent conditional grant funds, section 21 of the 2013 Division of Revenue Bill contains all provisions relating to the treatment of unspent conditional grant funding.

The process to ensure the return of unspent conditional grants for the 2012/13 financial year will be managed in accordance with section 21 of the Division of Revenue Bill. In addition to the previous MFMA circulars, the following practical arrangements will apply –

Step 1: Municipalities must submit their June 2013 conditional grant expenditure reports according to section 71 of MFMA reflecting all accrued expenditure on conditional grants.

- Step 2: When preparing their annual financial statements a municipality must determine what portion of each national conditional allocation it received remained unspent as at 30 June 2013. These amounts MUST exclude all interest earned on conditional grants and all VAT related to conditional grant spending that has been reclaimed from SARS, which must be disclosed separately.
- Step 3: If the receiving officer wants to motivate in terms of section 21(5)(b) of the Division of Revenue Bill 2013 that the funds have been spent or are committed to identifiable projects or wants to propose an alternative payment method or schedule the required information must be submitted to National Treasury by 30 August 2013. National Treasury will not consider any rollover requests that are incomplete (see item 7.6 below) or that are received after this deadline.
- Step 4: National Treasury will confirm in writing whether or not the municipality may retain as a rollover any of the unspent funds because they are committed to identifiable projects or whether it has agreed to any alternative payment methods or schedules by 1 October 2013.
- Step 5: A municipality must return the remaining unspent conditional grant funds that are not subject of a specific repayment agreement with National Treasury to the National Revenue Fund by 21 October 2013. Failure to return these unspent funds by this date will constitute financial misconduct in terms of section 34 of the Division of Revenue Act.
- Step 6: Any unspent conditional grant funds that should have been repaid to the National Revenue Fund by 21 October 2013 will be offset against the municipality's November equitable share allocation.

All the calculations of the amounts to be surrendered to the National Revenue Fund will be audited by the Auditor-General.

7.6 Criteria for the rollover of conditional grant funds

Municipalities may not rollover unspent conditional grant spending in terms of section 28(2)(e) of the MFMA (read together with regulation 23(5) of the Municipal Budget and Reporting Regulations) because they are national/provincial funds. The applicable rollover process is then given effect through the municipal adjustments budget in January/February each year for all the cash/transfers that had already been transferred to the bank accounts of municipalities prior to the end of the financial year. In this regard refer to MFMA Budget Circular No. 51 for more information.

Section 21 of the 2013 Division of Revenue Bill requires that any conditional grants which are not spent at the end of the municipal financial year must revert to the National Revenue Fund, unless the receiving officer proves to the satisfaction of National Treasury that the unspent allocation is committed to identifiable projects, in which case the funds may be rolled over.

When applying to retain unspent conditional allocations committed to identifiable projects or requesting a rollover in terms of section 21(2) of the Division of Revenue Act, municipalities must supply National Treasury with the following information –

- 1. A formal letter addressed to the National Treasury requesting the rollover of unspent conditional grants in terms of section 21(2) of the 2013 of DoRA;
- List of all the projects that are linked to the unspent conditional grants;
- 3. Evidence that work on each of the projects has commenced, namely either of the following:
 - a. Proof that the project tender was published and the period for tender submissions closed before 30 June; or
 - b. Proof that a contract for delivery of the project was signed before 30 June.

- 4. A progress report on the state of implementation of each of the projects;
- 5. The amount of funds committed to each project, and the conditional allocation from which the funds come;
- 6. An indication of the time-period within which the funds are to be spent; and
- 7. Proof that the Chief Financial Officer is permanently appointed. **No rollover requests** will be considered for municipalities with vacant or acting chief financial officers.

If any of the above information is not provided or the application is received by National Treasury after 30 August 2013, the application will be declined.

In addition, National Treasury will also take into account the following information when assessing rollover applications, and reserves the right to decline an application if there is non-performance by the municipality in any of these areas:

- 1. Compliance with the in-year reporting requirements in sections 71 and 72 of the MFMA and section 12 of the 2013 DoRA, including the municipal manager and chief financial officer signing-off on the information sent to National Treasury;
- 2. Submission of the pre-audit Annual Financial Statements information to National Treasury by 31 August 2013;
- 3. Accurate disclosure of grant performance in the 2012/13 pre-audit Annual Financial Statements; and
- 4. Cash available in the bank as at 30 June 2013 to finance the roll-over request.

When approving any rollover requests, National Treasury will use the latest conditional grant expenditure information available at the time, which in this instance is likely to be the disclosure of grant performance in the 2012/13 pre-audit Annual Financial Statements which need to be concluded by 31 August 2013.

7.7 Reporting and accounting for municipal approved conditional grant roll-overs

A municipality must report separately on the spending of conditional grant funds that are rolled over. National Treasury has provided a separate reporting template to facilitate this. This template must be submitted together with the normal template for reporting conditional grant spending for the current year. The template is available at the following link:

http://mfma.treasury.gov.za/Return Forms/Pages/default.aspx

8 The Municipal Budget and Reporting Regulations

National Treasury has released Version 2.5 of Schedule A1 (the Excel Formats). This version incorporates minor changes (see Annexure A). Therefore ALL municipalities MUST use this version for the preparation of their 2013/14 Budget and MTREF to be tabled by the latest 29 March 2013.

Download Version 2.5 of Schedule A1 by clicking **HERE**

The Municipal Budget and Reporting Regulations are designed to achieve a range of objectives, including improving the local government sphere's ability to deliver services by facilitating improved financial sustainability and better medium term planning. The regulations, formats and associated guides etc. are available on National Treasury's website at: http://mfma.treasury.gov.za/RegulationsandGazettes/Pages/default.aspx

8.1 Assistance with the compilation of budgets

If you require advice with the compilation of your budgets, the budget documents or Schedule A1 please direct your enquiries as follows:

8.2 Budget compliance and benchmarking processes

National Treasury and the provincial treasuries will again assess all the municipalities' tabled budgets against the Compliance Checklist. Where there is substantial non-compliance municipalities will be required to re-table their budgets in council, otherwise municipalities will be expected to make the necessary improvements prior to tabling the budget for approval by 1 June 2013.

In addition, the National Treasury and provincial treasuries will be conducting benchmark budget hearings on the municipalities' tabled budgets during April and early May 2013 to assess whether the budgets are realistic, sustainable and relevant, and the extent to which they are funded in accordance with the requirements of the MFMA. In this regard, National Treasury will communicate further with the non-delegated municipalities, while the provincial treasuries will communicate with their respective delegated municipalities.

Municipalities are reminded that the Municipal Budget and Reporting Regulations provide not only for the technical framework for municipal budgets but also for minimum requirements in terms of the structure of the budget document, including narratives in support of the budget tables. It has come to the attention of the National Treasury that certain municipalities table their annual budgets (MTREF's) in formats other than that of the prescriptions contained in the MBRR. Tabling and adopting a municipal budget (MTREF) in a format other than that of the MBRR constitutes gross financial negligence on the part of the municipality and is outside the legislative framework.

For all practical purposes, a municipal budget that is tabled and adopted by a municipal council in any other format than the prescriptions of the MBRR does not legally constitute a municipal budget.

As part of the budget compliance and benchmarking processes to be undertaken by both the National Treasury and respective provincial treasuries compliance verification will include:

- Level of compliance to the Municipal Budget and Reporting Regulations;
- Verification of the format in which the 2013/14 MTREF budget was tabled in the municipal council. This will include proof of a council resolution in support of the tabled 2013/14 MTREF budget (Schedule A of the MBRR); and
- Budget document that includes narratives to the prescribed table of content and budget tables covering at least Tables A1 to A10.

8.3 Certification that budget is correctly captured

Once the municipal council has adopted the municipal budget in the format of Schedule A the relevant portions of the budgets reflected in Tables A1 to A10 need to be captured on the municipality's financial system so that the municipality can manage its revenue and expenditure against the adopted budget. It has come to National Treasury's attention that many municipalities do not capture their adopted budgets on their financial system, and even those that do, do not 'lock' the adopted budget – meaning that the budget reflected on the system can be changed at any time without following due process.

To eliminate this bad practice, National Treasury hereby requests the accounting officer of each municipality in terms of the section 74 of the MFMA to provide a signed certificate by no later than 15 July 2013 certifying that:

- 1. The adopted annual budget has been captured on the municipality's financial system, and that there is complete agreement between the budget on the system and the budget adopted by council:
- 2. That the adopted annual budget on the municipality's financial system is locked; and
- 3. That the municipality has in place controls to ensure that the budget captured on the financial system can only be changed in accordance with:
 - a. a virement authorised by the municipal manager, or duly delegate official, in terms of a council approved virements policy; and
 - b. an Adjustments Budget approved by council.

A template of the certificate is available on National Treasury' website at:

http://mfma.treasury.gov.za/Return Forms/Pages/default.aspx

9 Budget process and submissions for the 2013/14 MTREF

Over the past number of years there have been significant improvements in municipal budget processes. Municipalities are encouraged to continue their efforts to improve their budget processes based on all previous guidance provided and the Municipal Budget and Reporting Regulations. Municipalities are reminded that the IDP review process and the budget process should be combined into a single process.

9.1 Submitting budget documentation and schedules for 2013/14

To facilitate oversight of compliance with Municipal Budget and Reporting Regulations, accounting officers are reminded that:

- Section 22(b)(i) of the MFMA requires that *immediately* after an annual budget is tabled in a municipal council it must be submitted to the National Treasury and the relevant provincial treasury in both printed and electronic formats. So if the annual budget is table to council 29 March 2013, the final date of submission of the electronic budget documents is Tuesday, 2 April 2013. Hard copies must be received by no later than Wednesday, 10 April 2013 including a council resolution in support of the tabled budget; and
- Section 24(3) of the MFMA, read together with regulation 20(1), requires that the approved annual budget must be submitted *within ten working days* after the council has approved the annual budget. So if the council only approves the annual budget on 30 June 2013, the final date for such a submission is **Friday**, 12 July 2013, otherwise an earlier date applies.

The municipal manager must submit:

- the budget documentation as set out in Schedule A of the Municipal Budget and Reporting Regulations, including the main Tables (A1 - A10) and all the supporting tables (SA1 - SA37) and prescribed minimum narrative information in both printed and electronic format;
- the draft service delivery and budget implementation plan in both printed and electronic format; and
- in the case of approved budgets, the council resolution.

Municipalities are required to send electronic versions to Igdocuments@treasury.gov.za.

In the event that the file size exceeds 4 MB then please send it to lgbigfiles@gmail.com and notify the Local Government Database team via an e-mail (excluding the attachment) that the budget was submitted to the big files account.

Municipalities are required to send printed submissions of their budget documents and council resolution to:

For couriered documents

Ms Linda Kruger National Treasury 40 Church Square Pretoria. 0002 For posted documents

Ms Linda Kruger National Treasury Private Bag X115 Pretoria, 0001

After receiving tabled budgets, National Treasury and provincial treasuries will complete a compliance checklist. This checklist will indicate the level of compliance to the Municipal Budget and Reporting Regulations. A copy of the checklist will be sent to the municipality in order to facilitate improvements in the quality of tabled and approved budgets. Please review the municipality's performance last year, and ensure that the gaps are addressed.

9.2 Budget reform returns to the Local Government Database for publication

For publication purposes, municipalities are still required to use the Budget Reform Returns to upload budget and monthly expenditure to the National Treasury Local Government Database. The old formats may not be used to submit 2013/14 budget information. All municipalities must migrate to using the aligned version of the electronic returns. All returns are to be sent to lqdatabase@treasury.gov.za.

Returns for the 2013/14 budget must be submitted to the Local Government Database by **19 July 2013**.

The new aligned electronic returns may be downloaded from National Treasury's website at the following link: http://mfma.treasury.gov.za/Return Forms/Pages/default.aspx.

9.3 Publication of budgets on municipal websites

In terms of section 75 of the MFMA all municipalities are required to publish their tabled budgets, adopted budgets, annual reports (containing audited annual financial statements) and other relevant information on the municipality's website. This will aid in promoting public accountability and good governance.

All relevant documents mentioned in this circular are available on the National Treasury website, http://mfma.treasury.gov.za/Pages/Default.aspx. Municipalities are encouraged to visit it regularly as documents are regularly added / updated on the website.

9.4 Publication of municipal budgets on National Treasuries website

National Treasury publishes all the approved municipal budgets on its website. However, before publishing National Treasury verifies the correctness of the information submitted by municipalities by comparing the following three sources of information:

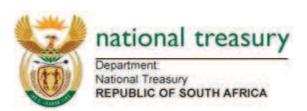

- 1. The Approved Budget, which is the municipality's budget in the format of Schedule A as approved by council (hard copy).
- 2. Schedule A1, which is the electronic version of the budget Tables A1 to A10, and supporting tables.
- 3. The Database budgets, which is the municipal budget generated from the information the municipality submits in the Budget Reform Returns.

The information in the Schedule A1 and the Database budget returns **MUST** reconcile with the Approved Budget as this is the budget that council has adopted and is therefore the legal basis for all revenue collection and expenditure activities within the municipality.

While only 112 municipalities managed to achieve this reconciliation in the 2011/12 financial year, 149 municipal budgets were aligned in the 2012/13 financial year. Efforts will continue to ensure all municipalities meet requirements and further improve the quality of budget information.

This process of ensuring these three sources of budget information reconcile is referred to as the Budget Verification Process. Municipalities must ensure that all these three sources of information are aligned upon finalising their budgets, and when submitting their budget information to the National Treasury and provincial treasuries. The National Treasury and provincial treasuries will again check for this alignment before publishing the municipal budgets in October 2013.

JH Hattingh Chief Director: Local Government Budget Analysis 12 March 2013

Annexure A – Changes to Schedule A1

As noted above, National Treasury has released Version 2.5 of Schedule A1 (the Excel Formats). It incorporates the following changes:

No.	Sheet	Amendment	Reason
1	SA8	Insertion of quantum of water and electricity losses.	Simplification of data gathering for mid-year assessment purposes.
2	SA22, SA23, SA24	Insertion of new footnote.	To clearly state that the personnel figures captured in the budget are only valid at the adoption date of the budget.
3	SA24	Insertion of new footnote.	To clarify that headcount figures must include budgeted vacancies and current staff in order to improve alignment of figures with the municipal organogram.
4	SA13	SA 13 has been split into two separate sheets – SA13a – Service Tariffs by Category SA13b – Service Tariffs by Category (explanatory).	To facilitate the collection of consistent information on municipal tariff structures.
